

Contents

1	Introduction	1
1.1	Motivation	1
1.2	Why R?	2
1.3	Representation of a Solution	3
1.4	Evaluation Function	3
1.5	Constraints	4
1.6	Optimization Methods	5
1.7	Demonstrative Problems	7
2	R Basics	11
2.1	Introduction	11
2.2	Basic Objects and Functions	13
2.3	Controlling Execution and Writing Functions	20
2.4	Importing and Exporting Data	24
2.5	Additional Features	26
2.6	Command Summary	27
2.7	Exercises	29
3	Blind Search	31
3.1	Introduction	31
3.2	Full Blind Search	32
3.3	Grid Search	36
3.4	Monte Carlo Search	40
3.5	Command Summary	42
3.6	Exercises	43
4	Local Search	45
4.1	Introduction	45
4.2	Hill Climbing	45
4.3	Simulated Annealing	50
4.4	Tabu Search	53
4.5	Comparison of Local Search Methods	57

4.6	Command Summary	60
4.7	Exercises	61
5	Population Based Search	63
5.1	Introduction	63
5.2	Genetic and Evolutionary Algorithms	64
5.3	Differential Evolution	70
5.4	Particle Swarm Optimization	73
5.5	Estimation of Distribution Algorithm	78
5.6	Comparison of Population Based Methods.....	84
5.7	Bag Prices with Constraint	88
5.8	Genetic Programming	91
5.9	Command Summary	97
5.10	Exercises	98
6	Multi-Objective Optimization	99
6.1	Introduction	99
6.2	Multi-Objective Demonstrative Problems	99
6.3	Weighted-Formula Approach	101
6.4	Lexicographic Approach	104
6.5	Pareto Approach	110
6.6	Command Summary	116
6.7	Exercises	117
7	Applications	119
7.1	Introduction	119
7.2	Traveling Salesman Problem	119
7.3	Time Series Forecasting	133
7.4	Wine Quality Classification	138
7.5	Command Summary	145
7.6	Exercises	146
	References.....	149
	Solutions.....	153
	Index.....	171
