

# Contents

1. Introduction	1
2. General considerations	2
2.1 Principles governing the safety evaluation of residues of veterinary drugs in food	2
2.2 Modification of the agenda	2
2.3 Evaluation of veterinary drugs with a long history of use	2
2.3.1 General principles	3
2.3.2 Toxicological data	3
2.3.3 Residue data	4
2.4 General safety concerns and pharmacological effects	4
2.5 ADI and MRL "not specified"	5
2.6 Food consumption surveys	6
2.7 Target tissues and marker residues	6
2.8 Identity and quality of veterinary products	7
3. Comments on residues of specific veterinary drugs	7
3.1 Anthelmintic agents	7
3.1.1 Closantel	7
3.1.2 Flubendazole	10
3.1.3 Ivermectin	17
3.1.4 Tiabendazole (thiabendazole)	21
3.1.5 Triclabendazole	25
3.2 Antimicrobial agents	32
3.2.1 Furazolidone	32
3.2.2 Nitrofurural (nitrofurazone)	37
3.3 Production aids	40
3.3.1 Bovine somatotropins	40
3.3.2 Ractopamine	42
3.4 Trypanocide	49
3.4.1 Isometamidium	49
4. Recommendations	54
Acknowledgements	54
References	54
Annex 1	
Reports and other documents resulting from previous meetings of the Joint FAO/WHO Expert Committee on Food Additives	55
Annex 2	
Recommendations on compounds on the agenda	61
