

# Contents

1. Introduction	1
1.1 Background	1
1.2 Scope and aims of the Study Group	2
2. Osteoporosis	2
2.1 Definitions	2
2.2 Osteoporotic fractures	7
2.2.1 Vertebral fracture	8
2.2.2 Hip fracture	9
2.2.3 Forearm fractures	10
2.2.4 Costs	10
2.3 Magnitude of osteoporosis today and future predictions	11
2.3.1 Effect of demographic changes on future fractures	12
2.3.2 Influence of changing rates of fracture incidence	13
2.4 Determinants of bone mass	14
2.4.1 Organization and turnover of bone tissue	18
2.5 Determinants of fracture	20
2.5.1 Spatial organization of bone tissue	21
2.5.2 Extraskkeletal factors	22
2.5.3 Implications for screening	23
2.6 Recommendations for research	24
3. Assessment of bone mass	25
3.1 Techniques for measuring bone mass or density	26
3.1.1 Conventional skeletal radiography	26
3.1.2 Radiographic photodensitometry	26
3.1.3 Radiogrammetry	26
3.1.4 Single-energy absorptiometry	26
3.1.5 Dual-energy absorptiometry	28
3.1.6 Dual-energy X-ray absorptiometry	29
3.1.7 Quantitative computed tomography	30
3.1.8 Photon-scattering methods	31
3.1.9 Neutron activation analysis	31
3.1.10 Ultrasound evaluation of bone	33
3.2 Choice of techniques	34
3.2.1 Correlation between sites	34
3.2.2 Comparative accuracy	38
3.2.3 Predictive value	44
3.3 Sensitivity and specificity of assessments	47
3.4 Recommendations for research	50
4. Assessment of bone loss	50
4.1 Repeated measurements of bone density	50
4.2 Biochemical indices of bone turnover	56
4.3 Biochemical estimation of rates of bone loss	57
4.4 Recommendations for research	59
5. Clinical assessment of risk	59
5.1 Gonadal status	61
5.2 Other disorders	61
5.3 Other factors	61
5.4 Application of clinical assessment	62
5.5 Recommendations for research	65

<b>6. Risks and benefits of intervention</b>	<b>65</b>
6.1 Primary prevention	65
6.2 Prevention of bone loss	66
6.3 Hormone replacement therapy	67
6.3.1 Effects on bone	67
6.3.2 Coronary heart disease	69
6.3.3 Endometrial cancer	70
6.3.4 Breast cancer	70
6.3.5 Cerebrovascular disease	71
6.3.6 Overall risks and benefits of HRT	71
6.4 Non-HRT methods of prevention	73
6.4.1 Calcium	73
6.4.2 Calcitonins and biphosphonates	74
6.4.3 Other treatments	76
6.4.4 Implications for screening	77
6.5 Recommendations for research	78
<b>7. Screening</b>	<b>78</b>
7.1 Principles of screening for osteoporosis	78
7.1.1 The disease	80
7.1.2 The test	80
7.1.3 The intervention	81
7.1.4 The programme	81
7.2 Facilities for diagnosis and treatment	82
7.3 Limitations of the screening test	82
7.4 Uptake of screening	82
7.5 Uptake of intervention	83
7.6 Type of intervention	83
7.7 Intervention thresholds	84
7.8 When to test	87
7.9 Who to test	87
7.10 The aims of screening	88
7.11 Setting of a screening programme	89
7.12 Costs of selective screening	90
7.13 Recommendations for research	94
<b>8. Summary and conclusions</b>	<b>94</b>
8.1 Osteoporotic fracture	94
8.2 Bone mass and bone loss	95
8.3 Assessment of bone mass	95
8.4 Assessment of bone loss	97
8.5 Clinical assessment of risk	98
8.6 Interventions	98
8.7 Screening	99
