

# Contents

1. Introduction	1
2. Fluorides in the environment	2
2.1 Fluorides in the lithosphere	3
2.2 Fluorides in water	3
2.3 Fluorides in air	4
2.4 Fluorides and pollution	4
2.5 Fluorides in foods and beverages	4
2.6 Desalination and household water treatment plants	5
2.7 Conclusions	6
3. Fluoride metabolism and excretion	6
3.1 Fluoride absorption	6
3.2 Fluoride in plasma	6
3.3 Tissue distribution	7
3.4 Fluoride excretion	8
3.5 Conclusions	9
4. Fluoride in teeth and bone	9
4.1 Fluoride in teeth	9
4.2 Fluoride in bone	10
4.3 Fluoride and osteoporosis	10
4.4 Fluoride and hip fractures	11
4.5 Fluoride and skeletal fluorosis	11
4.6 Fluoride and osteosarcoma	12
4.7 Conclusions	12
5. Biomarkers of fluoride exposure	12
5.1 Contemporary markers: urine, plasma, saliva	13
5.2 Recent markers: nails and hair	13
5.3 Historic markers: bone and teeth	13
5.4 Fluorosis as a biomarker	14
5.5 Conclusions	14
6. Caries prevention and dental fluorosis	14
6.1 Conclusions	15
7. Fluoride in drinking-water	16
7.1 Impact on a population, limitations, and implementation	16
7.2 Economics, health, and safety	16
7.3 Legal aspects and public acceptance	17
7.4 Appropriate levels of fluoride in drinking-water	17
7.5 Partial defluoridation	18
7.6 Water fluoridation and root-surface caries	19
7.7 Requirements for application	19
7.8 Conclusions	19
8. Fluoridated salt	20
8.1 Caries inhibition	20
8.2 Impact on a population, limitations, and implementation	20
8.3 Economics, health, and safety	21

8.4	Legal aspects and public acceptance	21
8.5	Requirements for application	22
8.6	Conclusions	22
<b>9.</b>	<b>Fluoridated milk</b>	<b>22</b>
9.1	Impact on a population, limitations, and implementation	22
9.2	Economics, health, and safety	23
9.3	Conclusions	23
<b>10.</b>	<b>Fluoride supplements (tablets and drops)</b>	<b>23</b>
10.1	Impact on a population, limitations, and implementation	24
10.2	Economics, health, and safety	24
10.3	Legal aspects and public acceptance	25
10.4	Dental fluorosis and fluoride supplements	25
10.5	Dosage schedule	25
10.6	Conclusions	26
<b>11.</b>	<b>Fluoridated toothpastes</b>	<b>26</b>
11.1	Fluoride concentrations in toothpastes	27
11.2	Cost of fluoridated toothpastes	27
11.3	Fluoridated toothpastes for young children	28
11.4	Toothpaste formulation	28
11.5	Effect of fluoridated toothpastes on root-surface caries	28
11.6	Manner of use of fluoridated toothpaste	29
11.7	Conclusions	29
<b>12.</b>	<b>Topical use of fluoride</b>	<b>30</b>
12.1	Professionally applied topical fluoride gels and solutions	30
12.2	Topical fluoride gels for application by the subject	31
12.3	Fluoride varnishes	32
12.4	Slow-release fluoride	32
12.5	Fluoride mouth-rinsing	32
12.6	Conclusions	33
<b>13.</b>	<b>Multiple fluoride exposure</b>	<b>34</b>
13.1	Conclusions	34
<b>14.</b>	<b>Recommendations</b>	<b>35</b>
	<b>Acknowledgements</b>	<b>36</b>
	<b>References</b>	<b>37</b>
