

Contents

1. Introduction	1
2. Global demographic trends in elderly populations	1
2.1 Aging of the population	2
2.1.1 Historical trends	2
2.1.2 Projected trends	5
2.1.3 Very elderly people	5
2.2 Sex differences, marital status and living arrangements	5
2.3 Trends in life expectancy and total mortality	7
3. Cardiovascular disease in elderly people	8
3.1 The global burden of cardiovascular disease	8
3.2 Routine mortality statistics	12
3.3 Cardiovascular disease mortality rates	12
3.3.1 Trends in mortality rates	17
3.3.2 Explanations for the trends in CVD mortality	20
3.4 Hypertension	21
3.5 Cardiac failure	22
3.6 Vascular dementia	22
3.7 Risk factors for cardiovascular disease	22
3.7.1 Blood pressure	22
3.7.2 Cholesterol	23
3.7.3 Smoking	23
3.7.4 Physical activity	24
3.7.5 Alcohol	24
3.7.6 Social status	25
3.7.7 Nutrition	25
3.7.8 Diabetes	25
3.7.9 Other risk factors	26
4. Prevention of cardiovascular diseases in elderly people	26
4.1 Introduction	26
4.2 Preventive strategies	27
4.2.1 Strategies for primary prevention of cardiovascular disease	27
4.3 Primary prevention of hypertension	30
4.3.1 Weight control	30
4.3.2 Reduced sodium intake	31
4.3.3 Physical activity	31
4.3.4 Reduced alcohol consumption	31
4.4 Prevention of coronary heart disease	32
4.4.1 Management of elderly patients with hypertension	32
4.4.2 Management of elderly patients with lipid abnormalities	34
4.4.3 Cigarette smoking	36
4.4.4 Physical activity	36
4.4.5 Diabetes mellitus	37
4.4.6 Obesity	37
4.5 Prevention of stroke	37
4.6 Protective factors for cardiovascular disease	38
4.7 Secondary prevention of cardiovascular disease	39
4.8 Economic perspective on preventive strategies	39
4.8.1 Population strategies	39

4.8.2	Strategies aimed at high-risk individuals	40
4.8.3	Cost-effective interventions in developing countries	41
4.9	Comprehensive preventive programmes	42
4.9.1	Community programmes	42
4.9.2	National programmes	43
5.	Rehabilitation of elderly people with cardiovascular disease	44
5.1	Disability in elderly people	44
5.2	Rehabilitation of the elderly patient with heart disease	45
5.3	Stroke rehabilitation	47
5.4	Autonomy	47
6.	Health policy and cardiovascular diseases in the elderly	48
6.1	The demographic imperative	48
6.2	Policy development	49
6.2.1	CVD as a national priority	49
6.2.2	Promotion of cardiovascular health of elderly people	49
6.2.3	Setting targets	50
6.3	Policy implementation	50
6.3.1	The role of governments	50
6.3.2	Intersectoral collaboration	51
6.3.3	Health services	51
6.3.4	Education and training	52
6.4	Data for policy formulation	52
7.	Conclusions and recommendations	53
7.1	Conclusions	53
7.2	Recommendations	55
7.2.1	General recommendations	55
7.2.2	Research recommendations	55
7.2.3	Recommendations to national governments	56
7.2.4	Recommendations to WHO	57
	Acknowledgements	57
