

Contents

1. Introduction	1
1.1 Background	1
2. Objectives of the Study Group	3
3. Framework for analysis of integrated health services	4
3.1 Definition of integrated health services	4
3.2 Advantages and disadvantages of integration	4
3.3 Examples of integration	5
4. Evolution towards integration	7
4.1 Development of primary health care as an integrated health system	10
4.2 Current trends and issues in integration	13
4.3 Changes in health sector policies affecting integration of services	14
5. Review of country experiences of integrated health services	17
5.1 Outcomes	17
5.2 Expected gains	18
5.2.1 Improved efficiency and productivity	18
5.2.2 Improved health status	18
5.2.3 Improved user satisfaction and convenience	18
5.2.4 Improved equity	19
6. Model of an integrated district health system	19
6.1 Components of the district health system	20
6.2 Model of an integrated district health system based on primary health care	23
6.3 Implementing district health systems based on primary health care	25
6.3.1 Planning	25
6.3.2 Decentralization	26
6.3.3 Community involvement	27
6.3.4 Objectives, goals, priority-setting and indicators	28
6.3.5 Human resource development and management for integration	28
6.3.6 Multisectoral integration	29
7. Issues affecting integration	30
7.1 Problems encountered	30
7.1.1 Changing slogans for public health initiatives	30
7.1.2 Definition of primary health care	30
7.1.3 Top-down approach to health planning	31
7.1.4 Piecemeal solutions to complex health system problems	31
7.2 Challenges to be faced	32
7.2.1 Relationship between health care institutions	32
7.2.2 Capacity-building and incentives for integrating systems	32
7.2.3 Unity of purpose	33
7.2.4 Community action for integration	34
7.2.5 Health systems research	34
7.3 Obstacles to change – a case for rational analysis	35

8. Plan of action	36
8.1 Guidelines for international action to promote integrated health care delivery	36
8.1.1 Sharing information	36
8.1.2 Leadership and advocacy	37
8.1.3 Building partnerships	37
8.1.4 Improving health infrastructure	38
8.1.5 Integration and coordination within WHO	38
8.2 Guidelines for a national strategy and plan of action	38
8.2.1 Building a national policy and strategy framework	38
8.2.2 Assessing the condition of the district health system	39
8.2.3 Building the capacity to operate the district health system	39
8.2.4 Introducing organizational and structural change	39
8.2.5 The use of health systems research	40
8.3 Guidelines for a district strategy and plan of action	40
8.3.1 Strengthening the district organizational structure	41
8.3.2 Human resources development	41
8.3.3 Building physical capacity	41
8.3.4 Networking	41
