

# Contents

1. Introduction	1
2. Types of studies	3
2.1 Descriptive observational studies	3
2.2 Analytical epidemiological studies	4
2.3 Interpretation of risk estimates from analytical epidemiological studies	4
2.4 Controlled clinical trials	5
2.5 Qualitative and multidisciplinary research	6
2.5.1 Qualitative research	6
2.5.2 Multidisciplinary research	7
3. Demography of the menopause	7
3.1 Population growth	7
3.2 Menopause and mortality	9
3.3 Conclusions	10
3.4 Recommendation	12
4. Endocrinology of the normal menopause	12
4.1 Background	12
4.2 Terminology	12
4.3 Ovarian morphology	14
4.4 Menstrual cycle patterns	14
4.5 Age at menopause	14
4.6 Hormone concentrations, age and menstrual status	16
4.7 Conclusions	19
4.8. Recommendations	20
5. Symptoms of the menopause and their treatment	21
5.1 Background	21
5.2 Symptoms of the menopause	22
5.2.1 Vasomotor symptoms	22
5.2.2 Urogenital atrophy	24
5.2.3 Irregular menstruation in the perimenopause	25
5.2.4 Other complaints	25
5.3 Relevance of existing data to developing countries	26
5.4 Conclusions	26
5.5 Recommendations	27
6. Cultural context of the menopause	27
6.1 Background	27
6.2 Cultural and economic context of the menopause in developing countries	28
6.3 Health effects of the menopause in developing countries	29
6.4 Conclusions	30
6.5 Recommendations	30
7. Contraception and the late premenopause	30
7.1 Background	30
7.1.1 Probability of pregnancy	31
7.1.2 Reduced fecundity	31
7.1.3 Risks of pregnancy	31

7.2	Contraceptive options	32
7.2.1	Combined oral contraceptives	32
7.2.2	Progestogen-only contraceptives	35
7.2.3	Intrauterine devices (IUDs)	36
	Copper-bearing IUDs	36
	Levonorgestrel-releasing IUD	36
7.2.4	Barrier methods	37
7.2.5	Sterilization	37
7.2.6	Natural methods	38
7.3	Relevance of existing data to developing countries	38
7.4	Conclusions	38
7.5	Recommendations	39
<b>8.</b>	<b>Osteoporosis and fractures</b>	<b>40</b>
8.1	Background	40
8.1.1	Magnitude of the problem	40
8.1.2	Geographical variation	41
8.2	Pathogenesis of osteoporosis and fractures	41
8.3	Methods of measuring bone density and predicting fracture risk	44
8.3.1	Bone mineral densitometry	44
8.3.2	Ultrasound of bone	47
8.3.3	Biochemical markers	47
8.3.4	Genetic markers	48
8.4	Prevention of osteoporosis and fractures	48
8.4.1	Calcium and vitamin D	48
8.4.2	Physical exercise	49
8.4.3	Smoking and alcohol	49
8.4.4	Administration of estrogens and progestogens	50
8.4.5	Avoidance of trauma	50
8.5	Treatment of osteoporosis and fractures	51
8.5.1	Calcitonin	51
8.5.2	Bisphosphonates	51
8.5.3	Vitamin D sterols	52
8.5.4	Fluoride	52
8.5.5	Other potential therapies	52
8.6	Conclusions	52
8.7	Recommendations	53
<b>9.</b>	<b>Cardiovascular diseases and hormone therapy</b>	<b>54</b>
9.1	Background	54
9.2	Epidemiological studies of hormone therapy	55
9.3	Coronary atherosclerosis	57
9.4	Mechanisms of hormonal effects	58
9.4.1	Lipids	58
9.4.2	Coagulation and fibrinolysis	59
9.4.3	Insulin resistance	59
9.4.4	Vascular tone	60
9.5	Implications for developing countries	61
9.6	Conclusions	61
9.7	Recommendations	62
<b>10.</b>	<b>Hormone therapy and breast cancer</b>	<b>63</b>
10.1	Background	63
10.2	Exogenous hormones	65

10.3 International perspective	67
10.4 Conclusions	67
10.5 Recommendations	68
<b>11. Hormone therapy and gynaecological cancers</b>	<b>69</b>
11.1 Endometrial cancer	69
11.1.1 Estrogens alone	69
11.1.2 Estrogens plus progestogens	70
11.2 Ovarian cancer	71
11.3 Cervical cancer	71
11.4 Cancer of the vulva	72
11.5 International implications	72
11.6 Conclusions	73
11.6.1 Endometrial cancer	73
11.6.2 Ovarian cancer	73
11.6.3 Cervical cancer	73
11.7 Recommendations	74
<b>12. Health promotion and the menopause</b>	<b>74</b>
12.1 Setting of the menopause	74
12.2 Symptoms of the menopause	75
12.3 Disease prevention	75
12.4 Hormone therapy	76
12.5 Conclusions	78
12.6 Recommendations	79
