

# Contents

1. Introduction	1
1.1 Objectives of the Study Group	2
1.2 Background	2
2. Central issues in health centre development	4
2.1 Role of the health centre in the district health system	4
2.1.1 A health development unit	4
2.1.2 A frontline facility	5
2.1.3 Reaching the underserved and high-risk groups in the community	6
2.1.4 An integrator of health activities	7
2.1.5 Promoting the rational use of human and material resources	8
2.2 Political and legal framework: creating an enabling environment	11
2.2.1 Catchment area/population	11
2.2.2 Health centre decentralization: governance, authority and accountability	12
2.2.3 Community empowerment	14
2.2.4 Local administration of the health centre	15
2.2.5 Health centres and local government	16
2.2.6 Allocation of resources in support of health centres	18
2.3 Health centre management and strategy	20
2.3.1 Planning and programme development	20
2.3.2 Support, supervision and capacity development	23
2.3.3 Intersectoral collaboration	24
2.3.4 Community involvement in health	24
2.4 Human resources for the health centre	24
2.4.1 Management training and leadership development	25
2.4.2 Continuing learning and support: new attitudes and skills	25
2.4.3 Staff patterns	27
2.4.4 Conditions of service	29
2.4.5 The health centre team and the contribution of nursing personnel	30
2.4.6 Health centres as a locus for education and training	30
2.5 Health centre services	31
2.5.1 Mix of health centre services and integration of vertical programmes	31
2.5.2 Referral systems and continuity of care	32
2.5.3 Other resources for health and development	33
2.5.4 Supply of essential drugs	33
2.5.5 Quality assurance including client satisfaction	34
2.6 Costs and financing of health centre services	35
2.6.1 Costs of health centre services	35
2.6.2 Resource utilization	36
2.6.3 Financing health centre services	37
2.6.4 Financial control and accountability	37
2.6.5 The private sector and the public-private interface	38

3. Making health centres work	39
3.1 Essential information	39
3.2 Defining the catchment area and developing a community profile	39
3.2.1 The catchment area, its population and their demographic profile	39
3.2.2 The catchment area: developmental profile	40
3.2.3 Developing a community health profile	41
3.3 Planning and implementation	42
3.3.1 Formulating health priorities	42
3.3.2 Developing health centre workplans	43
3.4 Information to support health centre operations	44
3.4.1 Routine data	44
3.4.2 Monitoring and evaluation	46
3.4.3 Indicators as the prime tool for monitoring and evaluation	46
3.4.4 Approaches and methods for health assessment, monitoring and evaluation	48
3.4.5 Use of information by communities	50
3.5 Research and development	50
3.5.1 Identifying the research and development agenda	50
3.5.2 Educational and research institutions	53
4. Conclusions and recommendations	54
4.1 Conclusions	54
4.1.1 Present and future challenges	54
4.1.2 The health centre in district health systems	55
4.1.3 The community health centre as a health and development unit	55
4.1.4 Weaknesses in the health centre system	56
4.1.5 Facing the future	56
4.2 Recommendations	57
4.2.1 Recommendations to Member States	57
4.2.2 Recommendations to WHO	58
