

Contents

1. Introduction	1
2. The disease	5
2.1 Clinical signs and symptoms	5
2.1.1 Signs and symptoms in the first stage	5
2.1.2 Signs and symptoms in the second stage	8
2.2 Pathology and pathogenesis	9
2.2.1 Factors adverse to trypanosome survival	10
2.2.2 Factors favouring trypanosome survival	10
2.2.3 Nervous system dysfunction	11
2.3 Diagnosis	12
2.3.1 Detection of the parasite	12
2.3.2 Indirect diagnosis	14
2.4 Treatment	15
2.4.1 Recommended treatment	16
2.4.2 Treatment of the first stage	16
2.4.3 Treatment of the second stage	17
2.4.4 Additional treatment	18
2.4.5 Treatment of relapse in patients with <i>T. b. gambiense</i> infection	18
2.4.6 Treatment of relapse in patients with <i>T. b. rhodesiense</i> infection	18
2.4.7 Follow-up	18
3. The parasite	19
3.1 Taxonomy and nomenclature	19
3.2 Characterization	19
3.2.1 Biological and immunological characterization	19
3.2.2 Biochemical and molecular characterization	21
3.3 Isolation and preservation	23
3.3.1 Methods of isolation	23
3.3.2 Cryopreservation	23
3.4 Metabolism	23
4. The vectors	24
4.1 Taxonomy and species identification	24
4.2 Species distribution	25
4.3 Bioecology	25
4.3.1 Reproduction	25
4.3.2 Longevity	26
4.3.3 Habitats	26
4.3.4 Resting sites	26
4.3.5 Feeding behaviour	27
4.3.6 Dispersal	27
4.3.7 Response to odours and colours	27
4.4 Population dynamics	28
4.5 Tsetse flies as vectors of trypanosomes	28
4.5.1 Epidemiological risk factors	28

4.5.2	Experimental studies of vector competence	29
4.5.3	Vectorial capacity	29
5.	Drugs for the treatment of trypanosomiasis	30
5.1	Drugs for the treatment of the first stage	30
5.1.1	Pentamidine	30
5.1.2	Suramin sodium	32
5.2	Drugs for the treatment of the second stage	33
5.2.1	Melarsoprol	33
5.2.2	Eflornithine	34
5.2.3	Nifurtimox	36
5.3	Combinations of drugs	37
5.4	Drug resistance	37
5.5	Prophylaxis	37
6.	Epidemiology	37
6.1	Transmission dynamics	37
6.1.1	<i>T. b. gambiense</i>	37
6.1.2	<i>T. b. rhodesiense</i>	39
6.2	Reservoir hosts	39
6.2.1	<i>T. b. gambiense</i>	39
6.2.2	<i>T. b. rhodesiense</i>	40
6.3	Disease foci	40
6.4	Indicators of transmission rates	41
6.5	Factors influencing transmission rates	42
7.	Public health aspects	43
7.1	Human hosts and their activities	43
7.2	Social impact of the disease	43
7.2.1	Individual and family level	43
7.2.2	Community level	44
8.	Control and surveillance	45
8.1	Identification of cases in the population at risk	45
8.1.1	Methods	45
8.1.2	Case-detection strategies	47
8.1.3	Options for control and surveillance	48
8.2	Vector control	51
8.2.1	Principles and constraints	51
8.2.2	Traps and screens	52
9.	Tools for the implementation and evaluation of control programmes	55
9.1	Geographical information systems	55
9.2	Decision analysis	57
9.3	Definition of indicators for the evaluation of control programmes	57
9.3.1	The scope of evaluation	58
9.3.2	The use of indicators for programme improvement	59
9.4	Financial and economic aspects	59
9.4.1	Calculating the cost of case-detection and treatment	59
9.4.2	Sampling strategies	60

10. Training and research	60
10.1 Training	60
10.1.1 Types of training	61
10.1.2 The approach to training	61
10.1.3 Training materials	62
10.2 Research	62
10.2.1 Epidemiological research	62
10.2.2 Research on tsetse flies	62
10.2.3 Research on drugs	62
10.2.4 Improvement of surveillance	62
10.2.5 Health systems research	63
11. Recommendations	63
Acknowledgements	65
