1. Introduction	1
2. Background	1
3. Objectives	2
4. The scope of VPH in the twenty-first century	4
5. New and future trends that will influence VPH	9
5.1 Promoting VPH within the <i>Health for all in the twenty-first century</i> strategy	9
5.1.1 Population increases	11
5.1.2 New technologies	11
5.1.3 Climatic changes	12
5.1.4 Globalization of trade	12
5.1.5 HIV/AIDS epidemic	13
5.2 The implications for VPH of increasing national and international trade in animals and animal products	13
5.3 Surveillance and control of emerging and re-emerging diseases and the challenge for VPH	15
5.3.1 Foodborne and waterborne diseases of zoonotic origin	17
5.3.2 Antimicrobial resistance	17
5.3.3 Vector-borne and other zoonotic diseases	17
5.3.4 The role of veterinarians and other VPH professionals	17
5.4 The implications of structural adjustment programmes, economies in transition and privatization of veterinary services for VPH	18
5.4.1 The implications of structural adjustment programmes for VPH	18
5.4.2 The implications of privatization for VPH	19
5.4.3 The implications of economies in transition for VPH	20
5.5 The need for basic and applied research to meet the new challenges of VPH	20
5.6 Approaches to VPH and its evolution	23
5.6.1 Challenges for effective implementation of VPH	25
6. Organization and management of VPH services and programmes	26
6.1 Organizational and managerial requirements for applying VPH programmes at the international level	26
6.2 Organizational and managerial requirements for applying VPH programmes at national and subnational levels	27
6.3 Intersectoral collaboration and liaison	28
6.4 The roles and needs of national and international collaborating and reference centres	29
6.5 Recent advances in information technology and VPH	30
6.5.1 Communication and dissemination of information	31
6.5.2 Reporting systems	32
6.5.3 Virtual databases	32

6.5.4	Supercomputers	33
6.5.5	Quality of data and reporting	33
6.6	The need for risk analysis and human health indicators for VPH	34
6.6.1	Risk analysis	34
6.6.2	Risk assessment	34
6.6.3	Risk management	35
6.6.4	Risk communication	35
6.6.5	Health indicators	36
6.7	Economic implications of VPH programmes	36
<b>7.</b>	<b>Professional development and utilization</b>	<b>37</b>
7.1	Undergraduate training in VPH	37
7.2	Postgraduate training in VPH and continuing professional development	38
7.2.1	Disciplines in VPH	39
7.2.2	Master of public health and Master of science degrees	39
7.2.3	Diploma or board certification	40
7.2.4	Distance learning and knowledge transfer	40
7.3	The role of auxiliaries and the community in VPH	40
7.3.1	Veterinary and medical personnel	40
7.3.2	Community participation and education	41
7.4	Gender issues in VPH programmes	42
<b>8.</b>	<b>Conclusions and recommendations</b>	<b>46</b>
8.1	Surveillance and information exchange	46
8.2	Research	47
8.3	Implementation of programmes	47
8.3.1	Adaptation to a changing environment and intersectoral collaboration	47
8.3.2	Community participation	48
8.3.3	Role of nongovernmental organizations	49
8.3.4	Political commitment	49
8.3.5	Collaborating centres and reference laboratories	50
8.3.6	Staff development and utilization	50
8.3.7	Collaboration with developing countries	52
