

Contents

1. Introduction	5
1.1 Quality concept	5
1.2 Short glossary of terms frequently used in conjunction with information system quality easement	6
2. Software quality standardization starting point	13
2.1 The role of standards	13
2.2 Standards liability	13
2.3 What is interesting when you read a standard?	14
2.4 How the international standardization for ICT are created	15
2.5 Old international standards for software product quality	16
3. Software Quality Requirements and Evaluation (SQuaRE) model	17
3.1 Introduction to SQuaRE	17
3.2 Software product quality measurement model	23
3.3 Quality model hierarchy	25
3.4 Model for External and Internal software product quality	26
3.4.1 Functional suitability	27
3.4.2. Reliability	28
3.4.3 Performance efficiency	28
3.4.4 Operability	29
3.4.5 Security	30
3.4.6 Compatibility	31
3.4.7 Maintainability	31
3.4.8 Portability	32
3.5 Model for system quality in use	33
3.5.1 Effectiveness	34
3.5.2 Efficiency	34
3.5.3 Satisfaction	34
3.5.4 Safety	35
3.5.5 Usability	35
3.6 Data quality model	36
3.7 Stakeholder perspectives on quality	44
3.8 Software product quality evaluation process	45
3.8.1 General requirements for the evaluation	45
3.8.2 Evaluation process model	46
3.8.3 Roles in the evaluation process	47
3.8.4 Documentation the evaluation	44
3.8.4 Evaluation activities and stages	48
4. Attributes and measures	55
4.1 Support in international standardization	55
4.2 Base and derived measure, measure elements	56
4.3 Selection of attributes and measures	57
4.4 Important characteristics of attributes and measure	58
4.5 Selected measure examples	59
