

<i>Preface</i>	v
<i>List of Contributors</i>	vii
1. A survey of recent results for initial and boundary value problems singular in the dependent variable <i>R.P. Agarwal and D. O'Regan</i>	1
2. The lower and upper solutions method for boundary value problems <i>C. De Coster and P. Habets</i>	69
3. Half-linear differential equations <i>O. Došlý</i>	161
4. Radial solutions of quasilinear elliptic differential equations <i>J. Jacobsen and K. Schmitt</i>	359
5. Integrability of polynomial differential systems <i>J. Llibre</i>	437
6. Global results for the forced pendulum equation <i>J. Mawhin</i>	533
7. Ważewski method and Conley index <i>R. Srzednicki</i>	591
Author Index	685
Subject Index	693
