

Contents

1. Introduction	1
1.1 Background	2
1.2 Framework and terminology	3
2. The mechanisms of harm from alcohol: intoxication, dependence and toxicity	5
2.1 Types of alcohol-related harm, and their physiological basis	5
2.2 Alcohol intoxication	6
2.3 The dependence-producing properties of alcohol	7
2.4 Toxic effects of alcohol	7
2.5 Conclusions on mechanisms of harm	9
3. Alcohol availability and consumption in the world	9
3.1 Alcohol production, distribution and promotion	9
3.2 Levels, patterns and trends in alcohol consumption	11
3.3 Determinants and correlates of alcohol consumption	15
3.4 Conclusions concerning alcohol availability and consumption	18
4. The harm attributable to alcohol consumption	19
4.1 Impact on health: alcohol's contribution to the global burden of disease	19
4.2 Social harms	20
4.3 Conclusions on harm attributable to alcohol consumption	23
5. Effective strategies and interventions to reduce alcohol-related harm	24
5.1 Measures to reduce the availability of alcohol	25
5.2 Alcohol price and taxes	26
5.3 Restricting the sale of alcohol	28
5.4 Regulation of the drinking context	29
5.5 Restrictions on alcohol marketing	29
5.6 Drinking-driving countermeasures	30
5.7 Education and persuasion	31
5.8 Early intervention and treatment services	33
5.9 Conclusions on effective strategies to reduce alcohol-related harm	34
6. Making alcohol policy	35
6.1 Building a knowledge base for alcohol policy development	36
6.2 Sectors and alcohol policy	36
6.3 Alcohol policy at different jurisdictional levels	38
6.4 Conclusions with regard to making alcohol policy	39
7. Implications for international action	40
7.1 International aspects of alcohol control	40
7.2 Role of WHO	42

7.3	Collaboration between international bodies	44
7.4	Conclusions concerning implications for international action	45
8.	Recommendations	46
	References	49
	Annex	55
	Summary of WHO data on disease burden attributable to alcohol in 2002
