

# Contents

1. Introduction	1
2. General considerations	2
2.1 Principles governing the safety evaluation of residues of veterinary drugs in food	2
2.2 Modification of the agenda	2
2.3 Evaluation of antimicrobial agents	2
2.3.1 Recommendations for the evaluation of the effects of veterinary drug residues on the human intestinal microflora	3
2.4 Safety of residues at the injection site	8
2.5 General issues relating to MRLs	9
2.5.1 Guidelines for recommending MRLs for minor animal species	9
2.5.2 Considerations for recommending MRLs for fish	10
2.5.3 Guidelines for recommending MRLs for honey and other products from bees	10
2.5.4 Guidelines for recommending MRLs for minor animal species where none exists for major species	10
2.5.5 Expression of numerical MRLs	10
2.5.6 Guidelines for identifying target tissues for residue analysis of food animal products in international trade	10
2.6 Statistical approaches for recommending MRLs	11
2.7 Policies for evaluating residues of veterinary drugs in food	11
2.8 Requirements for validation of analytical methods	12
2.9 Harmonization with the Joint FAO/WHO Meeting on Pesticide Residues of substances used both as veterinary drugs and as pesticides	12
3. Comments on residues of specific veterinary drugs	13
3.1 $\beta$ -Adrenoceptor-blocking agent	13
3.1.1 Carazolol	13
3.2 Anthelmintic agent	15
3.2.1 Doramectin	15
3.3 Antimicrobial agents	20
3.3.1 Dihydrostreptomycin and streptomycin	20
3.3.2 Neomycin	25
3.3.3 Thiamphenicol	28
3.4 Insecticides	37
3.4.1 Deltamethrin	37
3.4.2 Phoxim	46
3.5 Production aids	57
3.5.1 Estradiol-17 $\beta$ , progesterone and testosterone	57
3.5.2 Porcine somatotropins	74
3.6 Tranquillizing agent	85
3.6.1 Azaperone	85
4. Recommendations	86
