

CONTENTS

Articles:

<i>Tomáš Vejchodský</i> : Editorial	103
<i>Iveta Hnětynková, Martin Plešinger, Jana Žáková</i> : Filter factors of truncated TLS regularization with multiple observations	105
<i>Ladislav Lukšan, Jan Vlček</i> : New quasi-Newton method for solving systems of nonlinear equations	121
<i>Miloslav Vlasák</i> : Time discretizations for evolution problems	135
<i>Jiří Hozman, Tomáš Tichý</i> : DG method for numerical pricing of multi-asset Asian options—the case of options with floating strike	171
<i>Roman Knobloch, Jaroslav Mlýnek, Radek Srb</i> : The classic differential evolution algorithm and its convergence properties	197
<i>Yongfeng Wu, Andrew Rosalsky, Andrei Volodin</i> : A correction to “Some mean convergence and complete convergence theorems for sequences of m -linearly negative quadrant dependent random variables”	209
