List of figures	v	4.5 Capacity management	157
List of tables	vii	4.6 IT service continuity management	179
Foreword	viii	4.7 Information security management	196
Preface	ix	4.8 Supplier management	207
Acknowledgements	x	<b>5 Service design technology-related activities</b>	<b>227</b>
<b>1 Introduction</b>	<b>1</b>	5.1 Requirements engineering	229
1.1 Overview	3	5.2 Management of data and information	239
1.2 Context	5	5.3 Management of applications	244
1.3 ITIL in relation to other publications in the Best Management Practice portfolio	7	<b>6 Organizing for service design</b>	<b>251</b>
1.4 Why is ITIL so successful?	9	6.1 Organizational development	253
1.5 Chapter summary	9	6.2 Functions	253
<b>2 Service management as a practice</b>	<b>11</b>	6.3 Roles	256
2.1 Services and service management	13	6.4 Responsibility model – RACI	270
2.2 Basic concepts	20	6.5 Competence and training	270
2.3 Governance and management systems	25	<b>7 Technology considerations</b>	<b>273</b>
2.4 The service lifecycle	28	7.1 Service design tools	275
<b>3 Service design principles</b>	<b>33</b>	7.2 Service management tools	277
3.1 Service design basics	35	<b>8 Implementing service design</b>	<b>281</b>
3.2 Service design goals	44	8.1 Business impact analysis	283
3.3 Balanced design	44	8.2 Service level requirements	283
3.4 Identifying service requirements	45	8.3 Risks to the services and processes	284
3.5 Identifying and documenting business requirements and drivers	47	8.4 Implementing service design	284
3.6 Design activities	48	8.5 Measurement of service design	288
3.7 Design aspects	49	<b>9 Challenges, risks and critical success factors</b>	<b>291</b>
3.8 The subsequent design activities	71	9.1 Challenges	293
3.9 Design constraints	72	9.2 Risks	294
3.10 Service-oriented architecture	73	9.3 Critical success factors and key performance indicators	294
3.11 Service design models	74	<b>Afterword</b>	<b>297</b>
3.12 Service design inputs and outputs	82	<b>Appendix A: The service design package</b>	<b>301</b>
<b>4 Service design processes</b>	<b>83</b>	<b>Appendix B: Service acceptance criteria</b>	<b>307</b>
4.1 Design coordination	86		
4.2 Service catalogue management	97		
4.3 Service level management	106		
4.4 Availability management	125		

<b>Appendix C: Process documentation template</b>	<b>311</b>	<b>Appendix K: Typical contents of a recovery plan</b>	<b>351</b>
C.1 Process framework	313	K.1 Generic recovery plan	353
<b>Appendix D: Design and planning documents and their contents</b>	<b>315</b>	K.2 Supporting information	354
D.1 Design and architectural documents and standards	317	K.3 Recovery procedure	356
D.2 IT plans	317	<b>Appendix L: Procurement documents</b>	<b>357</b>
<b>Appendix E: Environmental architectures and standards</b>	<b>319</b>	<b>Appendix M: Risk assessment and management</b>	<b>361</b>
<b>Appendix F: Sample service level agreement and operational level agreement</b>	<b>325</b>	M.1 Definition of risk and risk management	363
F.1 Sample service level agreement	327	M.2 Management of Risk (M_o_R)	363
F.2 Sample operational level agreement	330	M.3 ISO 31000	364
<b>Appendix G: Service catalogue example</b>	<b>333</b>	M.4 ISO/IEC 27001	365
<b>Appendix H: The service management process maturity framework</b>	<b>337</b>	M.5 Risk IT	366
H.1 Initial (level 1)	339	<b>Appendix N: Related guidance</b>	<b>369</b>
H.2 Repeatable (level 2)	339	N.1 ITIL guidance and web services	371
H.3 Defined (level 3)	340	N.2 Quality management system	371
H.4 Managed (level 4)	341	N.3 Risk management	372
H.5 Optimizing (level 5)	341	N.4 Governance of IT	372
<b>Appendix I: Example of the contents of a statement of requirements and/or invitation to tender</b>	<b>343</b>	N.5 COBIT	372
<b>Appendix J: Typical contents of a capacity plan</b>	<b>347</b>	N.6 ISO/IEC 20000 service management series	373
J.1 Introduction	349	N.7 Environmental management and green/sustainable IT	373
J.2 Management summary	349	N.8 ISO standards and publications for IT	374
J.3 Business scenarios	349	N.9 ITIL and the OSI framework	374
J.4 Scope and terms of reference of the plan	349	N.10 Programme and project management	375
J.5 Methods used	349	N.11 Organizational change	375
J.6 Assumptions made	349	N.12 Skills Framework for the Information Age	376
J.7 Service summary	349	N.13 Carnegie Mellon: CMMI and eSCM framework	376
J.8 Resource summary	350	N.14 Balanced scorecard	376
J.9 Options for service improvement	350	N.15 Six Sigma	377
J.10 Costs forecast	350	<b>Appendix O: Examples of inputs and outputs across the service lifecycle</b>	<b>379</b>
J.11 Recommendations	350	<b>Abbreviations and glossary</b>	<b>383</b>
		<b>Index</b>	<b>429</b>

# List of figures

Figure 1.1	The ITIL service lifecycle	3	Figure 3.14	Design constraints driven by strategy	72
Figure 1.2	ITIL's relationship with other Best Management Practice guides	8	Figure 3.15	External influences on solution design	73
Figure 2.1	Conversation about the definition and meaning of services	14	Figure 4.1	Service design – the big picture	85
Figure 2.2	Logic of value creation through services	18	Figure 4.2	Design coordination activities	90
Figure 2.3	Sources of service management practice	19	Figure 4.3	Types of service in a service catalogue	100
Figure 2.4	Examples of capabilities and resources	21	Figure 4.4	A two-view service catalogue	102
Figure 2.5	Process model	21	Figure 4.5	A three-view service catalogue	103
Figure 2.6	The service portfolio and its contents	24	Figure 4.6	The service level management process	110
Figure 2.7	Architectural layers of an SKMS	26	Figure 4.7	Multi-level SLAs	111
Figure 2.8	Plan-Do-Check-Act cycle	27	Figure 4.8	Availability terms and measurements	130
Figure 2.9	Integration across the service lifecycle	30	Figure 4.9	The availability management process	131
Figure 2.10	Continual service improvement and the service lifecycle	31	Figure 4.10	The expanded incident lifecycle	136
Figure 3.1	The business change process	36	Figure 4.11	The structured approach to SFA	139
Figure 3.2	Scope of service design	37	Figure 4.12	Relationship between levels of availability and overall costs	142
Figure 3.3	The four Ps	40	Figure 4.13	Component failure impact analysis	146
Figure 3.4	Service composition	41	Figure 4.14	Fault tree analysis – example	148
Figure 3.5	The IT steering/strategy group	43	Figure 4.15	Risk assessment and management	149
Figure 3.6	Project elements in a triangulated relationship	45	Figure 4.16	Capacity management sub-processes	162
Figure 3.7	The service relationships and dependencies	46	Figure 4.17	Capacity management overview with sub-processes	163
Figure 3.8	Aligning new services to business requirements	50	Figure 4.18	Capacity must support business requirements	164
Figure 3.9	Enterprise architecture	56	Figure 4.19	Capacity management takes particular note of demand pattern	164
Figure 3.10	Architectural relationships	58	Figure 4.20	Ongoing iterative activities of capacity management	168
Figure 3.11	Integrated business-driven technology management	62	Figure 4.21	Lifecycle of IT service continuity management	181
Figure 3.12	Change management example: change authorization model	67	Figure 4.22	Graphical representation of business impacts	184
Figure 3.13	The metrics tree	70			

Figure 4.23	Elements of an ISMS for managing IT security	199
Figure 4.24	Information security management process	202
Figure 4.25	Security controls for threats and incidents	203
Figure 4.26	Supplier management – roles and interfaces	209
Figure 4.27	Supplier management process	214
Figure 4.28	Supplier categorization	216
Figure 5.1	Requirements – workshop techniques	232
Figure 6.1	Example of a service design organization structure for a small organization	255
Figure 6.2	Example of a service design organization structure for a large organization	256
Figure 7.1	Service management tool evaluation process	279
Figure 8.1	Implementation/continual service improvement approach	285
Figure 8.2	Cultural maturity assessment	286
Figure 8.3	Process maturity framework	287
Figure M.1	The M_o_R framework	364
Figure M.2	ISO 31000 risk management process flow	365
Figure M.3	ISACA Risk IT process framework	367

# List of tables

Table 2.1	The processes described in each core ITIL publication	29	Table G.1	Service catalogue example	339
Table 3.1	Enterprise architecture frameworks	57	Table H.1	PMF level 1: initial	340
Table 3.2	An example of a simple RACI matrix	65	Table H.2	PMF Level 2: repeatable	340
Table 3.3	RACI matrix – sample change management authority matrix based on authorization procedure	68	Table H.3	PMF Level 3: defined	340
Table 3.4	Main sourcing structures (delivery strategies)	75	Table H.4	PMF level 4: managed	341
Table 3.5	Advantages and disadvantages of sourcing structures (delivery strategies)	77	Table H.5	PMF level 5: optimizing	341
Table 3.6	Comparison between conventional ('waterfall') and RAD approaches	80	Table L.1	Procurement documents	359
Table 3.7	Service design inputs and outputs by lifecycle stage	81			
Table 4.1	CSI approach for design coordination implementation	88			
Table 4.2	Examples of risks and threats	186			
Table 4.3	Example set of recovery options	189			
Table 5.1	Requirements engineering – tacit and explicit knowledge	236			
Table 5.2	Requirements engineering: examples of explicit and tacit knowledge	236			
Table 5.3	Requirements template	237			
Table 5.4	Examples of application portfolio attributes	245			
Table A.1	Contents of the service design package	303			
Table B.1	Examples of service acceptance criteria	309			
Table E.1	Building/site	321			
Table E.2	Major equipment room	321			
Table E.3	Major data centres	322			
Table E.4	Regional data centres and major equipment centres	323			
Table E.5	Server or network equipment rooms	324			
Table E.6	Office environments	324
