List of figures	vi	4.2 Incident management	72
List of tables	vii	4.3 Request fulfilment	86
Foreword	viii	4.4 Problem management	97
Preface	ix	4.5 Access management	110
Acknowledgements	x	5 Common service operation activities	119
1 Introduction	1	5.1 Monitoring and control	122
1.1 Overview	3	5.2 IT operations	132
1.2 Context	5	5.3 Server and mainframe management and support	136
1.3 ITIL in relation to other publications in the Best Management Practice portfolio	7	5.4 Network management	137
1.4 Why is ITIL so successful?	9	5.5 Storage and archive	138
1.5 Chapter summary	9	5.6 Database administration	139
2 Service management as a practice	11	5.7 Directory services management	139
2.1 Services and service management	13	5.8 Desktop and mobile device support	140
2.2 Basic concepts	20	5.9 Middleware management	140
2.3 Governance and management systems	25	5.10 Internet/web management	141
2.4 The service lifecycle	28	5.11 Facilities and data centre management	141
3 Service operation principles	33	5.12 Operational activities of processes covered in other lifecycle stages	143
3.1 Service operation fundamentals	35	5.13 Improvement of operational activities	150
3.2 Achieving balance in service operation	39	6 Organizing for service operation	151
3.3 Providing good service	46	6.1 Organizational development	153
3.4 Operation staff involvement in other service lifecycle stages	46	6.2 Functions	153
3.5 Operational health	48	6.3 Service desk function	157
3.6 Communication	49	6.4 Technical management function	170
3.7 Documentation	52	6.5 IT operations management function	175
3.8 Service operation inputs and outputs	52	6.6 Application management function	179
4 Service operation processes	55	6.7 Roles	191
4.1 Event management	58	6.8 Responsibility model – RACI	203
		6.9 Competence and training	204

6.10 Service operation organization structures	205	A.8 ISO standards and publications for IT	248
7 Technology considerations	215	A.9 ITIL and the OSI framework	248
7.1 Generic requirements	217	A.10 Programme and project management	249
7.2 Event management	219	A.11 Organizational change	249
7.3 Incident management	219	A.12 Skills Framework for the Information Age	250
7.4 Request fulfilment	220	A.13 Carnegie Mellon: CMMI and eSCM framework	250
7.5 Problem management	220	A.14 Balanced scorecard	250
7.6 Access management	221	A.15 Six Sigma	251
7.7 Service desk	221		
8 Implementation of service operation	225	Appendix B: Communication in service operation	253
8.1 Managing change in service operation	227	B.1 Routine operational communication	255
8.2 Service operation and project management	227	B.2 Communication between shifts	255
8.3 Assessing and managing risk in service operation	228	B.3 Performance reporting	255
8.4 Operational staff in service design and transition	228	B.4 Communication in projects	257
8.5 Planning and implementing service management technologies	228	B.5 Communication related to changes	258
		B.6 Communication related to exceptions	258
		B.7 Communication related to emergencies	260
9 Challenges, risks and critical success factors	231	B.8 Global communications	262
9.1 Challenges	233	B.9 Communication with users and customers	263
9.2 Critical success factors	235		
9.3 Risks	237	Appendix C: Kepner and Tregoe	265
		C.1 Defining the problem	267
Afterword	239	C.2 Describing the problem	267
		C.3 Establishing possible causes	267
Appendix A: Related guidance	243	C.4 Testing the most probable cause	267
A.1 ITIL guidance and web services	245	C.5 Verifying the true cause	267
A.2 Quality management system	245		
A.3 Risk management	246	Appendix D: Ishikawa diagrams	269
A.4 Governance of IT	246		
A.5 COBIT	246	Appendix E: Considerations for facilities management	273
A.6 ISO/IEC 20000 service management series	247	E.1 Building management	275
A.7 Environmental management and green/sustainable IT	247	E.2 Equipment rooms	275
		E.3 Power management	277

E.4	Environmental conditioning and alert systems	277
E.5	Safety	279
E.6	Physical access control	279
E.7	Shipping and receiving	279
E.8	Involvement in supplier management	279
E.9	Maintenance	280
E.10	Office environments	280
Appendix F: Physical access control		281
Appendix G: Risk assessment and management		287
G.1	Definition of risk and risk management	289
G.2	Management of Risk (M_o_R)	289
G.3	ISO 31000	290
G.4	ISO/IEC 27001	291
G.5	Risk IT	292
Appendix H: Pareto analysis		295
Appendix I: Examples of inputs and outputs across the service lifecycle		299
References and further reading		303
Abbreviations and glossary		307
Index		351

List of figures

Figure 1.1	The ITIL service lifecycle	18
Figure 1.2	ITIL's relationship with other service management frameworks	22
Figure 1.3	Best Management Practices (BMPs) and their relationship with other service management frameworks	26
Figure 2.1	Conversation about a definition of a service and meaning of services and service management	34
Figure 2.2	Logic of value creation through a service	38
Figure 2.3	Sources of service management practice	49
Figure 2.4	Examples of capabilities and resources	51
Figure 2.5	Process model	51
Figure 2.6	The service portfolio and its contents	55
Figure 2.7	Architectural layers of an SKMS	56
Figure 2.8	Plan-Do-Check-Act cycle	57
Figure 2.9	Integration across the service lifecycle	30
Figure 2.10	Continual service improvement and the service lifecycle	31
Figure 3.1	Examples of service requests linked to IT services	36
Figure 3.2	Relationship between a service, service request, request model and request for change	37
Figure 3.3	Achieving a balance between external and internal focus	39
Figure 3.4	Achieving a balance between focus on stability and responsiveness	41
Figure 3.5	Balancing service quality and cost	43
Figure 3.6	Achieving a balance between focus on cost and quality	44
Figure 3.7	Achieving a balance between being too reactive or too proactive	45
Figure 4.1	Relationship between events for physical infrastructure, IT services and business processes	65
Figure 4.2	The event management process	64
Figure 4.3	Incident management process flow	77
Figure 4.4	Multi-level incident categorization	78

List of figures

Figure 1.1	The ITIL service lifecycle	3	Figure 4.5	Example of an incident-matching procedure	81
Figure 1.2	ITIL's relationship with other BestManagement Practice guides	8	Figure 4.6	Request fulfilment process flow	90
Figure 2.1	Conversation about the definition and meaning of services	14	Figure 4.7	Problem management process flow	102
Figure 2.2	Logic of value creation through services	18	Figure 4.8	Examples of data and information in the service knowledge management system	108
Figure 2.3	Sources of service management practice	19	Figure 4.9	Access management process flow	112
Figure 2.4	Examples of capabilities and resources	21	Figure 5.1	Achieving maturity in technology management	121
Figure 2.5	Process model	21	Figure 5.2	The monitor control loop	123
Figure 2.6	The service portfolio and its contents	25	Figure 5.3	Complex monitor control loop	124
Figure 2.7	Architectural layers of an SKMS	26	Figure 5.4	The ITSM monitor control loop	126
Figure 2.8	Plan-Do-Check-Act cycle	27	Figure 6.1	Service operation functions	155
Figure 2.9	Integration across the service lifecycle	30	Figure 6.2	Local service desk	159
Figure 2.10	Continual service improvement and the service lifecycle	31	Figure 6.3	Centralized service desk	160
Figure 3.1	Examples of service requests linked to IT services	36	Figure 6.4	Virtual service desk	161
Figure 3.2	Relationship between a service, service request, request model and request for change	37	Figure 6.5	Application management lifecycle	181
Figure 3.3	Achieving a balance between external and internal focus	39	Figure 6.6	Role of teams in the application management lifecycle	188
Figure 3.4	Achieving a balance between focus on stability and responsiveness	41	Figure 6.7	IT operations organized according to technical specialization (sample)	206
Figure 3.5	Balancing service quality and cost	43	Figure 6.8	A department based on executing a set of activities	208
Figure 3.6	Achieving a balance between focus on cost and quality	44	Figure 6.9	IT operations organized according to geography	210
Figure 3.7	Achieving a balance between being too reactive or too proactive	45	Figure 6.10	Centralized IT operations, technical and application management structure	212
Figure 4.1	Relationship between events for physical infrastructure CIs, services and business processes	62	Figure D.1	Sample of starting an Ishikawa diagram	271
Figure 4.2	The event management process	64	Figure D.2	Sample of a completed Ishikawa diagram	272
Figure 4.3	Incident management process flow	77	Figure G.1	The M_o_R framework	290
Figure 4.4	Multi-level incident categorization	78	Figure G.2	ISO 31000 risk management process flow	291
			Figure G.3	ISACA Risk IT process framework	293
			Figure H.1	Important versus trivial causes	298

List of tables

Table 2.1	The processes described in each core ITIL publication	28	Table B.9	Communication during emergencies	262
Table 3.1	Examples of extreme internal and external focus	40	Table B.10	Global communications	263
Table 3.2	Examples of extreme focus on stability and responsiveness	42	Table B.11	Communication with users and customers	264
Table 3.3	Examples of extreme focus on quality and cost	45	Table F.1	Access control devices	284
Table 3.4	Examples of extremely reactive and proactive behaviour	47	Table H.1	Pareto cause ranking chart	297
Table 3.5	Service operation inputs and outputs by lifecycle stage	53			
Table 4.1	Simple priority coding system	79			
Table 4.2	Problem situations and the most useful techniques for identifying root causes	101			
Table 5.1	Active and passive reactive and proactive monitoring	129			
Table 6.1	Survey techniques and tools	167			
Table 6.2	Application development versus application management	187			
Table 6.3	An example of a simple RACI matrix	204			
Table B.1	Communication requirements in IT services	255			
Table B.2	Communication requirements between shifts	256			
Table B.3	Performance reporting requirements: IT service	256			
Table B.4	Performance reporting requirements: service operation team or department	257			
Table B.5	Performance reporting requirements: infrastructure or process	258			
Table B.6	Project team communications	259			
Table B.7	Communication about changes	260			
Table B.8	Communication during exceptions	261
