List of figures	v	4.6 Change evaluation	175
List of tables	vii	4.7 Knowledge management	181
Foreword	viii	5 Managing people through service transitions	197
Preface	ix	5.1 Managing communications and commitment	199
Acknowledgements	xi	5.2 Managing organization and stakeholder change	203
1 Introduction	1	5.3 Stakeholder management	215
1.1 Overview	3	6 Organizing for service transition	219
1.2 Context	6	6.1 Organizational development	221
1.3 ITIL in relation to other publications in the Best Management Practice portfolio	8	6.2 Functions	221
1.4 Why is ITIL so successful?	10	6.3 Organizational context for transitioning a service	222
1.5 Chapter summary	10	6.4 Roles	223
2 Service management as a practice	13	6.5 Responsibility model – RACI	234
2.1 Services and service management	15	6.6 Competence and training	234
2.2 Basic concepts	22	6.7 Service transition relationship with other lifecycle stages	236
2.3 Governance and management systems	27	7 Technology considerations	239
2.4 The service lifecycle	30	7.1 Knowledge management tools	242
3 Service transition principles	35	7.2 Collaboration	242
3.1 Policies for service transition	37	7.3 Configuration management system	243
3.2 Optimizing service transition performance	45	8 Implementing service transition	245
3.3 Service transition inputs and outputs	46	8.1 Key activities in the introduction of service transition	247
4 Service transition processes	49	8.2 An integrated approach to service transition processes	250
4.1 Transition planning and support	51	8.3 Implementing service transition in a virtual or cloud environment	250
4.2 Change management	60	9 Challenges, critical success factors and risks	253
4.3 Service asset and configuration management	89	9.1 Challenges	255
4.4 Release and deployment management	114	9.2 Critical success factors	255
4.5 Service validation and testing	150		

9.3	Risks	256	C.12	Skills Framework for the Information Age	286
9.4	Service transition under difficult conditions	256	C.13	Carnegie Mellon: CMMI and eSCM framework	286
Afterword		261	C.14	Balanced scorecard	286
Appendix A: Description of asset types		265	C.15	Six Sigma	287
A.1	Management	267	Appendix D: Examples of inputs and outputs across the service lifecycle		
A.2	Organization	267	289		
A.3	Process	267	References and further reading		
A.4	Knowledge	267	293		
A.5	People	268	Abbreviations and glossary		
A.6	Information	268	297		
A.7	Applications	268	Index		
A.8	Infrastructure	268	339		
A.9	Financial capital	269			
Appendix B: Risk assessment and management		271			
B.1	Definition of risk and risk management	273			
B.2	Management of Risk (M_o_R)	273			
B.3	ISO 31000	274			
B.4	ISO/IEC 27001	275			
B.5	Risk IT	276			
Appendix C: Related guidance		279			
C.1	ITIL guidance and web services	281			
C2	Quality management system	281			
C.3	Risk management	282			
C.4	Governance of IT	282			
C.5	COBIT	282			
C.6	ISO/IEC 20000 service management series	283			
C.7	Environmental management and green/sustainable IT	283			
C.8	ISO standards and publications for IT	284			
C.9	ITIL and the OSI framework	284			
C.10	Programme and project management	285			
C.11	Organizational change	285			

List of figures

Figure 1.1	The ITIL service lifecycle	3	Figure 4.8	Example of relationships between the CMS and SKMS	94
Figure 1.2	The scope of service transition	5	Figure 4.9	Example of the application of the architectural layers of the CMS	96
Figure 1.3	ITIL's relationship with other Best Management Practice guides	9	Figure 4.10	The relationship between the definitive media library and the configuration management system	99
Figure 2.1	Conversation about the definition and meaning of services	16	Figure 4.11	Typical service asset and configuration management activity model	101
Figure 2.2	Logic of value creation through services	20	Figure 4.12	Example of a configuration breakdown for an end-user computing service	103
Figure 2.3	Sources of service management practice	21	Figure 4.13	Example of a configuration breakdown for a managed virtual system	103
Figure 2.4	Examples of capabilities and resources	23	Figure 4.14	Example of service lifecycle configuration levels and baseline points	108
Figure 2.5	Process model	23	Figure 4.15	Simplified example of an IT infrastructure	108
Figure 2.6	The service portfolio and its contents	27	Figure 4.16	Example of a configuration item lifecycle	110
Figure 2.7	Architectural layers of an SKMS	28	Figure 4.17	Simplified example of release units for an IT service	116
Figure 2.8	Plan-Do-Check-Act cycle	29	Figure 4.18	Architecture elements to be built and tested	117
Figure 2.9	Integration across the service lifecycle	32	Figure 4.19	Example of a release package	118
Figure 2.10	Continual service improvement and the service lifecycle	33	Figure 4.20	Coordinating the deployment of service components	119
Figure 4.1	Scope of change management and release and deployment management for services	62	Figure 4.21	Options for 'big bang' and phased deployment	120
Figure 4.2	Example of a process flow for a normal change	70	Figure 4.22	Phased deployment across geographical locations	121
Figure 4.3	Example of a process flow for standard deployment request	71	Figure 4.23	Phases of release and deployment management	123
Figure 4.4	Example of a process flow for a standard operational change request	71	Figure 4.24	Example of service testing through service transition	134
Figure 4.5	Example of a change authorization model	78			
Figure 4.6	Interfaces between change management and service asset and configuration management	87			
Figure 4.7	Example of a logical configuration model	93			

Figure 4.25	Example of a set of deployment activities	138	Figure 6.2	Example of service transition organizational structure for a larger organization	222
Figure 4.26	Example of early life support activities	144	Figure 6.3	Example of service transition organization and its interfaces	223
Figure 4.27	Illustration of the benefits of targeted early life support	145	Figure 6.4	Organizational interfaces for a service transition	224
Figure 4.28	Dynamics of a service model	153	Figure 6.5	Flow of experience	236
Figure 4.29	Design constraints driven by strategy	154	Figure 8.1	Steps to improving the service transition processes	247
Figure 4.30	Designing tests to cover a range of service assets, utilities and warranties	162	Figure 8.2	An example of a path through the processes that might be required for a single service transition	251
Figure 4.31	Example of a validation and testing process	169	Figure B.1	The M_o_R framework	274
Figure 4.32	Performing test activities – an example	171	Figure B.2	ISO 31000 risk management process flow	275
Figure 4.33	Change evaluation process flow	177	Figure B.3	ISACA Risk IT process framework	277
Figure 4.34	Context for qualification and validation activities	179			
Figure 4.35	The flow from data to wisdom	184			
Figure 4.36	Relationship of the CMDDB, the CMS and the SKMS	185			
Figure 4.37	Examples of data and information in the service knowledge management system	186			
Figure 4.38	Contribution of knowledge to effectiveness of support staff	195			
Figure 5.1	Example of a communication strategy and plan contents	201			
Figure 5.2	Example of a communication path	202			
Figure 5.3	Example of service transition steps for outsourcing	203			
Figure 5.4	The emotional cycle of change	204			
Figure 5.5	Potential stakeholders	216			
Figure 5.6	Example of a stakeholder map	217			
Figure 5.7	Power impact matrix	217			
Figure 5.8	Example of a commitment planning chart	218			
Figure 6.1	Example of service transition organizational structure for a small organization	222			

List of tables

Table 2.1	The processes described in each core ITIL publication	31	Table 5.4	Organizational role and skills assessment checklist	210
Table 3.1	Service transition inputs and outputs by lifecycle stage	46	Table 5.5	Example of a feedback survey	211
Table 4.1	Example of a responsibility matrix for release points during service transition	53	Table 5.6	Tips for managing change	212
Table 4.2	Extract from a service release policy for a retail organization	55	Table 5.7	J. P. Kotter's 'eight steps to transform your organization'	213
Table 4.3	Example of types of request by service lifecycle stage	66	Table 6.1	An example of a simple RACI matrix	234
Table 4.4	Example of contents of change documentation	72			
Table 4.5	Example of a change impact and risk categorization matrix	75			
Table 4.6	Change priority examples	76			
Table 4.7	Configuration documentation for assets and responsibilities through the service lifecycle	106			
Table 4.8	Levels of configuration for build and testing	125			
Table 4.9	Questions to be answered when planning deployment	128			
Table 4.10	Examples of service test models	157			
Table 4.11	Service requirements, 1: improve user accessibility and usability	158			
Table 4.12	Examples of service management manageability tests	165			
Table 4.13	Key terms that apply to the change evaluation process	176			
Table 4.14	Factors to consider when assessing the effect of a service change	178			
Table 5.1	Job characteristics that motivate people	203			
Table 5.2	Understanding the culture of the parties involved	207			
Table 5.3	Example of a RACI matrix for managing change	209
