

# Contents

Preface.....	5
Nomenclature.....	6
<b>1 Basic Terms and Quantities of Hydromechanics .....</b>	<b>8</b>
1.1 Basic State Variables of Fluid.....	8
1.2 Physical Properties of Fluids.....	9
1.3 Friction Forces in the Fluid Flow.....	11
1.4 Surface Tension of Liquids.....	14
<b>2 Hydrostatics .....</b>	<b>15</b>
2.1 Hydrostatic Balance in the Gravitational Field.....	15
2.2 Hydrostatic Pressure .....	17
2.3 Pressure Measurements.....	18
2.4 Pascal's Law .....	19
2.5 Hydrostatic Forces on Submerged Surfaces .....	20
2.6 Liquid in Linearly Accelerated System .....	25
2.7 Liquid in Rotating System .....	27
2.8 Archimedes' Law, Buoyancy and Stability .....	29
<b>3 Flow of Ideal Fluid .....</b>	<b>31</b>
3.1 Basic Phenomena and Concepts of Fluid Flow .....	31
3.2 Conservation of Mass – Continuity Equation.....	32
3.3 Conservation of Momentum .....	33
3.4 Basic Equations of an Ideal Fluid Flow .....	35
3.5 Practical Applications of an Ideal Fluid Flow .....	36
3.5.1 Discharge through a small outlet .....	36
3.5.2 Discharge through a large opening .....	37
3.5.3 Discharge through a submerged opening.....	39
3.5.4 Venturi tube .....	40
3.5.5 Pitot and Prandtl tubes.....	41
<b>4 Flow Similarity Criteria.....</b>	<b>43</b>
4.1 Laminar Flow.....	43
4.2 Turbulent Flow.....	43
4.3 Theory of Similarity.....	44
4.3.1 Geometric similarity .....	44
4.3.2 Kinematic similarity .....	44
4.3.3 Dynamic similarity .....	45
4.3.4 Overall and partial similarity .....	48
<b>5 Fluid Flow Losses .....</b>	<b>50</b>
5.1 Basic Laws of Flow with Friction Losses.....	50
5.1.1 Conservation of mass: continuity equation.....	50
5.1.2 Conservation of momentum .....	50
5.1.3 Energy conservation .....	52
5.2 Specific Energy Loss Due to Friction.....	52
5.2.1 Straight pipe friction loss.....	52
5.2.2 The Moody diagram .....	53
5.2.3 Local losses.....	57
5.2.4 Local loss coefficients .....	58
5.2.5 Resulting specific energy loss .....	61
5.2.6 Pressure loss, head loss, power loss.....	61

<b>6 Flow with External Energy Supply</b> .....	<b>66</b>
6.1 Basic Laws of Flow with External Energy Supply .....	66
6.1.1 Conservation of mass – continuity equation.....	66
6.1.2 Conservation of momentum.....	66
6.2 Pump Specific Energy.....	68
6.3 Pump Characteristics .....	68
6.4 Pump Operation at Various Speeds .....	71
6.5 Integrating the Pump into Piping System .....	71
6.6 Piping Systems in Series and Parallel.....	75
6.7 Suction Head, Cavitation .....	75
<b>7 Fluid Flow through Orifices, Mouthpieces, and Nozzles</b> .....	<b>78</b>
7.1 Coefficients of Contraction, Velocity, and Discharge .....	78
7.2 Orifices, Mouthpieces, Nozzles .....	79
7.3 Orifice Plates, Nozzles, Venturi Tubes.....	81
<b>8 Momentum and Forces in Fluid Flow</b> .....	<b>85</b>
8.1 Control Surface and Control Volume .....	85
8.2 Linear Momentum Principle .....	85
8.3 Applications of the Momentum Principle.....	87
8.3.1 Jet engine thrust.....	87
8.3.2 Rocket engine thrust .....	88
8.3.3 Force of the jet acting upon a flat plate at rest.....	89
8.3.4 Force of the jet acting upon the curved vane at rest .....	89
8.3.5 Force of the jet acting upon the moving plate .....	89
8.3.6 Power of the water turbine wheel .....	90
8.3.7 Force of the fluid flow through a reducing bend .....	91
<i>English-Czech glossary of basic terms used in hydromechanics</i> .....	93
Literature.....	96
