

ACKNOWLEDGEMENTS	3
ABSTRACT	4
ABSTRAKT	5
Table of Contents	
INTRODUCTION	6
1. THEORITICAL PART:	8
1.1 BIOACTIVE POLYMER SYSTEMS	8
1.1.1 Food and pharmaceutical packaging	8
1.1.2 Introduction to bioactive polymer systems	11
1.1.3 Non-migratory bioactive polymer systems	12
1.1.4 Migratory bioactive polymer systems	16
1.1.5 Biodegradable polymer systems	21
1.1.6 Bioactive agents	26
1.1.7 Applications of bioactive polymer systems	30
1.2 POLYMER BLEND	33
1.2.1 Introduction to polymer blend	33
1.2.2 Compatibilization of polymer blend	39
1.2.3 Controlled morphology	42
AIMS OF WORK	47
2. EXPERIMENTAL PART:	49
2.1 MATERIALS AND SAMPLE PREPARATION	49
2.2 CHARACTERIZATION METHODS	53
Microscopic analysis	53
Mechanical test	54
Thermal analysis	56
Spectroscopic analysis	58
Rheological analysis	59
Release testing	59
Water uptake testing	60
3. RESULTS AND DISCUSSIONS:	61
3.1 Correlation of morphology and viscoelastic properties of the PA6/BioFlex polymeric blends in molten state	61
3.2 The effect of morphological organization on mechanical and thermal properties of the PA6/BioFlex polymeric blends	84
3.3 Time dependent release of model bioactive component from the PA6/BioFlex polymeric blends with various morphology. Effect of bioactive agent into the polymer blends	101
CONCLUSIONS	109
CONTRIBUTIONS TO SCIENCE AND PRACTICE	113
REFERENCES	114
LIST OF FIGURES	124
LIST OF TABLES	125
LIST OF ABBREVIATIONS	127
CURRICULUM VITAE	128
