

## TABLE DES MATIÈRES — CONTENTS

### I.

GACA W.: The durability of hydrotechnical concretes made with some Polish cements	8
PALOTÁS L.: Experimental and theoretical relations between the strength and deformation characteristics of concrete, with special respect to the durability	21
RIESSAUW F.: Etude sur le comportement de fils à haute résistance utilisées comme armature de frettage sous tension d'éléments cylindriques en béton	39
SZEPESI K.: Durability of concrete made with hydraulic admixtures and or artificial aggregates	49
VALENTA O.: The significance of the aggregate-cement bond for the durability of concrete	53

### II.

CAMPUS F.: Essais de résistance des mortiers et bétons à la mer	90
JESSING J., KJAER A., LARSEN G., TRUDSOE E.: Alkali-silica reactions in concrete	103
KOH Y., HATTORI T.: Effects of a coarse aggregate on the durability of concrete	135
KONDO M.: The influence of cement kind and curing conditions on cracking tendency	149
KOSAKA K.: Durability (especially carbonation) test of concrete	159
LHOPITALIER P., RIVES J., STIGLITZ P.: Déteriorations des bétons par actions conjuguées d'eaux sulfatées sodiques et de conditions climatiques particulières	169
LYSE I.: Durability of concrete in sea-water	183
NISHI T., NAGASHIMA H.: Behaviours of pumice concrete when attacked by dilute acid solution and salt solution	193
NISHI T., NAGASHIMA H.: Durability of pumice concrete	201

### III.

ARNI H. T., BLAINE R. L.: Evaluating the freezing-and-thawing durability of concrete by laboratory test in the USA	218
COURCAMBECK P., DUHAUX L., TESSIER A.: Etudes et observations sur la tenue du béton et du béton armé à la mer	233
KUNSZT GY.: Results of preliminary test on frost resistance of steam-cured concrete	249

SHESTOPYOROV S. V.: Durability of concrete and reinforced concrete and its relations for the composition of cement, concrete and construction methods . . . .	267
SHESTOPYOROV S. V.: Frost resistance of reinforced concrete structures . . . . .	283
WESCHE K.: The evaluation of the chemical capacity of resistance of cement and concrete . . . . .	299

IV.

JAMBOR J.: Czechoslovak experience with air-entrained concrete . . . . .	314
JIRSÁK M., KRAUS A.: Durabilité de l'hydrobéton avec cendres volantes . . . . .	323
KOPYCZINSKI B.: Communication sur la durabilité du béton dans un fleuve pollué par les déchets industriels . . . . .	331
NUNES J. M. O., MACHADO E. F. P.: Le béton du barrage de Miranda — Conditionnements de durabilité dans sa composition . . . . .	339
TAYLOR W. H.: Specifications for surface treatment on industrial concrete floors	355
WEST L. H.: The influence of the water demand of aggregates — The durability of concrete . . . . .	365

V.

MUSZYŃSKI W.: Observations on the durability of concrete applied as building material in the food industry . . . . .	378
ZWART J.: Weather exposed pre-cast elements of the early R. B. M. building system observed . . . . .	383
