Preface	ix
1 Introduction	1
1.1 Classification, assignment and dissection	1
1.2 Aims of classification	5
1.3 Stages in a numerical classification	6
1.4 Data sets	10
2 Measures of similarity and dissimilarity	15
2.1 Introduction	15
2.2 Selected measures of similarity and dissimilarity	17
2.3 Some difficulties	23
2.4 Construction of relevant measures	29
3 Partitions	35
3.1 Partitioning criteria	35
3.2 Iterative relocation algorithms	41
3.3 Mathematical programming	49
3.4 Other partitioning algorithms	52
3.5 How many clusters?	60
3.6 Links with statistical models	65
4 Hierarchical classifications	69
4.1 Definitions and representations	69
4.2 Algorithms	75
4.3 Choice of clustering strategy	96
4.4 Consensus trees	100
4.5 More general tree models	106
5 Other clustering procedures	111
5.1 Fuzzy clustering	111
5.2 Constrained classification	115
5.3 Overlapping classification	121

5.4	Conceptual clustering	128
5.5	Classification of symbolic data	136
5.6	Partitions of partitions	142
6	Graphical representations	147
6.1	Introduction	147
6.2	Principal coordinates analysis	149
6.3	Non-metric multidimensional scaling	157
6.4	Interactive graphics and self-organizing maps	167
6.5	Biplots	172
7	Cluster validation and description	183
7.1	Introduction	183
7.2	Cluster validation	185
7.3	Cluster description	204
	References	213
	Author index	242
	Subject index	249
