
Contents

Introduction.....	vii
Contributors	xiii
Chapter 1 First Principles DFT Studies of Metal-Based Biological and Biomimetic Systems	1
<i>Arturo Robertazzi, Alessandra Magistrato, Matteo Dal Peraro, and Paolo Carloni</i>	
Chapter 2 Structural and Thermodynamic Studies of α -Synuclein Proteins Related to Parkinson's Disease: Impact of Aqueous Solution and Fe^{3+} Coordination	29
<i>Olivia M. Wise, Liang Xu, and Orkid Coskuner</i>	
Chapter 3 Carbohydrate and Trivalent Iron Ion Interactions in the Gas Phase and in Aqueous Solution	83
<i>Orkid Coskuner and Carlos A. González</i>	
Chapter 4 Aqueous Solutions of Metal Ions	107
<i>Orkid Coskuner and Thomas C. Allison</i>	
Chapter 5 Structure of Liquid Metal Surfaces: A First Principles Perspective	135
<i>Brent Walker, Nicola Marzari, and Carla Molteni</i>	
Chapter 6 Some Practical Considerations for Density Functional Theory Studies of Chemistry at Metal Surfaces.....	163
<i>Rudolph J. Magyar, Ann E. Mattsson, and Peter A. Schultz</i>	
Chapter 7 Computational Investigations of Metal Oxide Surfaces	201
<i>Emily A. A. Jarvis and Cynthia S. Lo</i>	
Chapter 8 Tight Binding Methods for Metallic Systems	225
<i>Luis Rincón, Thomas C. Allison, and Carlos A. González</i>	

Chapter 9	Density Functional Calculations of Metal Clusters: Structure, Dynamics, and Reactivity	267
	<i>Dennis R. Salahub, Patrizia Calaminici, Gabriel U. Gamboa, Andreas M. Köster, and J. Manuel Vásquez</i>	
Chapter 10	Density Functional Theory Calculations on Cobalt and Platinum Transition Metal Clusters.....	341
	<i>Ali Sebetci</i>	
Chapter 11	Exploring the Borderland between Physics and Chemistry: Theoretical Methods in the Study of Atomic Clusters.....	371
	<i>Yamil Simón-Manso, Carlos A. González, and Patricio Fuentealba</i>
