

Brief Contents

PART I ■ What Are Amphibians and Reptiles?

- CHAPTER 1 ■ Why Study Herpetology? 3
 - CHAPTER 2 ■ Phylogenetic Systematics and the Origins of Amphibians and Reptiles 19
 - CHAPTER 3 ■ Systematics and Diversity of Extant Amphibians 41
 - CHAPTER 4 ■ Systematics and Diversity of Extant Reptiles 107
 - CHAPTER 5 ■ The Biogeography of Amphibians and Reptiles 203
-

PART II ■ How Do They Work?

- CHAPTER 6 ■ Water and Temperature Relations 227
 - CHAPTER 7 ■ Energetics and Performance 259
 - CHAPTER 8 ■ Reproduction and Life Histories of Amphibians 287
 - CHAPTER 9 ■ Reproduction and Life Histories of Reptiles 321
 - CHAPTER 10 ■ Body Support and Locomotion 353
 - CHAPTER 11 ■ Feeding 379
-

PART III ■ What Do They Do?

- CHAPTER 12 ■ Spatial Ecology 409
 - CHAPTER 13 ■ Communication 437
 - CHAPTER 14 ■ Mating Systems and Sexual Selection 475
 - CHAPTER 15 ■ Diets, Foraging, and Interactions with Parasites and Predators 501
 - CHAPTER 16 ■ Populations and Species Assemblages 533
-

PART IV ■ What Are Their Prospects for Survival?

- CHAPTER 17 ■ Conservation and the Future of Amphibians and Reptiles 557
