

# Contents

<b>1 OVERVIEW OF THIS BOOK .....</b>	<b>1</b>
1.1 VOLUMES I AND II .....	1
1.1.1 <i>Volume I</i> .....	1
1.1.2 <i>Volume II</i> .....	1
1.2 WHAT TYPE OF SPATIAL DATA DO WE ANALYSE IN THIS BOOK? .....	1
1.2.1 <i>Areal and lattice data</i> .....	1
1.2.2 <i>Geostatistical data</i> .....	2
1.2.3 <i>Spatial point pattern data</i> .....	3
1.3 OUTLINE OF THIS BOOK .....	3
1.4 PREREQUISITES .....	4
1.5 AVAILABILITY OF R CODE AND DATA .....	4
<b>2 RECOGNISING STATISTICAL DEPENDENCY .....</b>	<b>5</b>
2.1 PSEUDOREPLICATION .....	5
2.2 LINEAR REGRESSION APPLIED TO SPATIAL DATA .....	7
2.2.1 <i>Irish pH data</i> .....	7
2.2.2 <i>Protocol from Zuur et al. (2016)</i> .....	8
2.2.3 <i>Visualisation of the experimental design</i> .....	9
2.2.4 <i>Data exploration</i> .....	9
2.2.5 <i>Dependency</i> .....	12
2.2.6 <i>Statistical model</i> .....	15
2.2.7 <i>Fit the model</i> .....	16
2.2.8 <i>Model validation</i> .....	17
2.3 GAM APPLIED TO TEMPORAL DATA .....	21
2.3.1 <i>Subnivium temperature data</i> .....	21
2.3.2 <i>Sources of dependency</i> .....	22
2.3.3 <i>The model</i> .....	23
2.3.4 <i>Model validation</i> .....	24
2.4 GLMM APPLIED ON HIERARCHICAL AND SPATIAL DATA .....	26
2.5 TECHNICALITIES .....	28
2.5.1 <i>Matrix notation</i> .....	28
2.5.2 <i>How is dependency causing problems?</i> .....	31
2.6 DISCUSSION .....	32
<b>3 TIME SERIES AND GLS .....</b>	<b>33</b>
3.1 OSPREYS .....	33
3.2 COVARIANCE AND CORRELATION COEFFICIENTS .....	33
3.3 LINEAR REGRESSION MODEL .....	35
3.4 FOCUSsing ON THE RESIDUAL COVARIANCE MATRIX .....	35
3.5 DEPENDENCY AND THE COVARIANCE MATRIX .....	36
3.6 GLS: DEALING WITH TEMPORAL DEPENDENCY .....	39
3.6.1 <i>Adelie penguins</i> .....	39
3.6.2 <i>Do we have dependency?</i> .....	40
3.6.3 <i>Formulation of the linear regression model</i> .....	40

---

3.6.4 Application of the linear regression model .....	41
3.6.5 R code for acf and variogram .....	45
3.6.6 Formulation of the GLS model .....	46
3.6.7 Implementation using the gls function .....	50
3.7 MULTIPLE TIME SERIES .....	51
3.8 DISCUSSION .....	53
<b>4 SPATIAL DATA AND GLS .....</b>	<b>55</b>
4.1 VARIOGRAM MODELS FOR SPATIAL DEPENDENCY .....	55
4.2 APPLICATION ON THE IRISH PH DATA .....	57
4.3 MATÉRN CORRELATION FUNCTION .....	59
<b>5 LINEAR MIXED EFFECTS MODELS AND DEPENDENCY .....</b>	<b>61</b>
5.1 WHITE STORKS .....	61
5.2 CONSIDERING THE DATA (WRONGLY) AS ONE-WAY NESTED .....	62
5.3 FITTING THE ONE-WAY NESTED MODEL USING LMER .....	65
5.4 MODEL VALIDATION .....	67
5.5 SKETCHING THE FITTED VALUES .....	68
5.6 CONSIDERING THE DATA (CORRECTLY) AS TWO-WAY NESTED .....	69
5.7 APPLICATIONS TO SPATIAL AND TEMPORAL DATA .....	72
5.8 DIFFERENCE WITH THE AR1 PROCESS APPROACH .....	72
<b>6 MODELLING SPACE EXPLICITLY .....</b>	<b>73</b>
6.1 MODEL FORMULATION .....	73
6.2 COVARIANCE MATRIX OF THE SPATIAL RANDOM EFFECT .....	75
6.3 SPATIAL-TEMPORAL CORRELATION* .....	79
<b>7 INTRODUCTION TO BAYESIAN STATISTICS .....</b>	<b>83</b>
7.1 WHY GO BAYESIAN? .....	83
7.2 GENERAL PROBABILITY RULES .....	84
7.3 THE MEAN OF A DISTRIBUTION* .....	85
7.4 BAYES' THEOREM AGAIN .....	87
7.5 CONJUGATE PRIORS .....	88
7.6 MARKOV CHAIN MONTE CARLO SIMULATION .....	93
7.6.1 Underlying idea .....	93
7.6.2 Installing JAGS and R2jags .....	94
7.6.3 Flowchart for running a model in JAGS .....	94
7.6.4 Preparing the data for JAGS .....	95
7.6.5 JAGS code .....	96
7.6.6 Initial values and parameters to save .....	98
7.6.7 Running JAGS .....	99
7.6.8 Accessing numerical output from JAGS .....	100
7.6.9 Assess mixing .....	100
7.6.10 Posterior information .....	101
7.7 INTEGRATED NESTED LAPLACE APPROXIMATION* .....	103
7.7.1 Joint posterior distribution .....	103
7.7.2 Marginal distributions .....	105
7.7.3 Back to high school .....	107
7.7.4 INLA .....	109

---

7.8 EXAMPLE USING R-INLA .....	110
7.9 DISCUSSION .....	114
<b>8 MULTIPLE LINEAR REGRESSION IN R-INLA.....</b>	<b>115</b>
8.1 INTRODUCTION .....	115
8.2 DATA EXPLORATION .....	116
8.3 MODEL FORMULATION .....	117
8.4 LINEAR REGRESSION RESULTS .....	117
<i>8.4.1 Executing the model in R-INLA</i> .....	117
<i>8.4.2 Output for the betas</i> .....	117
<i>8.4.3 Output for the hyper-parameters</i> .....	119
<i>8.4.4 Fitted model</i> .....	123
8.5 MODEL VALIDATION .....	123
8.6 MODEL SELECTION.....	126
<i>8.6.1 Should we do it?</i> .....	126
<i>8.6.2 Using the DIC</i> .....	126
<i>8.6.3 Out of sample prediction</i> .....	131
<i>8.6.4 Posterior predictive check</i> .....	133
8.7 VISUALISING THE MODEL .....	135
<b>9 MIXED EFFECTS MODELLING IN R-INLA TO ANALYSE OTOLITH DATA .....</b>	<b>139</b>
9.1 OTOLITHS IN PLAICE .....	139
9.2 MODEL FORMULATION .....	140
9.3 DEPENDENCY .....	140
9.4 DATA EXPLORATION .....	141
9.5 RUNNING THE MODEL IN R-INLA .....	143
9.6 MODEL VALIDATION .....	146
9.7 MODEL SELECTION.....	149
9.8 MODEL INTERPRETATION .....	149
<i>9.8.1 Option 1 for prediction: Adding extra data</i> .....	150
<i>9.8.2 Option 2 for prediction: Using the inla.make.lincombs</i> .....	153
<i>9.8.3 Adding extra data or inla.make.lincombs?</i> .....	155
9.9 MULTIPLE RANDOM EFFECTS .....	155
9.10 CHANGING PRIORS OF FIXED PARAMETERS .....	156
9.11 CHANGING PRIORS OF HYPERPARAMETERS .....	158
9.12 SHOULD WE CHANGE PRIORS? .....	164
<b>10 POISSON, NEGATIVE BINOMIAL, BINOMIAL AND GAMMA GLMS IN R-INLA .....</b>	<b>165</b>
10.1 POISSON AND NEGATIVE BINOMIAL GLMs IN R-INLA .....	165
<i>10.1.1 Introduction</i> .....	165
<i>10.1.2 Poisson GLM in R-INLA</i> .....	166
<i>10.1.3 Negative binomial GLM in R-INLA</i> .....	172
<i>10.1.4 Model selection for the NB GLM</i> .....	175
<i>10.1.5 Visualisation of the NB GLM</i> .....	177
10.2 BERNOULLI AND BINOMIAL GLM .....	180
<i>10.2.1 Bernoulli GLM</i> .....	181

---

10.2.2 Model selection with the marginal likelihood .....	184
10.2.3 Binomial GLM.....	185
10.3 GAMMA GLM .....	187
<b>11 MATÉRN CORRELATION AND SPDE.....</b>	<b>191</b>
11.1 CONTINUOUS GAUSSIAN FIELD .....	191
11.2 MODELS THAT WE HAVE IN MIND .....	191
11.3 MATÉRN CORRELATION .....	192
11.4 SPDE APPROACH .....	197
<b>12 LINEAR REGRESSION MODEL WITH SPATIAL DEPENDENCY FOR THE IRISH PH DATA.....</b>	<b>205</b>
12.1 INTRODUCTION .....	205
12.2 MODEL FORMULATION.....	205
12.3 LINEAR REGRESSION RESULTS .....	206
12.4 MODEL VALIDATION .....	207
12.5 ADDING SPATIAL CORRELATION TO THE MODEL .....	208
12.6 DEFINING THE MESH FOR THE IRISH pH DATA .....	212
12.7 DEFINE THE WEIGHT FACTORS $A_{IK}$ .....	216
12.8 DEFINE THE SPDE .....	218
12.9 DEFINE THE SPATIAL FIELD .....	218
12.10 DEFINE THE STACK.....	218
12.11 DEFINE THE FORMULA FOR THE SPATIAL MODEL .....	221
12.12 EXECUTE THE SPATIAL MODEL IN R .....	221
12.13 RESULTS .....	222
12.14 MODEL SELECTION.....	227
12.15 MODEL VALIDATION .....	228
12.16 MODEL INTERPRETATION .....	228
12.17 DETAILED INFORMATION ABOUT THE STACK* .....	232
<i>12.17.1 Stack for the fitted model again.....</i>	232
<i>12.17.2 Stack for the new covariate values .....</i>	234
<i>12.17.3 Combine the two stacks .....</i>	236
<i>12.17.4 Run the model.....</i>	236
<b>13 SPATIAL POISSON MODELS APPLIED TO PLANT DIVERSITY .....</b>	<b>239</b>
13.1 INTRODUCTION .....	239
13.2 DATA EXPLORATION .....	239
<i>13.2.1 Sampling locations .....</i>	239
<i>13.2.2 Outliers .....</i>	241
<i>13.2.3 Collinearity.....</i>	242
<i>13.2.4 Relationships .....</i>	243
<i>13.2.5 Numbers of zeros .....</i>	244
<i>13.2.6 Conclusions data exploration.....</i>	244
13.3 MODEL FORMULATION .....	244
13.4 GLM RESULTS .....	245
13.5 ADDING SPATIAL CORRELATION TO THE MODEL .....	248
<i>13.5.1 Model formulation .....</i>	248

---

13.5.2 Mesh .....	248
13.5.3 Projector matrix .....	253
13.5.4 SPDE .....	254
13.5.5 Spatial field .....	254
13.5.6 Stack .....	254
13.5.7 Formula .....	255
13.5.8 Run R-INLA .....	255
13.5.9 Inspect results .....	256
13.6 SIMULATING FROM THE MODEL .....	262
13.7 WHAT TO WRITE IN A PAPER .....	265
<b>14 TIME-SERIES ANALYSIS IN R-INLA .....</b>	<b>267</b>
14.1 SIMULATION STUDY .....	267
14.2 TRENDS IN MIGRATION DATES OF SOCKEYE SALMON .....	269
14.2.1 Applying a random walk trend model .....	269
14.2.2 Posterior distribution of the sigmas .....	272
14.2.3 Covariates and trends .....	273
14.2.4 Making the trend smoother .....	274
14.3 TRENDS IN POLAR BEAR MOVEMENTS .....	280
14.4 TRENDS IN WHALE STRANDINGS .....	283
14.5 MULTIVARIATE TIME SERIES FOR HAWAIIAN BIRDS .....	285
14.5.1 Importing and preparing the data .....	285
14.5.2 Data exploration .....	286
14.5.3 Model formulation .....	287
14.5.4 Executing the models .....	288
14.5.5 Mixing Poisson and negative binomial distributions .....	295
14.6 AR1 TRENDS .....	297
14.6.1 AR1 trend for regularly spaced time-series data .....	297
14.6.2 AR1 trend for irregularly spaced time-series data .....	299
<b>15 SPATIAL-TEMPORAL MODELS FOR ORANGE CROWNED WARBLERS COUNT DATA .....</b>	<b>307</b>
15.1 INTRODUCTION .....	307
15.2 POISSON GLM .....	308
15.3 MODEL WITH SPATIAL CORRELATION .....	312
15.4 SPATIAL-TEMPORAL CORRELATION: AR1 .....	318
15.4.1 Why do it? .....	318
15.4.2 Explanation of the model .....	318
15.4.4 Simulating a spatial-temporal AR random field .....	320
15.4.5 Implementation of AR1 model in R-INLA .....	323
15.4.6 More detailed information on the code .....	326
15.5 SPATIAL-TEMPORAL CORRELATION: EXCHANGEABLE .....	328
15.6 SPATIAL-TEMPORAL CORRELATION: REPLICATED .....	329
15.7 SIMULATION STUDY .....	330
15.8 DISCUSSION .....	333

<b>16 SPATIAL-TEMPORAL BERNOULLI MODELS FOR CORAL DISEASE DATA .....</b>	<b>335</b>
16.1 INTRODUCTION .....	335
16.2 BERNOULLI MODEL IN R-INLA.....	336
16.3 SPATIAL CORRELATED BERNOULLI MODEL .....	338
16.4 SPATIAL-TEMPORAL CORRELATED BERNOULLI MODEL .....	342
<b>REFERENCES.....</b>	<b>347</b>
<b>INDEX .....</b>	<b>353</b>
<b>OTHER BOOKS .....</b>	<b>357</b>
