List of figures	vii
Preface	xii
Acknowledgements	xv
List of abbreviations	xviii
1 The social sciences in modern research	1
1.1 The scale and diversity of the social sciences	3
1.2 The social sciences and human-dominated systems	14
1.3 Perceptions of 'impact' from the social sciences	22
Conclusions	29
PART I: HOW ACADEMICS ACHIEVE EXTERNAL IMPACTS	31
2 Social scientists' pathways to impacts	35
2.1 The academic impacts of social science researchers	37
2.2 The external impacts of researchers	52
2.3 Profiling different types of academic and their impacts	59
Conclusions	63
3 Modelling the determinants of social science impacts	65
3.1 Multi-variate modelling of impacts	67
3.2 The factors shaping academic impacts	73
3.3 The factors shaping external impacts	78
Conclusions	82
4 Comparing individuals' impact	83
4.1 Using case studies of high impact academics	84
4.2 Explaining high impacts at the individual level	88
4.3 Pulling together the analysis	98
Conclusions	103
PART II: THE DEMAND FOR SOCIAL SCIENCE RESEARCH	105
5 Business and the corporate sector	113
5.1 The range of university links with business	114
5.2 The scale of social science involvement with business	120
5.3 Barriers to greater use of social science research in firms	127
Conclusions	138

THE IMPACT OF THE SOCIAL SCIENCES	
6 Government and public policy making	141
6.1 Social science and the policy arena	142
6.2 The scale of social science links to policy	153
6.3 Social scientists' influence on policy	161
Conclusions	170
7 Civil society organizations and the third sector	173
7.1 Civil society organizations and 'advocacy coalitions'	174
7.2 The scale of social science research links to civil society	182
7.3 Growing the impacts of social science in the third sector	188
Conclusions	202
8 The media and public engagement	207
8.1 Academic expertise and 'the public'	208
8.2 Social scientists and conventional news media	215
8.3 Social science and social media	227
8.4 Innovating with social science in the media	235
Conclusions	240
PART III: PATTERNS OF KNOWLEDGE AND IMPACTS	243
9 The dynamic knowledge inventory and research mediation	247
9.1 The dynamic knowledge inventory	248
9.2 The mediation of social science research	259
Conclusions	269
10 Social science for a digital era	271
10.1 Joining up for a 'broad-front' social science	273
10.2 Re-framing human-centred disciplines and integrating STEM and social sciences	282
10.3 Towards a more global social science	288
Conclusions	292
Glossary	295
Bibliography	299
Index	309
