Combinatorial and Geometric Group Theory
Oleg Bogopolski, Inna Bumagin, Olga Kharlampovich
and Enric Ventura, Editors

This volume assembles several research papers in all areas of geometric and combinatorial group theory originated in the recent conferences in Dortmund and Ottawa-Montreal in 2007. It contains high quality refereed articles developing new aspects of these modern and active fields in mathematics. It is also appropriate for advanced students interested in recent results at a research level.

Contributors:

O. Bogopolski
P. Brinkmann
V. Diekert
A.J. Duncan
E. Frenkel
D. Gonçalves
M. Hock
A. Juhász
O. Kharlampovich
M. Lustig
F. Matucci
P. Morar
A.G. Myasnikov
V.N. Remeslennikov
A. Shevlyakov
D. Savchuk
B. Tsaban
R. Vikentiev
R. Weidmann
P. Wong
R. Zarzycki

Preface vii

O. Bogopolski and R. Vikentiev
Subgroups of Small Index in Aut(F_n) and
Kazhdan's Property (T) 1

P. Brinkmann
Dynamics of Free Group Automorphisms 19

V. Diekert, A.J. Duncan and A.G. Myasnikov
Geodesic Rewriting Systems and Pregroups 55

E. Frenkel, A.G. Myasnikov and V.N. Remeslennikov
Regular Sets and Counting in Free Groups 93

D. Gonçalves and P. Wong
Twisted Conjugacy for Virtually Cyclic Groups and
Crystallographic Groups 119

M. Hock and B. Tsaban
Solving Random Equations in Garside Groups Using
Length Functions 149

A. Juhász
An Application of Word Combinatorics to Decision Problems
in Group Theory 171

O. Kharlampovich and A.G. Myasnikov
Equations and Fully Residually Free Groups 203

M. Lustig
The F_N-action on the Product of the Two Limit Trees
for an Iwip Automorphism 243

F. Matucci
Mather Invariants in Groups of Piecewise-linear
Homeomorphisms 251

P.V. Morar and A.N. Shevlyakov
Algebraic Geometry over the Additive Monoid of Natural Numbers: Systems of Coefficient Free Equations 261

D. Savchuk
Some Graphs Related to Thompson's Group F 279

R. Weidmann
Generating Tuples of Virtually Free Groups 297

R. Zarzycki
Limits of Thompson's Group F 307
