

SHORT COMMUNICATION

- L19** **Geometric contributions to chopper wheel optical attenuation uncertainty**
M Spidell, J Hadler, M Stephens, P Williams and J Lehman

FOCUS ISSUE PAPERS

- S74** **Assessment of CT image quality using a Bayesian approach**
M Reginatto, M Anton and C Elster
- S83** **Traceable calibration and demonstration of a portable dynamic force transfer standard**
Nicholas Vlajic and Ako Chijioke

PAPERS

- 418** **Experimental and theoretical comparison of different optical excitation schemes for a compact coherent population trapping Rb vapor clock**
Z Warren, M S Shahriar, R Tripathi and G S Pati
- 432** **Using a heterodyne vibrometer in combination with pulse excitation for primary calibration of ultrasonic hydrophones in amplitude and phase**
Martin Weber and Volker Wilkens
- 445** **Self-attraction mapping and an update on local gravitational acceleration measurement in BIPM Kibble balance**
Shisong Li, Franck Bielsa, Adrien Kiss and Hao Fang
- 454** **A clearer approach for defining unit systems**
Paul Quincey and Richard J C Brown
- 461** **Stability improvement for coil position locking of joule balance**
Yang Bai, Yongmeng Liu, Yunfeng Lu, Pengcheng Hu, Dawei Wang, Zhengkun Li, Jiubin Tan and Zhonghua Zhang
- 468** **A determination of the Planck constant using the LNE Kibble balance in air**
M Thomas, D Ziane, P Pinot, R Karcher, A Imanaliev, F Pereira Dos Santos, S Merlet, F Piquemal and P Espel
- 481** **Determination of SiO₂ and C layers on a monocrystalline silicon sphere by reference-free x-ray fluorescence analysis**
Philipp Hönicke, Ina Holfelder, Michael Kolbe, Janin Lubeck, Beatrix Pollakowski-Herrmann, Rainer Unterumsberger, Jan Weser and Burkhard Beckhoff
- 487** **Optical simulation of the new PTB sphere interferometer**
Torsten Mai and Arnold Nicolaus
- 494** **A reassessment of absolute energies of the x-ray L lines of lanthanide metals**
J W Fowler, B K Alpert, D A Bennett, W B Doriese, J D Gard, G C Hilton, L T Hudson, Y-I Joe, K M Morgan, G C O'Neil, C D Reintsema, D R Schmidt, D S Swetz, C I Szabo and J N Ullom
- 512** **Volume determination of two spheres of the new ²⁸Si crystal of PTB**
A Nicolaus, G Bartl, A Peter, E Kuhn and T Mai
- 516** **Direct comparison of fractional and integer quantized Hall resistance**
Franz J Ahlers, Martin Götz and Klaus Pierz
- 524** **Method for estimating effects of unknown correlations in spectral irradiance data on uncertainties of spectrally integrated colorimetric quantities**
Petri Kärhä, Anna Vaskuri, Henrik Mäntynen, Nikke Mikkonen and Erkki Ikonen

(Continued on inside back cover)

(Continued from outside back cover)

A re-evaluation of the relativistic redshift on frequency standards at NIST, Boulder, Colorado, USA

Nikolaos K Pavlis and Marc A Weiss

An improved electronic determination of the Boltzmann constant by Johnson noise thermometry

Jifeng Qu, Samuel P Benz, Kevin Coakley, Horst Rogalla, Weston L Tew, Rod White, Kunli Zhou and Zhenyu Zhou

A new analysis for diffraction correction in optical interferometry

G Mana, E Massa, C P Sasso, B Andreas and U Kuetgens

Defining relative humidity in terms of water activity. Part 1: definition

Rainer Feistel and Jeremy W Lovell-Smith

Fisheye camera method for spatial non-uniformity corrections in luminous flux measurements with integrating spheres

Alexander Kokka, Tomi Pulli, Tuomas Poikonen, Janne Askola and Erkki Ikonen

A Bayesian study of uncertainty in ultrasonic flow meters under non-ideal flow conditions

Z Belligoli, R P Dwight, G J P Kok and P Lucas

A new generation of 99.999% enriched ^{28}Si single crystals for the determination of Avogadro's constant

N V Abrosimov, D G Aref'ev, P Becker, H Bettin, A D Bulanov, M F Churbanov, S V Filimonov, V A Gavva, O N Godisov, A V Gusev, T V Kotereva, D Nietzold, M Peters, A M Potapov, H-J Pohl, A Pramann, H Riemann, P-T Scheel, R Stosch, S Wundrack and S Zakel

COMMENT

Comment on 'Development of a primary standard for absorbed dose from unsealed radionuclide solutions'

C K Ross
