

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>	Magma Chambers .....	28	
	Early Perception of Volcanoes and Volcanic Actions .....	1	Zoning in Phenocryst Minerals .....	29	
	Neptunists, Volcanists and Plutonists .....	3	Compositionally Zoned Magma Reservoirs .....	30	
	How and Why Do Volcanoes Work? .....	5	Summary .....	34	
	The Volcano-Magma System .....	6	<b>4</b>	<b>Rheology, Magmatic Gases, Bubbles and Triggering of Eruptions</b>	<b>35</b>
	The Global Framework of Volcanism .....	7		Rheology .....	37
	Nature – Nurture .....	8		Melt Structure .....	38
	How Do Volcanologists Work and Why Do They Work on Volcanoes? .....	9		Viscosity .....	39
	The Impact of Volcanic Activity on the Environment and on Society .....	11		Magmatic Gases .....	42
				Volatile Budget of Kilauea Volcano .....	48
<b>2</b>	<b>Plate Tectonics</b>	<b>2</b>		Formation of Bubbles .....	49
	The Conveyor Belt of the Mid-Ocean Ridges .....	14		Explosive Eruptions .....	50
	The Layered Earth .....	15		External and Internal Forcing Mechanisms or Why Do Volcanoes Erupt? .....	51
	Dynamic Subdivision of the Earth .....	15		Triggering of Volcanic Eruptions .....	52
	Distribution of Volcanoes on the Earth's Surface .....	17		Internal Forcing Mechanisms .....	52
	Hybrid Tectonic Settings .....	18		Internal/External Forcing Mechanisms .....	54
	Summary .....	19		Extrinsic Far Field Lithosphere .....	54
				Atmosphere and Climate .....	55
<b>3</b>	<b>Magma</b>	<b>21</b>		The 864 A.D. and 1707 A.D. Eruptions of Mt. Fuji .....	56
	What Is Magma? .....	21		Classification of Pyroclastic Eruptions .....	56
	Classification of Igneous Rocks .....	21		Summary .....	57
	Where Are Magmas Generated? .....	23	<b>5</b>	<b>Mid-Ocean Ridges</b>	<b>59</b>
	How Are Magmas Generated? .....	24		The Revolution in the Earth Sciences .....	59
	Why Do Magmas Rise? .....	26		Geophysical Studies of the Ocean Crust .....	60
	Magmatic Differentiation .....	26		Ridge Morphology and Tectonics .....	61
	Cooling and Crystallization of Lava Lakes .....	27		Pillow Lavas and Pillow Volcanoes .....	64

Sheet Lavas .....	64	Island Arcs .....	115
Pyroclastic Eruptions in the Deep Sea? .....	66	Convergent Continental Margins .....	117
How Common Are Submarine Eruptions? .....	67	Volcanic Fronts .....	118
The Roots of Mid-Ocean Ridge Magma Chambers .....	67	Subduction Zone Magmas .....	122
Summary .....	69	Source Materials .....	122
		The Role of Water .....	124
		Summary .....	125
<b>6</b> <b>Seamounts and Volcanic Islands</b> .....	<b>71</b>	<b>9</b> <b>Volcanic Edifices and Volcanic Deposits</b> .....	<b>127</b>
Seamounts .....	72	Lava Flows .....	127
Guyots .....	75	Pahoehoe Lava .....	128
Volcanic Islands .....	75	Basalt Columns .....	129
Destructive Stage and Lateral Apron Growth .....	82	Aa Lava .....	131
How Representative Are the Evolutionary Stages of the Hawaiian Islands? .....	83	Block Lava .....	132
Speculations on the Cause of Contrasting Evolution of Oceanic Islands .....	90	Domes .....	132
Large Igneous Provinces and Oceanic Plateaus .....	91	Tephra and Pyroclastic Deposits .....	137
Hot Spots and Mantle Plumes .....	92	Scoria Cones .....	138
Summary .....	96	Stratovolcanoes .....	143
		Flank Collapses, Debris Avalanches and Debris Flows .....	144
		Calderas and Caldera Volcanoes .....	147
		Calderas on Basaltic Volcanoes and the 2000 Eruption of Miyakejima Volcano .....	149
		Ash-Flow Calderas .....	151
		Summary .....	154
<b>7</b> <b>Continental Intraplate Volcanoes</b> .....	<b>97</b>	<b>10</b> <b>Strombolian, Hawaiian and Plinian Eruptions and the Mount St. Helens Eruption 1980</b> .....	<b>155</b>
Rift Zones and Rift Shoulders .....	97	Pyroclastic Fragmentation .....	155
Scoria Cones .....	99	Eruption Columns .....	157
The Quaternary Volcanic Fields of the Eifel .....	101	Strombolian and Hawaiian Eruptions .....	161
The Yellowstone Plume .....	106	Plinian Eruptions .....	163
Flood Basalts .....	107	The Eruption of Mount St. Helens on 18 May 1980 .....	166
Generation of Flood Basalts .....	111	Analysis of the Eruption Dynamics .....	172
Summary .....	111	Summary .....	176
<b>8</b> <b>Subduction Zone Volcanoes</b> .....	<b>113</b>		
Subduction Zones .....	113		
Volcanic Arcs Above Subduction Zones .....	114		

## 11 Pyroclastic Flows, Block and Ash Flows, Surges and the Laacher See Eruption 177

Some Historical Notes .....	180
Terminology .....	184
Ignimbrites .....	187
Pyroclastic Block Flows and Their Deposits .....	193
Origin of Pyroclastic Block Flows .....	195
Surges, Blasts, Umbrella Clouds and Debris Jets .....	196
The Eruption of Laacher See Volcano 12 900 Years Ago .....	198
Summary .....	207

## 12 Fire and Water 209

The Discovery .....	209
Rapid Cooling .....	213
The High Explosivity of Magma–Water Interactions .....	215
Open Water Conditions .....	217
The Initial and Terminal Phases of Eruptions .....	216
Phreatic Eruptions .....	224
Rainwater .....	225
Fire and Ice .....	225
Summary .....	227

## 13 Volcanic Hazards, Volcanic Catastrophes, and Disaster Mitigation 229

Terminology .....	230
Volcanic Hazards .....	230
The Volcano Explosivity Index (VEI) .....	239
Can Volcanic Catastrophes be Avoided? .....	239
Monitoring .....	242
Lessons Learned From Two Large Volcanic Eruptions .....	251

Nevado del Ruiz .....	252
Pinatubo .....	253
Volcanic Eruptions and the Media .....	256
Summary .....	257

## 14 Volcanoes and Climate 259

The Scientific Revolution .....	260
Input of Volcanic Gases into the Atmosphere .....	261
Sulfur .....	262
Formation of the Aerosol Veil: Gas-Particle Conversion .....	263
The Effects of Stratospheric Aerosol Veils on Global and Regional Temperatures and Ozone Depletion .....	264
Which Volcanic Eruptions Load the Atmosphere Most? .....	266
Back <i>For</i> the Future .....	267
The Chicken and the Egg .....	269
Are Mass Extinctions Due to Mega-eruptions? .....	270
Summary .....	271

## 15 Man and Volcanoes: The Benefits 273

Heat From the Interior of the Earth .....	273
Geothermal Energy .....	273
Hot Water Valves on the Ocean Floor and the Formation of Ore Deposits .....	276
Volcanic Soils .....	278
Volcanoes as Source for Raw Materials .....	280
The Attraction of Volcanoes and Volcanic Landscapes .....	282
Summary .....	287
Epilogue .....	289

**16 Physical Units and Abbreviations 291**

**17 Glossary 293**

**18 References 299**

**19 Subject Index 311**

**20 Index of Geographical Names 319**

**21 Index of Names 325**
