Introduction and notation	8
Introduction	8
Notation	9
1 DENSITY	11
Density	11
Limit density	14
Asymptotic density	17
Increasing sequences	18
The sets having no asymptotic density	19
Asymptotic density as Abel's limit	22
Probability on finite sets	24
Uniform density	28
Uniform density as Banach limit	37
Measure density	40
Polyadic integers	43
The function α_p	46
Density zero	48
The product of arithmetic progressions	52
Weight Density	56
Arithmetic progressions, Stolz theorem	57
Logarithmic density	60

	Comparison of weight densities	61
	Darboux property	62
	Benford's law	64
	The set of finite sums	67
	Union of the arithmetic progressions	72
	Direct factors	86
	The values of the additive functions	92
2	UNIFORM DISTRIBUTION	97
	Uniform distribution modulo 1	97
	Generalized uniform distribution	99
	The case of limit density	101
	Uniform distribution in \mathbb{Z}	104
	The case of the measure density	110
	The sequence of Van der Corput	115
	Buck's measurable sequences	119
	Uniform distribution in compact spaces	126
3	RING DENSITY	133
	Ring density	133
4	TOTALLY DISCONNECTED SPACE	141
	Totally disconnected space	141
	Measure density	143
	Construction of measure on Ω	144
	Riemann integral	145
	Uniform distribution	147
	Measurable sequences	152
	Equidensity	152
5	MAPPINGS PRESERVING DENSITY	157
	Mappings preserving density	157

	Lévy group	157
	The mappings preserving "to have density"	161
	The permutations preserving the zero density	164
	Limit density and weight density	167
	Mappings and uniform density	171
	Permutations preserving measure density	174
	Permutations and equidensity	176
	Ergodic property	183
	Measure density to given permutation	187
6	DIVISOR DENSITY	189
	Divisor density	189
	Divisor measure density	191
7	IDEAL AND STATISTICAL CONVERGENCE	199
	Ideal and statistical convergence	199
	Application to Levy group	199
	Statistic limit and limit	201
	Correlation	205
	\mathcal{I}_u - convergence	208
	\mathcal{I}_μ - convergence	208
	Infinite series	209
8	ČECH - STONE COMPACTIFICATION	211
	Čech - Stone compactification	211
	Topology on $\beta\mathbb{N}$	214
	Integral of bounded arithmetic function	216
	The extension of asymptotic density	218
	Bibliography	225
