## **Part I THE SCIENCE OF BODY COMPOSITION RESEARCH** 1

<b>Chapter 1 Study of Body Composition: An Overview</b>	<b>3</b>
Wei Shen, Marie-Pierre St-Onge, ZiMian Wang, and Steven B. Heysmsfield	
History	4
Body Composition Rules and Models	11
Future Directions	13

## **Part II BODY COMPOSITION MEASUREMENT METHODS** 15

<b>Chapter 2 Hydrodensitometry and Air Displacement Plethysmography</b>	<b>17</b>
Scott B. Going	
Body Composition Models	17
Estimation of Body Volume by Underwater Weighing	19
Recommended Procedures for Hydrodensitometry	26
Air Displacement Plethysmography	26
Summary	33
<b>Chapter 3 Hydrometry</b>	<b>35</b>
Dale A. Schoeller	
Total Body Water	35
Intracellular Water and Extracellular Water	46
Summary	49
<b>Chapter 4 Whole-Body Counting and Neutron Activation Analysis</b>	<b>51</b>
Kenneth J. Ellis	
Whole-Body Counting	51
Neutron Activation Analysis	57

<b>Chapter 5</b>	<b>Dual-Energy X-Ray Absorptiometry</b>	<b>63</b>
	Timothy G. Lohman and Zhao Chen	
	History and Development of DXA	63
	Assumptions of DXA and Their Validity	64
	Applicability of DXA	65
	Equipment: Hardware	66
	Equipment: Software	67
	Measurement Procedures	69
	Calibration Procedures	69
	Precision of Total and Regional Composition Estimates	70
	Accuracy of DXA for the Measurement of Fatness	70
	Accuracy of DXA Regional Body Composition Assessments	74
	Estimating Body Composition Changes	74
	Hydration Status As a Confounder in DXA Body Composition Estimates	75
	Application of DXA to Pediatric Populations	75
	DXA Use in Multicomponent Models	76
	Steps Toward Standardization of DXA	76
	Recommended Procedure for DXA Measurements	77
	Summary	77
<b>Chapter 6</b>	<b>Bioelectrical Impedance Analysis</b>	<b>79</b>
	Wm. Cameron Chumlea and Shumei S. Sun	
	Physical Electrical Properties	79
	Bioelectrical Properties	80
	Measuring Impedance	81
	Impedance History	81
	Single- and Multiple-Frequency Impedance	83
	Impedance and Body Composition	86
	Changes in Body Composition	86
	Segmental Bioelectrical Impedance	87
	Impedance and Blood Chemistry	87
	Summary	87
<b>Chapter 7</b>	<b>Computed Tomography and Magnetic Resonance Imaging</b>	<b>89</b>
	Robert Ross and Ian Janssen	
	CT Image Acquisition	89
	MRI Image Acquisition	89
	CT Image Analysis	91
	MRI Image Analysis	91
	Determination of Tissue Volume	92
	CT Measurement of Skeletal Muscle Tissue Quality	93
	CT Measurement of Liver Tissue Quality	94

MRI Measurement of Skeletal Muscle Tissue Quality	94
MRI Measurement of Liver Tissue Quality	95
Validity of Tissue Quantity by CT	95
Validity of Tissue Quantity by MRI	95
Comparison of CT and MRI	96
Applications of CT and MRI on Tissue Quantity and Quality	100
Future Directions	106
Potential of CT and MRI in Large-Scale Studies	108
Summary	108

## **Chapter 8 Anthropometry and Ultrasound** **109**

**Anna Bellisari and Alex F. Roche**

Anthropometry	109
Ultrasound	122
Summary	127

## **Chapter 9 Pediatric Body Composition Methods** **129**

**Aviva Sopher, Wei Shen, and Angelo Pietrobelli**

Multicomponent Models	130
Hydrodensitometry	130
Air Displacement Plethysmography	131
Dilution Methods	133
Whole-Body Counting	133
Electrical Methods	134
Dual-Energy X-Ray Absorptiometry	134
Imaging Methods	136
Anthropometry	136
Summary	139

## **Chapter 10 Animal Body Composition Methods** **141**

**Maria S. Johnson and Tim R. Nagy**

Carcass Analysis	141
Total Body Electrical Conductivity (TOBEC)	143
Total Body Water by Isotope Dilution	145
Dual-Energy X-Ray Absorptiometry (DXA)	146
Computed Tomography (CT)	147
Magnetic Resonance Spectroscopy (MRS)	148
Magnetic Resonance Imaging (MRI)	149
Summary	150

## **Chapter 11 Statistical Methods** **151**

**Shumei S. Sun and Wm. Cameron Chumlea**

Accuracy of Predictive Equations	151
Validity of the Response Variable	152

Precision of the Predictor Variables	152
Relationships Between Predictor Variables and Response Variables	152
Statistical Methods	153
Size and Nature of the Sample	155
Published Predictive Equations	156
Summary	159

## **Part III BODY COMPOSITION MODELS AND COMPONENTS** **161**

### **Chapter 12 Multicomponent Molecular-Level Models of Body Composition Analysis** **163**

ZiMian Wang, Wei Shen, Robert T. Withers, and Steven B. Heymsfield

General Concepts of Molecular-Level Body Composition Methods	163
Three-, Four-, and Six-Component Hydrodensitometry Methods	165
Four- and Six-Component Neutron Activation Methods	170
Six-Component Total Body Carbon Method	173
Multicomponent Total Body Protein Method	174
Summary	175

### **Chapter 13 Measuring Adiposity and Fat Distribution in Relation to Health** **177**

Luís B. Sardinha and Pedro J. Teixeira

Total Body Fatness	177
Fat Distribution	189 <i>WHR</i>
Summary	201

### **Chapter 14 Assessing Muscle Mass** **203**

Henry C. Lukaski

Anthropometric Indicators of Muscle Mass	203
Muscle Metabolites	206
Radiographic Methods	209
Nuclear Techniques	213
Bioelectrical Impedance Analysis	215
High-Frequency Energy Absorption (HFEA)	217
Summary	217

### **Chapter 15 Body Composition, Organ Mass, and Resting Energy Expenditure** **219**

Dympna Gallagher and Marinos Elia

Measurement of REE	220
Quantifying Specific Organ and Tissue Masses	220

- Specific Metabolic Rates of Organs and Tissues 228  
 Modeling REE 228  
 REE and Organ Metabolic Rates During the Life Span 229  
 REE: Race and Ethnicity 235  
 REE in Disease 236  
 Ongoing Efforts in the Measurement of Tissue-Specific Metabolic Rates 238  
 Summary 239

## **Part IV BODY COMPOSITION AND BIOLOGICAL INFLUENCES 241**

### **Chapter 16 Genetic Influences on Human Body Composition 243**

Peter Katzmarzyk and Claude Bouchard

- Basic Concepts 243  
 Methods 244  
 Genetics and Body Fat Content 247  
 Genetics and Fat Topography 251  
 Genetic Pleiotropy and Body Fat Phenotypes 254  
 Genetics and Skeletal Muscle Phenotypes 255  
 Summary 257

### **Chapter 17 Age 259**

Richard N. Baumgartner

- Fat Mass 260  
 Fat Distribution 261  
 Fat-Free Mass 263  
 Summary 268

### **Chapter 18 Variation in Body Composition Associated With Sex and Ethnicity 271**

Robert M. Malina

- Reference Values 272  
 Total Body Composition 276  
 Adipose Tissue Distribution 284  
 Bone As a Component of Body Composition 289  
 Skeletal Muscle 294  
 Summary 297

### **Chapter 19 Pregnancy 299**

Sally Ann Lederman

- Why Measure Pregnancy Body Composition? 299  
 Measuring Body Composition Changes During Pregnancy 300  
 Advances of the Field 301

<b>Chapter 20</b>	<b>Exercise</b>	<b>313</b>
	Daniel P. Williams, Pedro J. Teixeira, and Scott B. Going	
	Body Weight 314	
	Whole-Body Fat 315	
	Visceral Adipose Tissue 323	
	Fat-Free Mass, Lean Soft Tissue, and Skeletal Muscle 324	
	Bone 326	
	Summary 330	
<b>Chapter 21</b>	<b>Hormonal Influences on Human Body Composition</b>	<b>331</b>
	Marie-Pierre St-Onge and Per Bjorntorp	
	Hormonal Effects Through the Life Cycle 331	
	Effects of Glucocorticoids 334	
	Interactions Between Hormones 337	
	Effects of Adipocyte-Derived Hormones 337	
	Regulation of Energy Exchange 339	
	Summary 339	
<b>Part V</b>	<b>BODY COMPOSITION AND PATHOLOGICAL STATES</b>	<b>341</b>
<b>Chapter 22</b>	<b>Morbidity and Mortality Associations</b>	<b>343</b>
	Jacob C. Seidell	
	Anthropometric Measures in Relation to Morbidity and Mortality: Methodological Issues 343	
	Anthropometry, Body Composition, and Mortality 344	
	Body Composition and Aging: Implications for Morbidity and Mortality 347	
	Effect of Age on the Association Between Weight Change and Health 349	
	Effect of Age on the Association Between Fat Distribution and Health 349	
	Summary 350	
<b>Chapter 23</b>	<b>Body Composition and Cancer</b>	<b>351</b>
	Zhao Chen	
	Body Composition and Cancer Risk 351	
	Body Composition and Cancer Treatment 358	
	Cancer-Related Wasting 362	
	Other Applications of Body Composition Assessments in Cancer Research 362	
	Summary 363	
<b>Chapter 24</b>	<b>Obesity and Diabetes: Body Composition Determinants of Insulin Resistance</b>	<b>365</b>
	Bret H. Goodpaster and David E. Kelley	
	Body Mass Index, Waist Circumference, and IR in Type 2 DM and Obesity 365	
	Fat-Free Mass and IR in Type 2 DM and Obesity 366	

Abdominal Adiposity: Visceral and Subcutaneous Adipose Tissue in Type 2 DM	367
Lower-Extremity Adipose Tissue	370
Skeletal Muscle Fat Content	370
Hepatic Steatosis and IR in Obesity and Type 2 DM	373
Effects of Weight Loss on Body Composition and IR	374
Summary	375

## **Chapter 25 Body Composition Studies in People With HIV 377**

**Donald P. Kotler and Ellen S. Engelson**

Early Studies (1981-1983)	377
Body Composition Assessment	378
Cross-Sectional Studies	378
Studies of Pathogenic Mechanisms	379
Nutritional Status and Clinical Outcomes	380
Longitudinal Studies	381
Studies of Nutritional Therapies	382
HIV-Associated Lipodystrophy	385
Pseudotruncal Obesity	386
Treatment of Fat Redistribution	386
Switch Studies	386
Summary	387

## **Chapter 26 Inflammatory Diseases and Body Composition 389**

**Ian Janssen and Ronenn Roubenoff**

Influence of Metabolic Imbalances on Body Composition	389
Influence of Immune Mediators on Metabolism	389
Usefulness of Body Composition As a Measure of Chronic Disease Status	390
Inflammatory Diseases and Body Composition in Adults	390
Inflammatory Diseases and Body Composition in Children and Adolescents	397
Summary	400

Appendix: Reference Body Composition Tables 401

Abbreviations 411
