

Table of Contents

	<i>Contributors</i>	<i>iii</i>
	<i>Foreword</i>	<i>v</i>
	<i>Preface to the Student</i>	<i>vii</i>
	<i>Acknowledgments</i>	<i>ix</i>
SECTION ONE: Asking Questions	1	
PHOTO ESSAY: Some Events in the North Atlantic		3
ON YOUR OWN: Observing Change		4
The Earth Sciences		5
PHOTO ESSAY: The Earth Sciences		6
INVESTIGATION 1.1: Analyzing a Sample of the Earth		9
Scientific Language		11
Some Properties of Models		11
Other Meanings		12
SECTION TWO: Gathering Evidence	17	
Where Are You?		18
INVESTIGATION 2.1: The Gnomon		20
About Angles and Directions		24
INVESTIGATION 2.2: Determining Angles and Directions		25
INVESTIGATION 2.3: Interpreting a Shadow Line		28
ON YOUR OWN: Gathering More Evidence		31
Up and Down		32

INVESTIGATION 2.4: An Indoor Gnomon	34
INVESTIGATION 2.5: The Length of Days	38
INVESTIGATION 2.6: Indoor Gnomon—Axis Tilted	42
ON YOUR OWN: Does the Earth's Axis Tilt?	43
INVESTIGATION 2.7: The Northern Sky	44
Hints for Observing Stars	49
ON YOUR OWN: Stargazing	49

SECTION THREE: Testing Models 51

Comparing Models	52
TEACHER DEMONSTRATION: Models of Tilting	52
INVESTIGATION 3.1: The Strength of a Model	55
ON YOUR OWN: Watching the Big Dipper	57
Relative Motion	58
INVESTIGATION 3.2: Choosing a Model	60
An Argument for Motion of the Earth	63
ON YOUR OWN: Observing Meteor Showers	65
Changing Models of the Moon	66
ON YOUR OWN: Gnomon Records of the Moon	68
Summary and Direction	69

SECTION FOUR: Where You Are 71

Establishing a Reference System	72
Latitude	72
Longitude	74
INVESTIGATION 4.1: Determining Your Latitude	76
Longitude and Time Zones	81
Varying Noon	82
Changing Speed (<i>Optional</i>)	84

INVESTIGATION 4.2: Finding Your Longitude	86
ON YOUR OWN: Correcting Time	87
Where You Are—the Milky Way	88
PHOTO ESSAY: Galaxies	90

SECTION FIVE: Describing Things with Numbers 93

INVESTIGATION 5.1: Estimating Distances	95
INVESTIGATION 5.2: Measuring Distance Directly	97
ON YOUR OWN: Comparing English and Metric Units	98
INVESTIGATION 5.3: Measuring Distance Indirectly	99
INVESTIGATION 5.4: Measuring Volume	102
Density	104
INVESTIGATION 5.5: Measuring Density with a Balance	105
INVESTIGATION 5.6: Measuring Density without a Balance	106

SECTION SIX: Some Properties of Water 109

INVESTIGATION 6.1: The Hydrometer	111
INVESTIGATION 6.2: Density and Salinity	113
INVESTIGATION 6.3: Density and Temperature	114
INVESTIGATION 6.4: An Effect of Boiling	116
ON YOUR OWN: Testing an Answer	117
The Salt Sea	118
Circulation in the Oceans	119
INVESTIGATION 6.5: Gases Dissolved in Water	125
ON YOUR OWN: Carbon Dioxide and Water Plants	126
Gases and Water Quality	127
INVESTIGATION 6.6: Probing the Depths	130
Ocean Sounding	134
Echo Sounding	135

SECTION SEVEN: The Changing Atmosphere	139
Weather Modification	140
INVESTIGATION 7.1: Air Temperature	141
ON YOUR OWN: Changing Air Temperatures	143
INVESTIGATION 7.2: Wind Direction	144
Making More Observations	145
PHOTO ESSAY: Weather Forecasting	146
INVESTIGATION 7.3: An Effect of Heating	149
INVESTIGATION 7.4: Heating Land and Water	151
INVESTIGATION 7.5: An Effect of Cooling (<i>Optional</i>)	154
INVESTIGATION 7.6: Measuring Relative Humidity	155
INVESTIGATION 7.7: Finding the Dew Point	159
INVESTIGATION 7.8: Forming Clouds	161
ON YOUR OWN: Testing Another Method	162
PHOTO ESSAY: Tracing a Storm	163
Nuclei	164
INVESTIGATION 7.9: Dust in the Atmosphere (<i>Optional</i>)	165
More about Clouds	167
PHOTO ESSAY: Some Cloud Types	168
INVESTIGATION 7.10: Analyzing Records	171
ON YOUR OWN: Predicting Weather Changes	173
INVESTIGATION 7.11: Heating the Earth	174
INVESTIGATION 7.12: An Effect of Rotation	176
ON YOUR OWN: Visiting a Merry-Go-Round	177
Coriolis Effect	178
General Circulation of the Atmosphere	180
ON YOUR OWN: Testing a Model Again	182
Air Masses and Fronts	183

ON YOUR OWN: Frontal Movement	185
Crossing Boundaries	186

SECTION EIGHT: Time and Change 189

INVESTIGATION 8.1: Constructing a Model for Time	190
ON YOUR OWN: Time and Change	193
Fossils—a Record of the Past	194
Then and Now	197
A Time Scale for the Earth	199
INVESTIGATION 8.2: Fossils on the Time Scale	201
ON YOUR OWN: Dating Organisms	205
Life on the Earth	206
Changing Life-Forms	214
ON YOUR OWN: Counting Offspring	216
INVESTIGATION 8.3: Comparing Replicas of Two Fossil Samples	217
Camels	220
Calculating Rates of Change	224
Ancient Climates	227
Air Contamination and Temperature	232
Looking Ahead	235

SECTION NINE: Observing the Landscape, I 237

INVESTIGATION 9.1: Water-Level Changes	238
ON YOUR OWN: More Water-Level Changes	240
INVESTIGATION 9.2: Water Level and Shorelines	241
ON YOUR OWN: More Evidence for Water-Level Changes	244
Volcanoes	245

ON YOUR OWN: Report on Volcanic Eruptions	247
INVESTIGATION 9.3: Studying Some Common Minerals	248
INVESTIGATION 9.4: Crystals and Bubbles	250
INVESTIGATION 9.5: The Textures of Solids	252
ON YOUR OWN: Forming Crystals	253
INVESTIGATION 9.6: Volcanic Rocks	254
ON YOUR OWN: Density of Volcanic Rocks	255
INVESTIGATION 9.7: The Mouth of a River	256
ON YOUR OWN: The Effect of Rivers on Landscape	257
INVESTIGATION 9.8: Sedimentary Rocks	258
PHOTO ESSAY: Faulting	260
Earth-Building Processes	262

SECTION TEN: Observing the Landscape, II 263

Weathering and Soil	264
ON YOUR OWN: Weathering	265
PHOTO ESSAY: Cleopatra's Needle	266
INVESTIGATION 10.1: Two Properties of Soils	267
ON YOUR OWN: Testing Other Soils	270
INVESTIGATION 10.2: Examination of Soil Particles	271
ON YOUR OWN: Soils at Different Depths and Locations	272
INVESTIGATION 10.3: Defining a Problem	273
Water—the Great Mover	275
Meandering and Braiding	277
INVESTIGATION 10.4: Random Flow	280
Temporary Streams	283
Folding: Anticlines and Synclines	284
INVESTIGATION 10.5: Plutonic Igneous Rocks	286
INVESTIGATION 10.6: Metamorphic Rocks	287

INVESTIGATION 10.7: Freezing Water	288
ON YOUR OWN: Pressure on Ice	289
The Work of Ice	290

SECTION ELEVEN: Seeking Larger Patterns 297

Large-Scale Features of the Earth	298
INVESTIGATION 11.1: A Continental Jigsaw Puzzle	299
INVESTIGATION 11.2: Floating Blocks	302
ON YOUR OWN: Density and Floating	304
A Model for the Earth's Crust	305
Other Evidence of a Crust	309
INVESTIGATION 11.3: Studying Waves	312
An S-Wave Machine	312
A P-Wave Machine	313
Earthquakes	316
ON YOUR OWN: Earthquake Problems	321
Paleomagnetism	322
INVESTIGATION 11.4: Paleomagnetism of a Rock	324
INVESTIGATION 11.5: An Unusual Substance	327
Sea-Floor Spreading	329
Plates	336
ON YOUR OWN: A Diagram of Earth	341
The Future of Drift	342

SECTION TWELVE: Searching the Universe 343

Some Tools of Astronomy	344
ON YOUR OWN: Stonehenge—Its Meaning	346
INVESTIGATION 12.1: Observing Pathways of Light	347
INVESTIGATION 12.2: Constructing a Telescope	350

ON YOUR OWN: Another Telescope	351
PHOTO ESSAY: Telescopes	352
INVESTIGATION 12.3: Building a Reflecting Telescope (<i>Optional</i>)	354
INVESTIGATION 12.4: Building a Spectroscope	356
The Spectroscope	358
INVESTIGATION 12.5: Heating an Object	359
ON YOUR OWN: Observing Stars	360
Some Characteristics of Stars	361
Sizes of Stars	361
The Formation of the Solar System	364
PHOTO ESSAY: Nebulas	368
A Mathematical Search	370
Communication	372
Travel	373
 APPENDIX	
A: Star Chart	374
B: Star Observations	376
C: Conversion Tables: Units of Measurement	382
 INDEX	 385
