CONTRIBUTORS	xi
FOREWORD	xiii
PREFACE	xv
1	
Structure in Archaeological Data: Nominal Variables	1
ALBERT C. SPAULDING	
2	
Some Aspects of Archaeological Classification	21
F. R. HODSON	
3	
Clusters of Objects and Associations between Variables: Two Approaches to Archaeological Classification	30
GEORGE L. COWGILL	
Introduction	30
Object Clustering	31
Associations between Variables	36
	vii

Assemblages Described Wholly in Terms of Nominal Variables	38
Assemblages Whose Description Includes at Least One Interval or Ordinal-Scale Variable	48
When Is It Advisable to Transform Ordinal or Interval Variables into Nominal Variables?	53
References	55
4	
Toward a Theory of Archaeological Classification	56
DWIGHT W. READ	
The Classification Problem	57
Artifact Classes as Units	61
Artifacts and Types	62
Methodology	64
Analysis of Scottsbluff Points	79
Paradigmatic Classes and Structure	86
Conclusion	89
References	91
5	
Mambrino's Helmet: A Framework for Structuring Archaeological Data	93
A. VOORRIPS	
Introduction	93
Epistemological and Philosophical Assumptions	95
Data Structuring Concepts: Definitions and Interrelationships	99
Some Currently Used Methods	117
Final Remarks	123
References	124
6	
Variables and Dimensions: The Critical Step in Quantitative Typology	127
ROBERT WHALLON	
7	
Typology, Classification, and Theory Building	162
ROBERT K. VIERRA	
Systemics and Archaeological Classification	162
Recent Approaches to Typology and Theory	164

Theory Building and Typology	166
An Example	168
Summary	173
References	174

Contributors

8	
On the Structure of Artifact Typologies	176

JAMES A. BROWN

The Typological Concept	177
Types of Artifact Types	179
Functional and Stylistic Types	181
Automatic Classification	183
Methodological Issues and Problems	185
Conclusion	187
References	187
