

# CONTENTS

<b>Preface</b>	<b>xiii</b>
<b>Contributors</b>	<b>xv</b>
<b>1 Foodomics: Principles and Applications</b>	<b>1</b>
<i>Alejandro Cifuentes</i>	
1.1 Introduction to Foodomics	1
1.2 Foodomics Applications: Challenges, Advantages, and Drawbacks	6
1.3 Foodomics, Systems Biology, and Future Trends	11
Acknowledgments	12
References	12
<b>2 Next Generation Instruments and Methods for Proteomics</b>	<b>15</b>
<i>María del Carmen Mena and Juan Pablo Albar</i>	
2.1 Introduction	15
2.2 Emerging Methods in Proteomics	19
2.3 The Move from Shotgun to Targeted Proteomics Approaches	34
2.4 New Instrumental Methods for Proteomics	40
2.5 Bioinformatics Tools	49
References	55

<b>3</b>	<b>Proteomic-Based Techniques for the Characterization of Food Allergens</b>	<b>69</b>
	<i>Gianluca Picariello, Gianfranco Mamone, Francesco Addeo, Chiara Nitride, and Pasquale Ferranti</i>	
3.1	Introduction: What is Food Allergy?	69
3.2	Food Allergy: Features and Boundaries of the Disease	70
3.3	Immunopathology of Food Allergy and Role of Proteomics	71
3.4	Identification of Food Allergy Epitopes	73
3.5	Expression Proteomics and Functional Proteomics in Food Allergy	81
3.6	Identification of Allergens in Transformed Products	85
3.7	Concluding Remarks	90
	References	91
<b>4</b>	<b>Examination of the Efficacy of Antioxidant Food Supplements Using Advanced Proteomics Methods</b>	<b>101</b>
	<i>Ashraf G. Madian, Elsa M. Janle, and Fred E. Regnier</i>	
4.1	Introduction	101
4.2	Methods for Studying the Efficacy of Antioxidants	102
4.3	Strategies Used for Proteomic Analysis of Carbonylated Proteins and the Impact of Antioxidants	106
4.4	Studying Oxidation Mechanisms	107
4.5	Quantification of Carbonylation Sites	111
4.6	Biomedical Consequence of Protein Oxidation and the Impact of Antioxidants	112
4.7	Redox Proteomics and Testing the Efficacy of Antioxidants	113
	References	117
<b>5</b>	<b>Proteomics in Food Science</b>	<b>125</b>
	<i>José M. Gallardo, Mónica Carrera, and Ignacio Ortea</i>	
5.1	Proteomics	125
5.2	Applications in Food Science	132
5.3	Species Identification and Geographic Origin	132
5.4	Detection and Identification of Spoilage and Pathogenic Microorganisms	140
5.5	Changes During Food Storage and Processing and Their Relationship to Quality	144
5.6	Proteomics Data Integration to Explore Food Metabolic Pathways and Physiological Activity of Food Components	149
5.7	Nutriproteomics	150
5.8	Final Considerations and Future Trends	151
	References	152

<b>6</b>	<b>Proteomics in Nutritional Systems Biology: Defining Health</b>	<b>167</b>
	<i>Martin Kussmann and Laurent Fay</i>	
6.1	Introduction	167
6.2	From Food Proteins to Nutriproteomics	171
6.3	Nutritional Peptide and Protein Bioactives	172
6.4	Nutritional Peptide and Protein Biomarkers	174
6.5	Ecosystem-Level Understanding of Nutritional Host Health	178
6.6	Conclusions and Perspectives	181
	References	182
<b>7</b>	<b>MS-Based Methodologies for Transgenic Foods Development and Characterization</b>	<b>191</b>
	<i>Alberto Valdés and Virginia García-Cañas</i>	
7.1	Introduction	191
7.2	Controversial Safety Aspects and Legislation on GMOs	192
7.3	Analysis of GMOs: Targeted Procedures and Profiling Methodologies	193
7.4	Conclusions and Future Outlook	212
	Acknowledgments	212
	References	212
<b>8</b>	<b>MS-Based Methodologies to Study the Microbial Metabolome</b>	<b>221</b>
	<i>Wendy R. Russell and Sylvia H. Duncan</i>	
8.1	Introduction	221
8.2	The Gut Microbiota and Their Role in Metabolism	222
8.3	Metagenomics	224
8.4	Metabolomics	225
8.5	Microbial Metabolites in the Human Gut	226
8.6	Analysis of the Microbial Metabolome	229
8.7	Implications for Human Health and Disease	232
8.8	Summary	235
	Acknowledgments	235
	References	235
<b>9</b>	<b>MS-Based Metabolomics in Nutrition and Health Research</b>	<b>245</b>
	<i>Clara Ibáñez and Carolina Simó</i>	
9.1	Introduction	245
9.2	MS-Based Metabolomics Workflow	246
9.3	Metabolomics in Nutrition-Related Studies	253
9.4	Diet/Nutrition and Disease: Metabolomics Applications	259
9.5	Other Applications in Nutritional Metabolomics	261
9.6	Integration with Other “Omics”	262
9.7	Concluding Remarks	263

Acknowledgments	264
References	264
<b>10 Shaping the Future of Personalized Nutrition with Metabolomics</b>	<b>271</b>
<i>Max Scherer, Alastair Ross, Sofia Moco, Sebastiano Collino, François-Pierre Martin, Jean-Philippe Godin, Peter Kastenmayer, and Serge Rezzi</i>	
10.1 Introduction	271
10.2 Metabolomics Technologies	272
10.3 Personalized Nutrition	278
10.4 Conclusion	291
References	292
<b>11 How Does Foodomics Impact Optimal Nutrition?</b>	<b>303</b>
<i>Anna Arola-Arnal, Josep M. del Bas, Antoni Caimari, Anna Crescenti, Francesc Puiggròs, Manuel Suárez, and Lluís Arola</i>	
11.1 Introduction	303
11.2 Nutrigenomics	310
11.3 Nutrigenetics and Personalized Nutrition	323
11.4 The Added Value of Foodomics for the Food Industry	329
11.5 Concluding Remarks	337
References	337
<b>12 Lipidomics</b>	<b>351</b>
<i>Isabel Bondia-Pons and Tuulia Hyötyläinen</i>	
12.1 Definition and Analytical Challenges in Lipidomics	351
12.2 Lipidomics in Nutrition and Health Research	360
12.3 Lipidomics and Food Science	368
12.4 Future Perspectives	371
References	372
<b>13 Foodomics Study of Micronutrients: The Case of Folates</b>	<b>381</b>
<i>Susan J. Duthie</i>	
13.1 Folates in the Diet	381
13.2 Folate and Human Health	383
13.3 Measuring Folates in Human Biomonitoring	385
13.4 Folate and Colon Cancer: Establishing Mechanisms of Genomic Instability Using a Combined Proteomic and Functional Approach	387
13.5 Folate Deficiency and Abnormal DNA Methylation: A Common Mechanism Linking Cancer and Atherosclerosis	394
13.6 Summary	397
Acknowledgments	399
References	399

<b>14</b>	<b>Metabolomics Markers in Acute and Endurance/Resistance Physical Activity: Effect of the Diet</b>	<b>405</b>
	<i>Sonia Medina, Débora Villaño, José Ignacio Gil, Cristina García-Viguera, Federico Ferreres, and Angel Gil-Izquierdo</i>	
14.1	Introduction	405
14.2	Metabolomics Consequences of Physical Activity: Metabolites and Physiological Pathways Affected	407
14.3	Metabolomics and Physical Activity: Effect of the Diet	410
14.4	Concluding Remarks and Future Perspectives	411
	Acknowledgments	412
	References	412
<b>15</b>	<b>MS-Based Omics Evaluation of Phenolic Compounds as Functional Ingredients</b>	<b>415</b>
	<i>Débora Villaño, Sonia Medina, José Ignacio Gil, Cristina García-Viguera, Federico Ferreres, Francisco A. Tomás-Barberán, and Angel Gil-Izquierdo</i>	
15.1	Introduction	415
15.2	Use of Metabolomics in Nutritional Trials	416
15.3	Statistic Tools in Nutritional Metabolomics	421
15.4	Metabolomics from Clinical Trials after Intake of Polyphenol-Rich Foods	421
15.5	Human Metabolome in Low and Normal Polyphenol Dietary Intake	424
15.6	Concluding Remarks and Future Perspectives	424
	Acknowledgments	425
	References	425
<b>16</b>	<b>Metabolomics of Diet-Related Diseases</b>	<b>429</b>
	<i>Marcela A. Erazo, Antonia García, Francisco J. Rupérez, and Coral Barbas</i>	
16.1	Introduction	429
16.2	Analysis of the Metabolome: Metabolomics	431
16.3	Diet-Related Diseases	432
	References	446
<b>17</b>	<b>MS-Based Metabolomics Approaches for Food Safety, Quality, and Traceability</b>	<b>453</b>
	<i>María Castro-Puyana, José A. Mendiola, Elena Ibáñez, and Miguel Herrero</i>	
17.1	Introduction	453
17.2	MS-Based Metabolomics for Food Safety	455
17.3	MS-Based Metabolomics to Assess Food Quality	462
17.4	MS-Based Metabolomics Strategies for Food Traceability	464

17.5	Conclusions and Future Outlook	467
	Acknowledgments	468
	References	468
<b>18</b>	<b>Green Foodomics</b>	<b>471</b>
	<i>Jose A. Mendiola, María Castro-Puyana, Miguel Herrero, and Elena Ibáñez</i>	
18.1	Basic Concepts of Foodomics (and How to Make it Greener)	471
18.2	Basic Concepts of Green Chemistry	472
18.3	Green Processes to Produce Functional Food Ingredients	476
18.4	Development of Green Analytical Processes for Foodomics	482
18.5	Comparative LCA Study of Green Analytical Techniques: Case Study	493
18.6	Conclusion	497
	Acknowledgments	498
	References	498
<b>19</b>	<b>Chemometrics, Mass Spectrometry, and Foodomics</b>	<b>507</b>
	<i>Thomas Skov and Søren B. Engelsen</i>	
19.1	Foodomics Studies	507
19.2	XC-MS Data	511
19.3	Data Structures and Models	517
19.4	Conclusion	534
	References	535
<b>20</b>	<b>Systems Biology in Food and Nutrition Research</b>	<b>539</b>
	<i>Matej Orešič</i>	
20.1	Systems Biology—New Opportunity for Food and Nutrition Research	539
20.2	Systems Approach to Identify Molecular Networks Behind Health and Disease	542
20.3	Food Metabolome and its Effect on Host Physiology	544
20.4	Building A Systems Biology Platform for Food and Nutrition Research	545
20.5	Future Perspectives	546
	References	547
