Foreword	xi
Preface	xi
Chapter 1: The Shoulder	2
Physiology of the Shoulder	4
Flexion–Extension and Adduction	6
Abduction	8
Axial Rotation of the Arm	10
Rotation of the Arm at the Shoulder Joint	10
Movements of the Shoulder Girdle in the Horizontal Plane	10
Horizontal Flexion–Extension	12
The Movement of Circumduction	14
Quantitation of Shoulder Movements	16
Codman's 'Paradox'	18
Movements Used for Assessing the Overall Function of the Shoulder	20
The Multiarticular Complex of the Shoulder	22
The Articular Surfaces of the Shoulder Joint	24
The Head of the Humerus	24
The Glenoid Cavity of the Scapula	24
The Glenoid Labrum	24
Instantaneous Centres of Rotation	26
The Capsulo-Ligamentous Apparatus of the Shoulder	28
The Intra-Articular Course of the Biceps Tendon	30
The Role of the Gleno-Humeral Ligament	32
During Abduction	32
During Axial Rotation	32
The Coraco-Humeral Ligament in Flexion and Extension	34
Coaptation of the Articular Surfaces by the Periarticular Muscles	36
The Subdeltoid 'Joint'	38
The Scapulo-Thoracic 'Joint'	40
Movements of the Shoulder Girdle	42
The Real Movements of the Scapulo-Thoracic 'Joint'	44
The Sterno-Costo-Clavicular Joint	46
The Movements	48
The Acromio-Clavicular Joint	50
The Role of the Coraco-Clavicular Ligaments	54
Motor Muscles of the Shoulder Girdle	56
The Supraspinatus and Abduction	60
The Physiology of Abduction	62
Role of the Deltoid	62
Role of the Rotator Muscles	64
Role of the Supraspinatus	64

The Three Phases of Abduction	66
The First Phase of Abduction: 0–60°	66
The Second Phase of Abduction: 60–120°	66
The Third Phase of Abduction: 120–180°	66
The Three Phases of Flexion	68
The First Phase of Flexion: 0–50/60°	68
The Second Phase of Flexion: 60–120°	68
The Third Phase of Flexion: 120–180°	68
The Rotator Muscles	70
Abduction and Extension	72
‘Hippocratic’ Measurement of Flexion and Abduction	74

Chapter 2: The Elbow

Movement of the Hand Towards or Away from the Body	78
The Articular Surfaces	80
The Distal End of the Humerus	82
The Ligaments of the Elbow	84
The Head of the Radius	86
The Trochlea Humeri	88
Type I: Most Frequent Type	88
Type II: Less Common Type	88
Type III: Rare Type	88
The Limitations of Flexion and Extension	90
The Flexor Muscles of the Elbow	92
The Extensor Muscles of the Elbow	94
Factors Ensuring Coaptation of the Articular Surfaces	96
Resistance to Longitudinal Traction	96
Resistance to Longitudinal Compression	96
Coaptation During Flexion	96
The Essex–Lopresti Syndrome	96
The Range of Movements of the Elbow	98
Surface Markings of the Elbow	100
The Efficiency of the Flexor and Extensor Muscles	102
The Position of Function and of Immobilization	102
The Relative Strength of the Muscles	102

Chapter 3: Pronation–Supination

Requirements for Measuring Pronation–Supination	106
The Usefulness of Pronation–Supination	108
The Radio-Ulnar Complex	110
The Arrangement of the Bones	110
The Interosseous Membrane	112
The Functional Anatomy of the Superior Radio-Ulnar Joint	116

The Functional Anatomy of the Inferior Radio-Ulnar Joint	118
Architecture and Mechanical Features of the Distal End of the Ulna	118
Structure of the Inferior Radio-Ulnar Joint	120
Dynamic Features of the Superior Radio-Ulnar Joint and Ulnar Variance	122
Dynamic Features of the Inferior Radio-Ulnar Joint	124
The Axis of Pronation–Supination	128
The Co-Congruence of the Two Radio-Ulnar Joints	132
The Muscles of Pronation and Supination	134
Motor Muscles of Supination	134
Motor Muscles of Pronation	134
Why Does the Forearm Have Two Bones?	136
Mechanical Disturbances of Pronation and Supination	140
Fractures of the Two Bones of the Forearm	140
Dislocations of the Radio-Ulnar Joints	140
Consequences of the Relative Shortening of the Radius	140
The Position of Function and Compensatory Movements	144
The Position of Function of the Forearm	144
The Waiter Test	144

Chapter 4: The Wrist **146**

Movements of the Wrist	148
Range of Movements of the Wrist	150
Movements of Abduction–Adduction	150
Movements of Flexion–Extension	150
Passive Movements of Flexion–Extension	150
The Movement of Circumduction	152
The Articular Complex of the Wrist	154
The Radio-Carpal Joint	154
The Mid-Carpal Joint	158
The Ligaments of the Radio-Carpal and Mid-Carpal Joints	160
The Stabilizing Role of the Ligaments	164
Stabilization in the Coronal Plane	164
Stabilization in the Sagittal Plane	166
The Dynamic Properties of the Carpus	168
The Lunate Pillar	168
The Scaphoid Pillar	170
Movements of the Scaphoid	172
The Scaphoid–Lunate Couple	174
The Geometrically Variable Carpus	176
Abduction–Adduction	176
Dynamic Properties of the Proximal Row	178
The Intercalated Segment	180

Dynamic Aspects of Adduction–Abduction	182
Dynamic Aspects of Flexion–Extension	184
Henke's Mechanism	184
The Transfer of the Force Couple of Pronation–Supination	186
The Wrist Considered as a Universal Joint	186
Traumatic Lesions of the Wrist	190
The Motor Muscles of the Wrist	192
Actions of the Muscles of the Wrist	194
The Synergistic and Stabilizing Action of the Muscles of the Wrist	196
The Functional Position of the Wrist	196

Chapter 5: The Hand **198**

The Prehensile Ability of the Hand	200
The Architecture of the Hand	204
The Carpus	208
The Hollowing of the Palm	210
The Metacarpo-Phalangeal (MP) Joints	212
The Ligamentous Complex of the Metacarpo-Phalangeal (MP) Joints	216
The Range of Movements of the MP Joints	220
The Interphalangeal (IP) Joints	222
The Tunnels and Synovial Sheaths of the Flexor Tendons	226
The Tendons of the Long Flexors of the Fingers	230
The Tendons of the Extensor Muscles of the Fingers	234
The Interossei and the Lumbrical Muscles	238
Extension of the Fingers	242
The Extensor Digitorum	242
The Interossei	242
The Lumbricals	242
Abnormal Positions of the Hand and Fingers	246
The Muscles of the Hypothenar Eminence	248
Physiological Actions	248
The Thumb	250
Opposition of the Thumb	252
The Geometry of Thumb Opposition	256
The Trapezo-Metacarpal (TM) Joint	258
Topographic Features of the Articular Surfaces	258
Coaptation of the Articular Surfaces	260
The Role of the Ligaments	262
Geometrical Analysis of the Articular Surfaces	264
Axial Rotation	266
The Movements of the First Metacarpal (M ₁)	268
Measurement of the Movements of M ₁	272
Radiographic Features of the TM Joint and of the Trapezial System	274
The Structural and Functional Features of the TM Joint	276

Contents

The Metacarpo-Phalangeal (MP) Joint of the Thumb	278
Movements of the MP Joint of the Thumb	282
Combined Lateral and Rotational Movements of the MP Joint of the Thumb	284
The Interphalangeal (IP) Joint of the Thumb	286
The Motor Muscles of the Thumb	288
The Extrinsic Muscles	290
The Intrinsic Muscles	290
The Actions of the Extrinsic Muscles of the Thumb	292
The Actions of the Medial Group of Thenar Muscles (the Medial Sesamoid Muscles)	294
The Actions of the Lateral Group of Thenar Muscles	296
Opposition of the Thumb	298
The Component of Pronation	302
Opposition and Counter-Opposition	304
The Modes of Prehension	308
Static Grips	308
Gravity-Assisted Grips	322
Dynamic Movement-Associated Grips	324
Percussion – Contact – Gestures	326
The Positions of Function and of Immobilization	328
The Temporary or 'Protective' Position of Immobilization	328
The Positions of Definitive Immobilization or Functional Fixation	328
The Non-Functional Positions of 'Temporary Immobilization' or 'Partial Relaxation'	330
Partially Amputated Hands and Fictional Hands	332
The Motor and Sensory Function of the Upper Limb	334
Motor and Sensory Tests of the Upper Limb	336
The Pulp of the Fingers	336
Three Motor Tests for the Hand	338
The Human Hand	340
Bibliography	342
Working Model of the Hand	345
Index	353

to the sixth edition
