
Contents

Preface.....	ix
Acknowledgments	xiii
1. Existing Longitudinal Data Sets for the Study of Health and Social Aspects of Aging	1
<i>Nathalie Huguet, Shayna D. Cunningham, and Jason T. Newsom</i>	
2. Weighting and Complex Sampling Design Adjustments in Longitudinal Studies	43
<i>Shayna D. Cunningham and Nathalie Huguet</i>	
3. Missing Data and Attrition	71
<i>Du Feng, Zhen Cong, and Merrill Silverstein</i>	
4. Measurement Issues in the Analysis of Within-Person Change	97
<i>Daniel E. Bontempo, Frederick M.E. Grouzet, and Scott M. Hofer</i>	
5. Basic Longitudinal Analysis Approaches for Continuous and Categorical Variables	143
<i>Jason T. Newsom</i>	
6. Mediation Analysis With Longitudinal Data.....	181
<i>David L. Roth and David P. MacKinnon</i>	
7. Growth Models With Multilevel Regression	217
<i>Benjamin A. Shaw and Jersey Liang</i>	
8. Structural Equation Modeling Approaches to Longitudinal Data.....	243
<i>Michael J. Rovine and Siwei Liu</i>	
9. Latent Growth Curve Models	271
<i>Richard N. Jones</i>	

10. Dynamic Structural Equation Models of Change	291
<i>Archana Jajodia</i>	
11. Using Discrete-Time Survival Analysis to Study Event Occurrence	329
<i>Suzanne E. Graham, John B. Willett, and Judith D. Singer</i>	
Author Index	373
Subject Index	381
