

BRIEF CONTENTS

PART ONE The Research Process

Chapter 1	Educational Research: Its Nature and Characteristics	1
Chapter 2	Identification of a Research Problem	28
Chapter 3	The Review of the Literature	51
Chapter 4	Communicating About Research	76
Chapter 5	Evaluating Research Reports	103

PART TWO Research Designs

Chapter 6	Research Design in Quantitative Research	118
Chapter 7	Experimental Research	134
Chapter 8	Quasi-Experimental Research	165
Chapter 9	Nonexperimental Quantitative Research	189
Chapter 10	Research Design in Qualitative Research	232
Chapter 11	Historical Research	254
Chapter 12	Ethnographic Research	273
Chapter 13	Mixed, Modeling, and Delphi Methods	306

PART THREE Research Tools

Chapter 14	Sampling Designs	325
Chapter 15	Measurement and Data Collection	352
Chapter 16	Data Analysis: Descriptive Statistics	381
Chapter 17	Data Analysis: Inferential Statistics	404

CONTENTS

Preface xv

PART ONE The Research Process

1 Educational Research: Its Nature and Characteristics 1

Introduction 1

The Nature of Educational Research 3

The Empirical Nature of Research 3 / The Systematic Process of Research 3 /
The Validity of Educational Research 5 / The Reliability of Educational
Research 9 / Research Has a Variety of Paradigms 10

Classification of Educational Research 11

Basic and Applied Research 11 / Qualitative and Quantitative
Research 13 / General Methods of Research 15

The Role of Theory 19

The Activities of the Research Process 21

Identification of the Research Problem 23 / Data Collection 23 /
Analysis 23 / Summarizing Results and Drawing Conclusions 24

Summary 25

Key Concepts 26

Exercises 26

Notes 27

References 27

2 Identification of a Research Problem 28

Selection of a Research Problem 28

Statement of the Research Problem 30

Constants, Variables, and Operational Definition 33 / Hypotheses and the
Statement of the Problem 37 / Types and Forms of Hypotheses 38

Summary	47
Key Concepts	48
Exercises	49
Notes	50
References	50

3 The Review of the Literature 51

Conducting a Search of the Literature 51

The Activities of the Review of the Literature 53

Sources of Information 54 / The Library 55 / Periodical Literature 55 / Indexes and Abstracts 56 / ERIC 57 / Reports of Meta-Analysis 59 / Review of Educational Research (*RER*) 59 / Theses and Dissertations 60 / Books 61

Computer Searches of Databases 62

Conducting a Search 63

Selecting Studies for the Review of the Literature 64

Assembling and Summarizing Information 65

Abstract or Summary 66 / Organizing Information 67

Interpreting and Using Information 68

Critical Review 68 / Writing the Review 69 / Referencing 71 / Preparing the Bibliography 72

Summary 73

Key Concepts 73

Exercises 74

Notes 75

References 75

4 Communicating About Research 76

Major Sections of the Research Proposal 77

Identification of the Problem 78 / Review of the Literature 80 / Methods or Procedures 80 / Significance of the Proposed Research 83 / Other Sections of the Research Proposal 84

Major Sections of the Research Report 85

Introduction, Including the Statement of the Problem 86 / Review of the Literature 87 / Methods or Procedures 88 / Results 89 / Conclusions, Recommendations, and Implications 91

Other Sections of the Research Report 93

Abstract 93 / Bibliography and Reference List 94 / Appendix 95

Putting a Report Together 95

Guidelines for Presenting Papers at Meetings 96

Presentations to Dissertation and Thesis Committees 98

Summary 100

Key Concepts 100

Exercises 101

References 102

5 Evaluating Research Reports 103

Types of Errors and Shortcomings in Reports 103

Critiquing Major Sections of a Research Report 104

Introduction 105 / Review of the Literature 105 / Methods or
Procedures 106 / Results 107 / Conclusions, Recommendations,
and Implications 107

Overall Impressions When Evaluating a Report 108

The Review Process for Journals 109

Suggested Disposition 109 / Standards for Publications 110

The Evaluation of Proposals 113

Summary 115

Key Concepts 116

Exercises 116

Notes 117

References 117

PART TWO Research Designs

6 Research Design in Quantitative Research 118

The Purposes of Research Design 119

The Concept of Controlling Variance 119

Procedures for Controlling Variance 120

Characteristics of Good Research Design 128

Freedom from Bias 129 / Freedom from Confounding 129 / Control of
Extraneous Variables 129 / Statistical Precision for Testing Hypotheses 130

Summary 130

Key Concepts 131

Exercises 131

Notes 133

References 133

7 Experimental Research 134

The Meaning of Experimental Design 134

Experimental Variables 136 / Use of the Term *Subject* 137

Criteria for a Well-Designed Experiment 137

Experimental Validity 139 / Threats to Experimental Validity 140

Posttest-Only Control Group Design 144

Pretest-Posttest Control Group Design 146

Solomon Four-Group Design 149

Factorial Designs 151

Repeated Measures Designs 154

Time Series Designs 155

Interpreting Results of Experiments 156

Randomness and Representativeness 159

Summary 160

Key Concepts 160

Exercises 161

Notes 164

References 164

8 Quasi-Experimental Research 165

The Problems of Validity 165

Posttest-Only, Nonequivalent Control Group Design 166

Pretest-Posttest, Nonequivalent Control Group Design 169

Time Series Designs 172

Single-Group Time Series Design 172 / Multiple-Group Time Series Design 175 / Variations in Time Series Designs 177

Single-Subject Designs 177

A-B Design 178 / A-B-A Design 181

Action Research and Quasi-Experimental Research 183

Summary 185

Key Concepts 186

Exercises 186

References 188

9 Nonexperimental Quantitative Research 189

Nonexperimental Quantitative Research: Its Scope and Description 189

Ex Post Facto Research 190 / Survey Research 193

Survey Designs 194

Longitudinal Designs 194 / Cross-Sectional Designs 196

The Methodology of Survey Research 198

Questionnaire Surveys 200

Item Construction 202 / Item Format 203 / The Cover Letter 206 / Questionnaire Format 209 / Procedures for Increasing Response Rate 209 / Identifying Sources of Nonresponse 212 / Incomplete and Possibly Dishonest Responses 213 / Web-Based Surveys 215

Interview Surveys 220

Interview Items 220 / Conducting the Interview 222 / Potential Sources of Error 223 / Telephone Interviews 224

Summary 225

Key Concepts 227

Exercises 227

Notes 229

References 230

10 Research Design in Qualitative Research 232

The Epistemology of Qualitative Research 232

Components of Research Design 234

Working Design 234 / Working Hypotheses 235 / Data Collection 236 / Data Analysis and Interpretation 237 / Coding 238 / Writing Up Results—Thick Description 241

Types of Designs in Qualitative Research	241
Perspectives for Qualitative Research	243
Reliability and Validity of Qualitative Research	246
Use of Technology in Qualitative Research	248
Capabilities of Computer Software in Qualitative Research	249 /
Computer Software in Qualitative Research	250
Summary	250
Key Concepts	251
Exercises	251
Notes	253
References	253

11 Historical Research 254

The Value of Historical Research	255
Sources of Information in Historical Research	257
The Methodology of Historical Research	257
Identification of the Research Problem	258 /
Collection and Evaluation of Source Materials	262 /
Synthesis of Information	263 /
Analysis, Interpretation, and Formulating Conclusions	264
Quantitative Methods in Historical Research	266
Comments on the Reporting of Historical Research	267
Reports in Professional Journals	268
Summary	270
Key Concepts	271
Exercises	271
References	272

12 Ethnographic Research 273

The Nature of Ethnography in Education	273
The Phenomenological Nature	274 /
The Naturalistic Nature	275 /
The Holistic and General Perspective	276

A Conceptual Schema for Ethnographic Research 276

The Process of Ethnographic Research 280

Identification of the Phenomenon to Be Studied 280 / Identification of Subjects 282 / Hypothesis Generation 283 / Data Collection 283 / Analysis 289 / Drawing Conclusions 292

Examples of Ethnographic Research in Education 293

The Reliability and Validity of Ethnographic Research 296

Reliability 296 / Validity 298

The Role of Ethnographic Research 300

Summary 302

Key Concepts 303

Exercises 303

Notes 305

References 305

13 Mixed, Modeling, and Delphi Methods 306

Mixed Methods 306

A Mixed Methods Example: Quasi-Experiment and Survey 307 / Advantages of Mixed Methods 308

Modeling Methods 309

The Steps in Modeling 310 / A Modeling Example 311 / Modeling Summary 313

Delphi Methods 313

The Delphi Process 314 / Variations of the Delphi 319 / A Delphi Example 319 / Considerations When Conducting a Delphi Study 320

Summary 321

Key Concepts 322

Exercises 322

Notes 323

References 323

14 Sampling Designs 325

The Concept of a Random Sample 325

Random Selection and Random Assignment 326 / Use of a Random Number Table 327 / Use of the Computer in Sample Selection 329 / Sampling Error and Sampling Bias 330

Criteria for a Sampling Design 332

Stratified Random Sampling 333

Allocation of Sample Size Among Strata 333

Cluster Sampling 335

Systematic Sampling 337

Possible Problem of Periodicity 337

Considerations in Determining Sample Size—Random Sampling 339

Purposeful Sampling 342

Comprehensive Sampling 343 / Maximum Variation Sampling 343 / Extreme Case Sampling 344 / Typical Case Sampling 345 / Homogeneous Sampling 345 / Other Variations of Purposeful Sampling 345 / Sample Size of Purposeful Samples 347

Summary 347

Key Concepts 349

Exercises 349

Notes 350

References 351

15 Measurement and Data Collection 352

Concepts of Measurement 353

Types of Measurement Scales 353 / Reliability of Measurement 354 / Empirical Procedures for Estimating Reliability 355 / Expected Reliability Coefficients for Various Types of Tests 356 / Validity of Measurement 356

The Variables Measured in Educational Research 360

Tests and Inventories Used for Measurement 360

Achievement Tests in Academic and Skills Areas 360 / Attitude Inventories 362 / Aptitude Tests 367 / Rating Scales 368 / Observation Systems 370

Where to Find Test Information 374

Scoring and Data Preparation 374

Coding Data 375 / An Example of a Data File 376

Summary 377

Key Concepts 378

Exercises 378

Notes 379

References 380

16 Data Analysis: Descriptive Statistics 381

The Multiple Meanings of Statistics 381

Distributions 382

Describing a Distribution of Scores 383 / Standard Scores 387

Correlation: A Measure of Relationship 389

Uses of Correlation 392 / Different Correlation Coefficients 393

Data Analysis by Computer 395

Summary 400

Key Concepts 401

Exercises 402

Notes 403

17 Data Analysis: Inferential Statistics 404

Context for Using Inferential Statistics 404

Testing Hypotheses and Estimating Parameters 405

Hypothesis Testing and Sampling Distributions 406 / Building a Confidence Interval: The Example Continued 409 / Possible Errors in Hypothesis Testing 410

Inferences from Statistics to Parameters: A Review 411

Parametric Analyses 413

The *t*-Distribution: Another Sampling Distribution 413 / Analysis of Variance (ANOVA) 416

Nonparametric Analyses 420

The Chi-Square (χ^2) Test and Distribution 420

	Correlational Analysis	423
	Analysis of Covariance	425
	Selecting an Appropriate Statistical Analysis	425
	Comments About Statistical Analysis	428
	Meta-Analysis	429
	Summary	431
	Key Concepts	432
	Exercises	432
	Notes	435
	References	435
Appendix 1	Ethical and Legal Considerations in Conducting Research	436
	Participant Consent	437
	Ethical Guidelines	438
Appendix 2	Solutions to Exercises	440
Appendix 3	Tables	463
	Table A Ordinate and Areas of the Normal Curve	464
	Table B Critical Values of t	466
	Table C Upper Percentage Points of the χ^2 Distribution	467
	Table D Upper Percentage Points of the F -Distribution	468
	Table E Critical Values of the Correlation Coefficient	474
	Glossary of Research Methods Terms	475
	Name Index	481
	Subject Index	483
