

Photographic Regional Atlas of Non-Metric Traits and Anatomical Variants in the Human Skeleton provides a unique collection of photographs derived from a broad array of novel skeletal specimens from across the globe. This atlas depicts skeletal features that are compiled to facilitate simple and direct access to some of the most interesting specimens currently known. This reference book is intended for clinicians, anatomists, anthropologists, forensic scientists, pathologists, biologists and other allied medical professionals who are fascinated with the expression of morphological features of the skeleton. It is particularly useful to the human biologist investigating genetic relatedness among and between skeletal samples utilizing non-metric trait analyses since this atlas provides a comprehensive visual guide for not only the identification and nomenclature of skeletal morphological features, but also for the appreciation of the range of anatomical expression. *Photographic Regional Atlas of Non-Metric Traits and Anatomical Variants in the Human Skeleton* draws from skeletal features observed from over 10,000 skeletons in collections throughout the world and provides a comprehensive yet concise presentation for rapid and reliable referral. Traits are arranged and presented based on skeletal region that facilitates ease of use for the reader when attempting to identify a feature of interest. Photographs are vividly displayed which enhances the reader's ability to compare the standard reference to a desired feature. The authors draw on their own decades of experience in skeletal anatomy to provide the best photographic atlas available for referencing daunting anatomical variations and non-metric trait morphology. As a result, *Photographic Regional Atlas of Non-Metric Traits and Anatomical Variants in the Human Skeleton* provides a one-of-a-kind reference that serves as a crucial component in the pursuit of skeletal anomaly research and education.

<i>Introduction</i>	xi
<i>Abbreviations and Names of Skeletal Collections Used in This Book.</i>	xvi
<i>Acknowledgments.</i>	xvii
 <i>Chapter</i>	
1. Frontal View of the Skull.	3
2. Right Lateral View of the Skull	119
3. Left Lateral View of the Skull	155
4. Superior View of the Skull.	189
5. Occipital View of the Skull	216
6. Endocranial View of the Skull	266
7. Basilar (Inferior) View of the Skull.	301
8. Mandible and Teeth, Hyoid, Maxilla and Teeth.	451
9. Shoulder, Arm and Hand (Clavicle, Scapula, Humerus, Radius, Ulna, Carpal)	521
10. Sternum, Spine and Pelvis (Sternum, Vertebra, Hip and Sacrum)	542
11. Leg and Foot (Femur, Tibia, Fibula, Patella, Tarsal, Metatarsal, Phalanx)	607
12. A Method for Removing Soft Tissue from a Human Rib Cage with Bleach	642
13. Unusual Combination of Skeletal Variants in an Adult Thai Male (KKU): A Photographic Case Report	647
 <i>Appendix: Non-metric Trait List</i>	 655
