

Content / Obsah

Director's preface / Úvod ředitele ústavu	6 / 7
Departments / Oddělení	10 / 11
Department of Hydrochemistry and Ecosystem Modelling	10
Oddělení hydrochemie a ekosystémového modelování	11
Department of Aquatic Microbial Ecology	14
Oddělení mikrobiální ekologie vody	15
Department of Fish and Zooplankton Ecology	20
Oddělení ekologie ryb a zooplanktonu	21
Current Research Highlights / Shrnutí nejdůležitějších projektů	26
The effect of solar light on key members of freshwater Betaproteobacteria	26
Phytoplankton responses to environmental forcing – lessons learned from 30 years of monitoring the Římov Reservoir (GAČR 2015–2017)	27
Do long-term zooplankton data in the Slapy Reservoir reflect land use and / or climate changes in the past 50 years?	28
Changes in fish isotopic signals: linking land use and reservoir food webs	29
Recent Research Outputs / Vybrané výsledky	31
Integrated soil and water conservation in the catchment of Drachensee reservoir	31
Integrovaná ochrana půdy a vody v povodí Drachensee.	31
Hydroacoustical distinguishing between fish and bubbles, and quantification of methane bubble ebullition in temperate freshwater reservoirs	33
Non-fish prey in the diet of an exclusive piscivore, the Common Kingfisher <i>Alcedo atthis</i>	34
Dominance and high diversity of rotifers driven by the water flow regime and repeated disturbance by huge flood events in a mountain pond	35
Data and Statistics	36
Regular monitoring of the reservoirs Slapy and Římov: dissolved and dispersed substances in reservoir water	36
Regular monitoring of the reservoirs Slapy and Římov: microbial characteristics, chlorophyll and zooplankton	37
Projects	38
Students' theses finished in 2015	40
Publications	41
