## CONTENTS

### REVIEW

The effects of feeding fresh forage and silage on some nutritional attributes of beef: an overview

*Pavel Kalač* 1–13

### ORIGINAL ARTICLES

The effects of biological additives on the fermentation process and fibre composition of farm-scale grass silages

*František Lád, Václav Kubát, Jaromír Kadlec, Bohuslav Čermák, Milan Kobes* 15–23

The occurrence of *Erysiphe trifolii* on *Lathyrus pratensis* in a foothill area of South Bohemia

*Milan Kobes, Bohumila Voženílková, Martin Šlachta, Jan Frelich* 25–31

Milk acetone determination by the photometrical method after microdiffusion and via FT infra-red spectroscopy

*Oto Hanuš, Václava Genčurová, Yunhai Zhang, Pavel Hering, Jaroslav Kopecký, Radoslava Jedelská, Alena Dolínková, Zdeněk Motyčka* 33–48

Content of free fatty acids, lipolytic bacteria and somatic cells in relation to milking technology

*Magda Mikulová* 49–54

Profitability of dairy farming in relation to the type of feeding system

*Jan Frelich, Martin Šlachta, František Střeleček, Jana Lososová* 55–59

Antibody production in sheep fed a diet containing brown seaweed

*Roman Konečný, Jan Trávníček, Lucie Hasoňová, Jan Plicka, Vlasta Kroupová, Martina Staňková, Zdeněk Peksa* 61–65

Influence of dietary fish oil supplementation on humoral immune response and some selected biochemical parameters of broiler chickens

*Navid Hosseini-Mansoub, Yadollah Bahrami* 67–77

Morphological and histometric parameters of the thyroid gland in slaughter cattle

*Zdeněk Peksa, Jan Trávníček, Hana Dušová, Roman Konečný, Lucie Hasoňová* 79–84
