

List of Contributors	xix
Foreword.....	xxiii
1 A Primer on UHMWPE.....	1
<i>Steven M. Kurtz, PhD</i>	
1.1 Introduction	1
1.2 What is a Polymer?	1
1.3 What is Polyethylene?.....	2
1.4 Crystallinity	3
1.5 Thermal Transitions.....	4
1.6 Overview of the Handbook	5
References	6
2 From Ethylene Gas to UHMWPE Component: The Process of Producing Orthopedic Implants.....	7
<i>Steven M. Kurtz, PhD</i>	
2.1 Introduction	7
2.2 Polymerization: from Ethylene Gas to UHMWPE Powder	7
2.3 Conversion: from UHMWPE Powder to Consolidated Form	12
2.4 Machining: from Consolidated Form to Implant	17
2.5 Conclusions	18
References	18
3 Packaging and Sterilization of UHMWPE	21
<i>Steven M. Kurtz, PhD and Matthew Zagorski, MS, CPP</i>	
3.1 Introduction	21
3.2 Gamma Sterilization in Air	22
3.3 Gamma Sterilization in Oxygen Barrier Packaging	24
3.4 Ethylene Oxide Gas Sterilization	25
3.5 Gas Plasma Sterilization.....	26
3.6 The Torino Survey of Contemporary Orthopedic Packaging	27
3.7 Shelf-Life of UHMWPE Components for Orthopedic Implants	29
3.8 Overview of Current Trends	29
Acknowledgments.....	30
References	30
4 The Origins of UHMWPE in Total Hip Arthroplasty.....	33
<i>Steven M. Kurtz, PhD</i>	
4.1 Introduction and Timeline	33
4.2 The Origins of a Gold Standard (1958–1982).....	33
4.3 Charnley’s First Hip Arthroplasty Design with PTFE (1958).....	34
4.4 Implant Fixation with Pink Dental Acrylic Cement (1958–66)	35
4.5 Interim Hip Arthroplasty Designs with PTFE (1958–1960)	36
4.6 Final Hip Arthroplasty Design with PTFE (1960–1962)	36
4.7 Implant Fabrication at Wrightington	37
4.8 The First Wear Tester	38
4.9 Searching to Replace PTFE.....	39

4.10	UHMWPE Arrives at Wrightington	40
4.11	Implant Sterilization Procedures at Wrightington.....	40
4.12	Overview	43
	Acknowledgments.....	43
	References.....	43
5	The Clinical Performance of Historical and Conventional UHMWPE in Hip Replacements.....	45
	<i>Steven M. Kurtz, PhD</i>	
5.1	Introduction	45
5.2	Joint Replacements do not Last Forever	45
5.3	Range of Clinical Wear Performance in Cemented Acetabular Components	47
5.4	Wear Versus Wear Rate of Hip Replacements.....	48
5.5	Comparison of Wear Rates between Different Clinical Studies.....	49
5.6	Comparison of Wear Rates in Clinical and Retrieval Studies	51
5.7	Current Methods for Measuring Clinical Wear in THA.....	52
5.8	Range of Clinical Wear Performance in Modular Acetabular Components.....	52
5.9	Conclusions	53
	Acknowledgments.....	53
	References	54
6	The Clinical Performance of Highly Cross-linked UHMWPE in Hip Replacements.....	57
	<i>Steven M. Kurtz, PhD and Jasmine D. Patel, PhD</i>	
6.1	Introduction	57
6.2	What are First- and Second-Generation HXLPEs?.....	57
6.3	Clinical Performance of First-Generation HXLPEs in THA	60
6.4	Clinical Performance of Second-Generation HXLPEs in THA.....	65
6.5	Summary	66
	Acknowledgments.....	67
	References	67
7	Contemporary Total Hip Arthroplasty: Alternative Bearings.....	72
	<i>Steven M. Kurtz, PhD and Kevin Ong, PhD</i>	
7.1	Introduction	72
7.2	Metal-on-Metal (MOM) Alternative Hip Bearings	73
7.3	Ceramics in Hip Arthroplasty.....	78
7.4	Noise and Squeaking from Hard-on-Hard Bearings	91
7.5	Polyether Ether Ketone (PEEK).....	92
7.6	Polycarbonate Urethane (PCU).....	94
7.7	Summary	95
	References	95
8	The Origins and Adaptations of UHMWPE for Knee Replacements.....	106
	<i>Steven M. Kurtz, PhD</i>	
8.1	Introduction	106
8.2	Frank Gunston and the Wrightington Connection to TKA	107
8.3	Polycentric Knee Arthroplasty	110
8.4	Unicondylar Polycentric Knee Arthroplasty	112

8.5	Bicondylar Total Knee Arthroplasty.....	112
8.6	Patellofemoral Arthroplasty	118
8.7	UHMWPE with Metal Backing	119
8.8	Conclusions	120
	Acknowledgments.....	121
	References	121
9	The Clinical Performance of UHMWPE in Knee Replacements	123
	<i>Steven M. Kurtz, PhD</i>	
9.1	Introduction	123
9.2	Biomechanics of Total Knee Arthroplasty	123
9.3	Clinical Performance of UHMWPE in Knee Arthroplasty	129
9.4	Osteolysis and Wear in TKA.....	135
9.5	Summary	141
	Acknowledgments.....	141
	References	141
10	Contemporary Total Knee Arthroplasty: Alternative Bearings.....	145
	<i>Steven M. Kurtz, PhD</i>	
10.1	Introduction	145
10.2	HXLPE in TKA.....	145
10.3	Ceramic Bearings in TKA.....	149
10.4	Summary	151
	References.....	151
11	The Clinical Performance of UHMWPE in Shoulder Replacements.....	154
	<i>Stefan M. Gabriel, PhD, PE</i>	
11.1	Introduction	154
11.2	The Shoulder Joint	154
11.3	Shoulder Replacement.....	154
11.4	Contemporary Total Shoulder Replacements.....	160
11.5	Clinical Performance of Total Shoulder Arthroplasty	165
11.6	Controversies in Shoulder Replacement	168
11.7	Future Directions in Total Shoulder Arthroplasty	171
11.8	Conclusions	172
	Acknowledgments.....	172
	References	172
12	The Clinical Performance of UHMWPE in Elbow Replacements.....	179
	<i>Judd S. Day, PhD</i>	
12.1	Introduction	179
12.2	Anatomy of the Elbow	179
12.3	Elbow Biomechanics.....	182
12.4	Implant Design	184
12.5	Osteolysis and Wear	191
12.6	Conclusions	193
	Acknowledgments.....	194
	References	194

13 Applications of UHMWPE in Total Ankle Replacements	197
<i>Allyson Ianuzzi, PhD and Chimba Mkandawire, PhD, CAISS</i>	
13.1 Introduction	197
13.2 Anatomy	197
13.3 Ankle Biomechanics	198
13.4 Total Ankle Replacement Design	200
13.5 UHMWPE Loading and Wear in Total Ankle Replacements.....	210
13.6 Complications and Retrieval Analysis.....	212
13.7 Conclusions	212
Acknowledgments.....	212
References	212
14 The Clinical Performance of UHMWPE in the Spine	217
<i>Marta L. Villarraga, PhD and Steven M. Kurtz, PhD</i>	
14.1 Introduction	217
14.2 The CHARITÉ Artificial Disc.....	218
14.3 Lumbar Disc Arthroplasty	226
14.4 Cervical Disc Arthroplasty	235
14.5 Wear and <i>In Vivo</i> Degradation of UHMWPE in the Spine.....	247
14.6 Alternatives to UHMWPE in Disc Replacement	252
14.7 Many Unanswered Questions Remain	253
Acknowledgments.....	253
References	253
15 Highly Cross-Linked and Melted UHMWPE.....	264
<i>Orhun K. Muratoglu, PhD and Charles R. Bragdon, PhD</i>	
15.1 Introduction	264
15.2 Radiation Cross-Linking	265
15.3 Irradiation and Melting.....	265
15.4 Effect of Radiation Dose, Melting, and Irradiation Temperature, on UHMWPE Properties.....	267
15.5 Effect of Cross-Linking on Fatigue Resistance.....	268
15.6 Optimum Radiation Dose	268
15.7 Hip Simulator Data.....	268
15.8 Knee Simulator Data	269
15.9 Clinical Follow-Up Studies	270
15.10 <i>In Vivo</i> Changes – Explants	270
15.11 Conclusions	271
References	271
16 Highly Cross-Linked and Annealed UHMWPE.....	274
<i>Michael T. Manley, FRSA, PhD</i>	
16.1 Introduction	274
16.2 Development of Duration Stabilized UHMWPE	274
16.3 Crossfire	276
16.4 X3 – Sequentially Irradiated and Annealed UHMWPE.....	282
16.5 Conclusions	289
Acknowledgments.....	289
References	289

17 Vitamin E-Blended UHMWPE Biomaterials	293
<i>Steven M. Kurtz, PhD, Pierangiola Bracco, PhD, Luigi Costa, PhD, Ebru Oral, PhD and Orhun Muratoglu, PhD</i>	
17.1 Introduction	293
17.2 Vitamin E as an Antioxidant for Polyolefins	294
17.3 Vitamin E Blends in Food Packaging.....	295
17.4 Vitamin E Studies from Japan	296
17.5 VITASUL and Vitamin E Studies from Austria	297
17.6 Vitamin E Studies from Italy.....	298
17.7 Vitamin E Blends and Thresholds for Oxidative Stability	299
17.8 Vitamin E Blends and Mechanical Behavior	301
17.9 Vitamin E Blends and Cross-Linking Efficiency	302
17.10 Warm Irradiation and Postirradiation Treatment of Vitamin E Blends	303
17.11 Conclusions	304
Acknowledgment	304
References.....	304
18 Highly Cross-Linked UHMWPE Doped with Vitamin E	307
<i>Ebru Oral, PhD and Orhun K. Muratoglu, PhD</i>	
18.1 Introduction	307
18.2 Function of Vitamin E	307
18.3 Diffusion of Vitamin E in Cross-Linked UHMWPE.....	309
18.4 Wear.....	310
18.5 Mechanical and Fatigue Properties	312
18.6 Oxidative Stability.....	314
18.7 Biocompatibility	315
18.8 Conclusions and Future Prospects.....	320
Acknowledgments.....	320
References	320
19 Alternate Antioxidants for Orthopedic Devices	326
<i>Venkat Narayan, PhD</i>	
19.1 Introduction	326
19.2 Historical Perspective	328
19.3 Commercial Listing and Trade Names.....	331
19.4 Mechanistic Studies on Radical Stabilization	333
19.5 Oxidative Stability Studies	336
19.6 Material Property Characterization	337
19.7 Biocompatibility and Biological Response	339
19.8 Ionizing Radiation Effects on Antioxidants	345
19.9 Antioxidants in Food and Healthcare	346
19.10 Antioxidants in Orthopedic Implants	346
19.11 Conclusions	348
Acknowledgment.....	348
References	348
20 Phospholipid Polymer Grafted Highly Cross-Linked UHMWPE.....	352
<i>Masayuki Kyomoto, PhD, Toru Moro, MD, PhD and Kazuhiko Ishihara, PhD</i>	
20.1 Articular Cartilage.....	352
20.2 Surface Modification with Hydrophilic Polymer	354

20.3	PMPC-Grafted Polyethylene for Artificial Hip Joints.....	360
20.4	Future Perspectives.....	364
	Acknowledgments.....	364

21	UHMWPE Matrix Composites.....	369
	<i>José Antonio Puértolas, PhD and Steven M. Kurtz, PhD</i>	
21.1	Introduction.....	369
21.2	CFR-UHMWPE Composite: Poly II.....	369
21.3	CNTs-UHMWPE Composites.....	371
21.4	Graphene-UHMWPE Composites.....	380
21.5	Other UHMWPE Matrix Composites for Orthopedic Bearings.....	386
21.6	Polyethylene-HA Composites.....	387
21.7	Summary.....	388
	Acknowledgments.....	388
	References.....	388
22	UHMWPE Homocomposites and Fibers.....	398
	<i>Ryan Siskey, MS, Harold Smelt, MS, Karlien Boon-Ceelen, PhD and Maria Persson, PhD</i>	
22.1	Introduction.....	398
22.2	UHMWPE Homocomposites.....	398
22.3	UHMWPE Fibers.....	401
	Acknowledgments.....	409
	References.....	409
23	UHMWPE-Hyaluronan Microcomposite Biomaterials.....	412
	<i>Susan P. James, PhD, Rachael (Kurkowski) Oldinski, PhD, Min Zhang, PhD and Herb Schwartz, PhD</i>	
23.1	Introduction.....	412
23.2	Surface Modification of UHMWPE.....	412
23.3	Polyurethanes and Hydrogels.....	413
23.4	Hyaluronan (HA).....	413
23.5	Synthesis and Processing of UHMWPE-HA Microcomposites.....	416
23.6	UHMWPE-HA.....	416
23.7	Cross-Linked UHMWPE-HA.....	419
23.8	Cross-Linked Compatibilized UHMWPE-HA.....	419
23.9	Chemical and Physical Characterization of UHMWPE-HA Biomaterials.....	420
23.10	UHMWPE-HA Composition.....	420
23.11	UHMWPE-HA Hydrophilicity.....	421
23.12	UHMWPE-HA Biostability.....	422
23.13	UHMWPE Crystallinity in UHMWPE-HA.....	423
23.14	Mechanical and Tribological Characterization of UHMWPE-HA Biomaterials.....	423
23.15	Sterilization of UHMWPE-HA Biomaterials.....	428
23.16	Biocompatibility of UHMWPE-HA Biomaterials.....	428
23.17	Commercialization of UHMWPE-HA Biomaterials.....	428
23.18	Conclusions.....	428
	Acknowledgments.....	428
	References.....	429

24 High Pressure Crystallized UHMWPEs	434
<i>Anuj Bellare, PhD and Steven M. Kurtz, PhD</i>	
24.1 Introduction	434
24.2 Extended Chain Crystallization.....	434
24.3 Hylamer.....	439
24.4 Cross-Linking Followed by High Pressure Crystallization.....	443
24.5 High Pressure Crystallization Followed by Cross-Linking.....	443
24.6 Summary	444
Acknowledgments.....	444
References.....	444
25 Compendium of HXLPEs.....	449
