Contents

Preface xxiii
Part 1. Mechanics
1.1 Scalars and Vectors 2
1.1.1 Vectors 3
1.1.2 Addition of Vectors 4
1.1.3 The Unit Vectors 5
1.1.4 Vector Dot Product 6
1.1.5 Vector Cross Product 7
1.1.6 Scalars and Vectors (Summary) 8
1.1.7 Example 9
1.2 Statics 10
1.2.1 Equilibrium 11
1.2.2 The Normal Force 12
1.2.3 Reactions 13
1.2.4 Free Body Diagram 14
1.2.5 Resultants 15
1.2.6 Example 16
1.3 Moment of Inertia 17
1.3.1 Centroid and Centre of Mass 18
1.3.2 Centroids of Areas 19
1.3.3 2nd Moment of an Area 20
1.3.4 Moments of Inertia of Areas 21
1.3.5 Example 22
1.4 Linear Motion 23
1.4.1 Velocity and Acceleration 24
1.4.2 Kinematics 25
1.4.3 Projectile Motion 26
1.4.4 Examples 28
1.5 Forces 29
1.5.1 Newton's Laws 30
1.5.2 Inertia 31
1.5.3 Ropes and Pulleys 32
1.5.4 Friction 33
1.5.5 Non-Concurrent Forces 34
1.5.6 Gravitation 35
1.5.7 Examples 36

1.6 Rotational Motion 40
1.6.1 Rotational Motion 41
1.6.2 Linear and Circular Motion 42
1.6.3 Centripetal Force 43
1.6.4 Planetary Motion 44
1.6.5 Example 45
1.7 Rotation 46
1.7.1 Rotational Kinematics 47
1.7.2 Moment of Inertia 48
1.7.3 Moment of Inertia of Common Shapes 49
1.7.4 Composite Bodies 50
1.7.5 Radius of Gyration 51
1.7.6 Calculation of Moment of Inertia 52
1.7.7 Dynamic Equilibrium 53
1.7.8 Rolling Motion 54
1.7.9 Examples 55
1.8 Work and Energy 57
1.8.1 Work and Energy 58
1.8.2 Variable Force 59
1.8.3 Work Done by a Spring 60
1.8.4 Energy 61
1.8.5 Rotational Kinetic Energy 62
1.8.6 Power 63
1.8.7 Examples 64
1.9 Impulse and Momentum 66
1.9.1 Impulse and Momentum 67
1.9.2 Angular Momentum 68
1.9.3 Impulse-Momentum Equation 69
1.9.4 Conservation of Momentum 70
1.9.5 Examples 71

Part 2. Thermal Physics
2.1 Temperature 74
2.1.1 Thermodynamic Systems 75
2.1.2 Temperature 76
2.1.3 Kelvin Temperature Scale 77

2.1.4 Thermometers 78
2.1.5 Examples 79
2.2 Heat and Solids 80
2.2.1 Thermal Expansion 81
2.2.2 Atomic Bonding in Solids 82
2.2.3 Specific Heat 83
2.2.4 Latent Heat 84
2.2.5 Internal Energy 85
2.2.6 Examples 86
2.3 Heat Transfer 87
2.3.1 Conduction 88
2.3.2 Thermal Conductivity 89
2.3.3 Composite Wall 90
2.3.4 Rate of Cooling 91
2.3.5 Convection 92
2.3.6 Thermal Radiation 93
2.3.7 Radiation Emission 94
2.3.8 Radiation Emission Spectrum 95
2.3.9 Absorption and Emission 96
2.3.10 Radiative Heat Transfer 97
2.3.11 Equilibrium Temperature 99
2.3.12 Examples 100
2.4 Gases 102
2.4.1 Solids, Liquids and Gases 103
2.4.2 Pressure 104
2.4.3 Gas Laws 105
2.4.4 Phases of Matter 106
2.4.5 Examples 107
2.5 Work and Thermodynamics 108
2.5.1 Gas 109
2.5.2 1st Law of Thermodynamics 110
2.5.3 *p–V* Diagram 111
2.5.4 Example 112
2.6 Gas Processes 113
2.6.1 Gas Processes 114
2.6.2 Example 117

2.7 Heat Engines 118
2.7.1 Cyclic Processes 119
2.7.2 Otto Cycle 120
2.7.3 Thermal Efficiency 121
2.7.4 Carnot Cycle 122
2.7.5 Heat Sink in an Engine 123
2.7.6 Reversibility 124
2.7.7 Examples 125
2.8 Entropy 126
2.8.1 Reversible and Irreversible Processes 127
2.8.2 Entropy and Reversibility 128
2.8.3 Reversible Process 129
2.8.4 Entropy Change of the Universe 130
2.8.5 Entropy in a Cycle 131
2.8.6 Entropy 132
2.8.7 The 2nd Law of Thermodynamics 133
2.8.8 Examples 134
2.9 Kinetic Theory of Gases 136
2.9.1 Statistics of Motion 137
2.9.2 Pressure 138
2.9.3 Temperature 140
2.9.4 Molecular Motion 141
2.9.5 Equipartition of Energy 142
2.9.6 Specific Heat and Adiabatic Index 143
2.9.7 Internal Energy 144
2.9.8 Examples 145
2.10 Statistical Mechanics 146
2.10.1 Statistical Weight – Two-Level System 147
2.10.2 Statistical Weight – Multi-Level System 148
2.10.3 Boltzmann Energy Distribution 149
2.10.4 Velocity Distribution 150
2.10.5 Maxwell Velocity Distribution 151
2.10.6 Average rms and Most Probable Velocities 152
2.10.7 Collisions per Unit Area 153
2.11 Statistical Entropy 154
2.11.1 Equilibrium 155

2.11.2 Statistical Entropy....156
2.11.3 Adiabatic Expansion of a Gas into a Vacuum....157
2.11.4 Classical and Statistical Entropy....158
2.11.5 Constant Volume Heating of a Gas....159
2.11.6 Classical and Statistical Entropy....160
2.11.7 Entropy and the Flow of Natural Processes....161
2.11.8 Example....162
2.12 The Partition Function....163
2.12.1 Statistical Mechanics....164
2.12.2 Partition Function....165
2.12.3 Properties of the Partition Function....166
2.12.4 Degeneracy and the Partition Function....167
2.12.5 Partition Function – Multi-Level System....168
2.12.6 The Partition Function....169
2.12.7 Partition Function and Average Energy....170
2.12.8 Density of States....171
2.12.9 Energy Distribution for a Harmonic Oscillator....172
2.12.10 Average Energy....173

Part 3. Waves & Optics
3.1 Periodic Motion....176
3.1.1 Periodic Motion....177
3.1.2 Initial Phase Angle....178
3.1.3 Simple Harmonic Motion....179
3.1.4 Example....180
3.2 Waves....181
3.2.1 Waves....182
3.2.2 Wave Motion....183
3.2.3 Wavelength....184
3.2.4 Velocity, Frequency and Wavelength....185
3.2.5 Wave Velocity....186
3.2.6 Particle Displacement....187
3.2.7 Wave Equation....188
3.2.8 General Wave Equation....189
3.2.9 Energy Transfer by Wave Motion....190

3.2.10 Example 191
3.3 Superposition 192
3.3.1 Superposition 193
3.3.2 Interference 194
3.3.3 Fourier Analysis 196
3.3.4 Superposition for Waves in Opposite Directions 197
3.3.5 Standing Waves 198
3.3.6 Resonance 199
3.3.7 Beats 200
3.3.8 Longitudinal Waves 201
3.3.9 Sound Waves 202
3.3.10 Superposition of Longitudinal Waves 203
3.3.11 Sound Intensity 205
3.3.12 Hearing 206
3.3.13 Reflection and Absorption of Sound 207
3.3.14 Intensity Variations 208
3.3.15 Examples 209
3.4 Light 210
3.4.1 Light Rays 211
3.4.2 Reflection 212
3.4.3 Refraction 213
3.4.4 Total Internal Reflection 214
3.4.5 Dispersion 215
3.4.6 Example 216
3.5 Mirrors 217
3.5.1 Mirrors 218
3.5.2 Sign Conventions 219
3.5.3 Ray Diagrams 220
3.5.4 Example 221
3.6 Lenses 222
3.6.1 Thin Lens 223
3.6.2 Lens Action 224
3.6.3 Lenses 225
3.6.4 Ray Diagrams 226
3.6.5 The Eye 227
3.6.6 Near Point and Far Point 228

3.6.7 Lens Equations 229
3.6.8 Magnifying Glass 230
3.6.9 Magnification 231
3.6.10 Lens Aberrations 233
3.6.11 Example 234
3.7 Optical Instruments 235
3.7.1 Optical Instruments 236
3.7.2 Microscope 237
3.7.3 Astronomical Telescope 238
3.7.4 Special Case 239
3.7.5 Example 240
3.8 Interference 241
3.8.1 Interference 242
3.8.2 Fringe Spacing 243
3.8.3 Fringe Intensity 244
3.8.4 Thin Film Interference 245
3.8.5 Optical Path Length 246
3.8.6 Examples 247
3.9 Diffraction 248
3.9.1 Interference and Diffraction 249
3.9.3 Diffraction – Circular Aperture 250
3.9.4 Diffraction – Single Slit 251
3.9.5 Diffraction – Double Slit 254
3.9.6 Diffraction – Circular Aperture 255
3.9.7 Example 256
3.10 Polarisation 257
3.10.1 Polarised Light 258
3.10.2 Unpolarised Light 259
3.10.3 Sources of Polarised Light 260
3.10.4 Malus' Law 261
3.10.5 Example 262

Part 4. Electricity
4.1 Electricity 264
4.1.1 Electric Charge 265
4.1.2 Electric Flux 266

4.1.3 Conductors and Insulators....267
4.1.4 Electric Current....268
4.1.5 Conventional Current....269
4.1.6 Potential Difference....270
4.1.7 Resistance....271
4.1.8 Resistivity....272
4.1.9 Variation of Resistance....273
4.1.10 Electromotive Force....274
4.1.11 Capacitance....275
4.1.12 Dielectrics....276
4.1.13 Inductance....277
4.1.14 Inductors....278
4.1.15 Energy and Power....279
4.1.16 Circuits....280
4.1.17 Kirchhoff's Laws....281
4.1.18 Examples....282
4.2 Magnetism....283
4.2.1 Magnetic Field....284
4.2.2 Charged Particle in a Magnetic Field....285
4.2.3 Force on a Current-Carrying Conductor....286
4.2.4 Source of Magnetic Fields....287
4.2.5 Biot–Savart Law....288
4.2.6 Biot–Savart Law – Applications....289
4.2.7 Ampere's Law....290
4.2.8 Magnetic Moment....291
4.2.9 Magnetic Force....292
4.2.10 Permeability....293
4.2.11 Magnetic Materials....294
4.2.12 Ferromagnetism....295
4.2.13 Hysteresis....296
4.2.14 Example....297
4.3 Induction....298
4.3.1 Faraday's Law....299
4.3.2 Faraday's Law....300
4.3.3 Electromagnetic Induction....301
4.3.4 Lenz's Law....302

4.3.5 Mutual Inductance 303
4.3.6 Self-Inductance 304
4.3.7 Solenoids and Toroids 305
4.3.8 Electromagnetic Induction 306
4.3.9 Examples 307
4.4 Magnetic Circuits 308
4.4.1 Magnetomotive Force 309
4.4.2 Reluctance 310
4.4.3 Magnetic Circuits 311
4.4.4 Magnetic Circuits 312
4.4.5 Example 313
4.5 RC & RL Circuits 314
4.5.1 R-C Circuit Analysis 315
4.5.2 Time Constant and Half-Life 316
4.5.3 R-C Low Pass Filter 317
4.5.4 R-C High Pass Filter 318
4.5.5 R-L Circuits 319
4.5.6 R-L Circuits 320
4.5.7 R-L Filter Circuits 321
4.5.8 Integrator/Differentiator 322
4.5.9 Example 323
4.6 AC Circuits 324
4.6.1 AC Voltage 325
4.6.2 Resistance 326
4.6.3 rms Voltage and Current 327
4.6.4 Capacitive Reactance 328
4.6.5 Inductive Reactance 330
4.6.6 Reactive Power (capacitor) 331
4.6.7 Reactive Power (inductor) 332
4.6.8 LCR Series Circuit 333
4.6.9 LCR Circuit – Peak and rms Voltage 334
4.6.10 Impedance 335
4.6.11 Power in LCR Circuit 336
4.6.12 Apparent Power 337
4.6.13 Power Factor 338
4.6.14 Example 339

4.7 Electromagnetic Waves 340
4.7.1 Charging a Capacitor 341
4.7.2 Displacement Current 342
4.7.3 Ampere's Law 343
4.7.4 Maxwell's Equations 344
4.7.5 Electric and Magnetic Fields 345
4.7.6 Electromagnetic Waves 346
4.7.7 Periodic Electromagnetic Waves 347
4.7.8 Electromagnetic Waves in a Dielectric 348
4.7.9 Energy in Electromagnetic Waves 349
4.7.10 Intensity of an Electromagnetic Wave 350
4.7.11 Examples 351

Part 5. Properties of Matter
5.1 Solids 354
5.1.1 Hooke's Law 355
5.1.2 Stress 356
5.1.3 Strain 357
5.1.4 Poisson's Ratio 358
5.1.5 Mechanical Properties of Materials 359
5.1.6 Linear Elasticity 360
5.1.7 Viscoelastic Materials 361
5.1.8 Griffith Energy Balance 362
5.1.9 Examples 363
5.2 Fluids 364
5.2.1 Fluids 365
5.2.2 Hydrostatic Pressure 366
5.2.3 Archimedes' Principle 367
5.2.4 Surface Tension 368
5.2.5 Contact Angle 369
5.2.6 Surface Tension Force 370
5.2.7 Coefficient of Surface Tension 371
5.2.8 Capillary Action 372
5.2.9 Bernoulli's Equation 373
5.2.10 Viscosity 374
5.2.11 Fluid Flow 375

5.2.12 Turbulent Flow 376
5.2.13 Examples 377

Part 6. Atomic Physics

6.1 The Atom 380
6.1.1 Atoms 381
6.1.2 The Electron 382
6.1.3 Electrostatic Deflection 383
6.1.4 Magnetic Deflection 384
6.1.5 Millikan's Oil Drop Experiment 385
6.1.6 Mass of a Proton 386
6.1.7 Example 387
6.2 The Bohr Atom 388
6.2.1 Black Body Radiation 389
6.2.2 Photoelectric Effect 390
6.2.3 Line Spectra 391
6.2.4 Bohr Atom 392
6.2.5 Energy Levels 393
6.2.6 The Rydberg Constant 394
6.2.7 Electron Absorption 395
6.2.8 Photon Absorption 396
6.2.9 Matter Waves 397
6.2.10 Electron-Volt 398
6.2.11 Example 399
6.3 Black Body Radiation 400
6.3.1 Black Body Radiation 401
6.3.2 Radiation Emission Spectrum 402
6.3.3 Classical Cavity Radiation 403
6.3.4 Density of States 404
6.3.5 Rayleigh–Jeans Radiation Law 405
6.3.6 The Ultraviolet Catastrophe 406
6.3.7 Statistical Mechanics 407
6.3.8 Planck's Radiation Law 408
6.3.9 Significance of Planck's Radiation Law 409
6.3.10 Forms of Planck's Radiation Law 410
6.3.11 Stefan–Boltzmann Law 411

6.3.12 Wien Displacement Law 412
6.4 X-Rays 413
6.4.1 X-Rays 414
6.4.2 Continuous Radiation 415
6.4.3 Characteristic Radiation 416
6.4.4 X-Ray Absorption 417
6.4.5 X-Ray Scattering 418
6.4.6 Compton Effect 419
6.4.7 X-Ray Diffraction 420
6.5 Quantum Mechanics 421
6.5.1 Schrödinger Equation 422
6.5.2 Solution to the Schrödinger Equation 423
6.5.3 Interpretation of the Wave Function 424
6.5.4 The Time-Dependent Equation 425
6.5.5 Solutions to the Wave Equation 426
6.5.6 Zero Potential 427
6.5.7 Particle in a Box 428
6.5.8 Infinite Square Well 429
6.5.9 Harmonic Oscillator 430
6.5.10 Coulomb Potential – Bohr Atom 431
6.5.11 Heisenberg Uncertainty Principle 433
6.6 Solids 434
6.6.1 Density of Vibrational States 435
6.6.2 Lattice Waves 436
6.6.3 Einstein Harmonic Oscillator Model 437
6.6.4 Debye Lattice Model 438
6.6.5 Phonons 439

Part 7. The Nucleus
7.1 The Nucleus 442
7.1.1 Radioactivity 443
7.1.2 Rutherford's Experiment 444
7.1.3 The Nucleus 445
7.1.4 Specifying an Element 446
7.1.5 Radioactive Decay 447
7.1.6 Radioactive Series 448

7.1.7 Half-Life 449
7.1.8 Isotopes 450
7.2 Nuclear Reactions 451
7.2.1 Quarks 452
7.2.2 Nuclear Forces 453
7.2.3 Nuclear Binding Energy 454
7.2.4 Nuclear Binding Energy 455
7.2.5 Nuclear Binding Energy per Nucleon 456
7.2.6 Artificial Nuclear Reactions 457
7.2.7 Fission 458
7.2.8 Stability 459
7.2.9 Fission and Fusion 460
7.2.10 Chain Reaction 461
7.2.11 Example 462

Part 8. Relativity
8.1 Absolute Rest 464
8.1.1 Wave Motion 465
8.1.2 Doppler Effect 466
8.1.3 Velocity of Light 467
8.1.4 Electromagnetic Waves 468
8.1.5 Luminiferous Ether 469
8.1.6 Ether Drift 470
8.1.7 Michelson–Morley Experiment 471
8.1.8 Example 472
8.2 Special Relativity 473
8.2.1 The Principle of Relativity 474
8.2.2 Frames of Reference 475
8.2.3 Distance 476
8.2.4 Velocity & Acceleration 477
8.2.5 Postulates of Special Relativity 478
8.2.6 Time Dilation 479
8.2.7 Proper Time 480
8.2.8 Length Contraction 481
8.2.9 Lorentz Transformations 482
8.2.10 Lorentz Velocity Transformations 483

8.2.11 Momentum and Mass Transformations 484
8.2.12 Mass and Energy Transformations 485
8.2.13 Energy and Momentum 486
8.2.14 Doppler Effect for Light Waves 487
8.2.15 Consequences of Special Relativity 488
8.2.16 Special Relativity Summary 489
8.2.17 Example 490
8.3 General Relativity 491
8.3.1 General Relativity and Special Relativity 492
8.3.2 Space-Time 493
8.3.3 Light-Cone 494
8.3.4 Distance in Space-Time 495
8.3.5 Invariance in Space-Time 496
8.3.6 Past, Present and Future 497
8.3.7 Gravity 498
8.3.8 Gravity and Space-Time 499
8.3.9 Einstein Field Equations 500
8.3.10 Gravity and Quantum Theory 501

Part 9. Universe
9.1 Solar System 504
9.1.1 Copernicus, Tycho and Kepler 505
9.1.2 Kepler's Laws 506
9.1.3 Formation of Stars and Galaxies 507
9.1.4 Luminosity 508
9.1.5 Lifecycle of Stars 509
9.1.6 Energy and Matter 510
9.1.7 The Solar System 511
9.1.8 Sun 512
9.1.9 Solar Atmosphere 513
9.1.10 Solar Wind 514
9.1.11 Solar Radiation 515
9.1.12 Earth 516
9.1.13 Earth's Magnetic Field 517
9.1.14 Atmosphere 518
9.1.15 Examples 519

9.2 Universe 520
9.2.1 Size of the Universe 521
9.2.2 Expansion of the Universe 522
9.2.3 Beginning of the Universe 523
9.2.4 Forces of Nature 524
9.2.5 Particles of Nature 525
9.2.6 The Big Bang 526
9.2.7 End of the Universe 527

Bibliography 529
Index **531**
