Abbreviations	xix

Part A Principles and Rules

1 Flow and Ultrasound Basics	2		
Flow Dynamics	2		
Physics of Flow	2		
Flow Pattern and Flow Velocity	2		
Ultrasound Principles	3		
Doppler Effect	3		
Doppler Shift and Flow Velocity	4		
Ultrasound Systems	6		
Ultrasound Transducer	7		
Imaging Modalities, Parameters, and Settings ...	8		
Imaging Modalities	8		
Parameters and Settings	12		
Artifacts	15		
Artifacts in Gray-scale Imaging	15		
Refraction and Mirror Artifacts	16		
Artifacts in Color-mode Imaging	17		
Artifacts in Doppler Spectrum Analysis	17		
Safety Considerations	17		
2 Vascular Anatomy and Structure of Ultrasound			
Examination	18		
General Arterial Anatomy	18		
Extracranial Arterial Anatomy	18		
Intracranial Arterial Anatomy	21		
General Structure of Arterial			
Ultrasound Examination	24		
Special Arterial Anatomy and			
Ultrasound Anatomy	25		
Extracranial Arteries	25		
Intracranial Arteries	34		
General Venous Anatomy	61		
Intracranial Venous Anatomy	62		
Extracranial Venous Anatomy	62		
General Structure of Venous			
Ultrasound Examination	64		
Special Venous Anatomy and Ultrasound			
Anatomy	64		
Intracranial Veins and Sinuses	64		
Extracranial Veins	71		
3 Intracranial Hemodynamics and Functional Tests ..	79		
Analysis of Cerebral Blood Flow	79		
Autoregulation	80		
Testing of Autoregulation	81		
Neurovascular Coupling	82		
Testing of Neurovascular Coupling	82		
Metabolic Coupling	83		
Testing of Metabolic Coupling	83		
Other Tests to Assess Differences Between			
the Right and Left Sides as Markers of			
Impaired Collateral Function	84		
Parameters of Cerebral Hemodynamics	86		
Cerebral Blood Flow Velocity	86		
Resistance Indices	86		
Cerebral Blood Flow Volume	86		
Cerebral Circulation Time	87		
Cerebral Blood Volume	88		
4 Pathogenesis of Stroke	90		
Arterial Ischemia	90		
Pathophysiology	90		
Classification of Arterial Stroke	91		
Microembolic Signals	100		
Spontaneous Microemboli	100		
Detection of Microemboli in Patent			
Foramen Ovale	102		
Venous Ischemia	103		
5 Vascular Pathology	106		
Arterial Pathology	106		
Vessel Wall Pathology	106		
Tortuosity	107		
Intima-media Thickness	108		
Atherosclerotic Plaques	108		
Arterial Stiffness	113		
Dissection	113		
Fibromuscular Dysplasia (FMD)	114		
Vasculitis/Arteritis	115		
Carotidynia and Carotid Artery Vasospasm .	115		
Stenoses and Occlusions	118		
Ultrasound Criteria of Stenoses	118		
Ultrasound Criteria of Occlusions	125		
Extracranial Pathology	125		
Extracranial Anterior Circulation	125		
Extracranial Posterior Circulation	133		
Intracranial Pathology	138		
Stenoses	138		
Occlusions	144		
Intracranial Anterior Circulation	145		
Intracranial Posterior Circulation	153		
Collateral Pathways	161		
Intracranial Collateral Pathways	162		
Intracranial Collateral Pathways in ICA			
Occlusive Processes	167		
Intracranial Collateral Pathways in VA			
Occlusive Processes	172		

Extracranial Collateral Pathways in VA		Midline and Midline Shift	180
Occlusive Processes	173	Intracranial Hemorrhage	180
Clinical Relevance of Collateral Pathways ...	173	Parenchymal Hemorrhage	180
Venous Pathology	175	Subdural and Epidural Hematoma	182
Cerebral Venous Thrombosis	175		
Superior Sagittal Sinus Occlusion	175	6 Angiographic Techniques in Neuroradiology	183
Deep Cerebral Venous System Occlusion ...	176	Choice of Imaging Techniques	183
Lateral Sinus (Transverse and Sigmoid Sinus)		Digital Subtraction Angiography (DSA)	183
Occlusion	176	Historical Development	183
Flow Abnormalities in Cerebral		Technical Aspects of Diagnostic Angiography ...	184
Venous Thrombosis	176	Technical Aspects of Mechanical	
Ultrasonography of the Internal Jugular		Thrombectomy	185
Vein in Intensive Care Patients	178	Advantages and Disadvantages	185
Central Venous Cannulation	178	Magnetic Resonance Angiography (MRA)	187
Indirect Assessment of Central Venous		Historical Development	187
Pressure (CVP)	178	Technical Aspects	187
Intracranial Stroke-related B-mode		Advantages and Disadvantages	190
Pathology	178	Computed Tomographic Angiography (CTA)	191
Ventricles	178	Historical Development	191
Hydrocephalus	179	Technical Aspects	192
Papilledema and Optic Nerve Sheath Diameter ...	179	Advantages and Disadvantages	192

Part B Case Histories

Case 1 Right Extracranial Internal Carotid Artery

Stenosis	197
Clinical Presentation	197
Initial Neuroradiologic Findings	197
Suspected Diagnosis	197
Questions to Answer Using Ultrasound Techniques ...	197
Initial Neurosonologic Findings	197
MRI	197
CT Angiography	197
Clinical Course	198
Final Diagnosis	198
Discussion	199

Case 2 Free-floating Thrombus of the Left Internal Carotid Artery

Clinical Presentation	205
Initial Neuroradiologic Findings	205
Diagnosis	205
Question to Answer by Ultrasound Techniques	205
Initial Neurosonologic Findings (Day 1)	205
Clinical Course	205
Neurosonologic Findings (Day 20)	206
Final Diagnosis	206
Discussion	206

Case 3 Left Common Carotid Artery Occlusion

Clinical Presentation	210
Initial Neuroradiologic Findings	210
Suspected Diagnosis	210
Questions to Answer by Ultrasound Techniques	210
Initial Neurosonologic Findings	210
Clinical Course	210
Final Diagnosis	211
Discussion	211

Case 4 Left Temporal Arteriovenous Malformation

Clinical Presentation	215
Initial Neuroradiologic Findings	215
Suspected Diagnosis	215
Questions to Answer by Ultrasound Techniques	215
Initial Neurosonologic Findings	215
Conventional Angiography	215
Clinical Course	216
Final Diagnosis	216
Discussion	218

Case 5 Left M1 Middle Cerebral Artery Stenosis

Clinical Presentation	222
Initial Neuroradiologic Findings	222
Suspected Diagnosis	222
Conventional Angiography (Day 2)	222
Clinical Course	222
Questions to Answer by Ultrasound Techniques	222
Initial Neurosonologic Findings	222
Final Diagnosis	224
Discussion	224

Case 6 Left P2 Posterior Cerebral Artery Stenosis

Clinical Presentation	230
Initial Neuroradiologic Findings	230
Suspected Diagnosis	230
Questions to Answer by Ultrasound Techniques	230
Initial Neurosonologic Findings (Day 2)	230
Clinical Course	230
Final Diagnosis	232
Discussion	232

Case 7 Cerebral Circulatory Arrest	235	Clinical Course (2)	270
Clinical Presentation	235	Follow-up Neurosonologic Findings (Day 7).....	270
Initial Neuroradiologic Findings.....	235	Clinical Course (3)	270
Suspected Diagnosis	235	Follow-up Neurosonologic Findings (6 Months).....	270
Clinical Course (1)	235	Final Diagnosis	271
Cerebral CT.....	235	Discussion	276
Question to Answer by Ultrasound Techniques.....	235		
Initial Neurosonologic Findings	235	Case 12 Extracranial Bilateral Internal Carotid Artery and Right Vertebral Artery Occlusion, and Left Vertebral Artery Stenosis	281
Clinical Course (2)	235	Clinical Presentation	281
Final Diagnosis	236	Initial Neuroradiologic Findings.....	281
Discussion	236	Suspected Diagnosis	281
		Questions to Answer by Ultrasound Techniques.....	281
Case 8 Basilar Artery Occlusion in Bilateral Intracranial V4 Vertebral Artery Stenosis ...	244	Initial Neurosonologic Findings	281
Clinical Presentation	244	Clinical Course	282
Initial Neuroradiologic Findings.....	244	Final Diagnosis	285
Suspected Diagnosis	244	Discussion	285
Conventional Angiography (Day 1)	244		
Clinical Course (1)	244	Case 13 Right Internal Carotid Artery Stenosis in Fibromuscular Dysplasia and Granulomatosis with Polyangiitis (formerly Wegener's Granulomatosis)	288
Questions to Answer by Ultrasound Techniques.....	244	Clinical Presentation	288
Initial Neurosonologic Findings (Day 42).....	244	Initial Neuroradiologic Findings.....	288
Neuroradiologic Findings.....	247	Suspected Diagnosis	288
Clinical Course (2)	247	Question to Answer by Ultrasound Techniques.....	288
Final Diagnosis	247	Initial Neurosonologic Findings (Day 1).....	288
Discussion	247	Clinical Course (1)	288
		Conventional Angiography (Day 5)	289
Case 9 Moyamoya Disease	251	Clinical Course (2)	289
Clinical Presentation	251	Follow-up Neurosonologic Findings (5 Years).....	289
Initial Neuroradiologic Findings.....	251	Final Diagnosis	290
Suspected Diagnosis	251	Discussion	291
Conventional Angiography (Day 3)	251		
Clinical Course (1)	251	Case 14 Isolated Left Carotid Siphon Stenosis	295
Questions to Answer by Ultrasound Techniques.....	251	Clinical Presentation	295
Initial Neurosonologic Findings (Week 6)	251	Initial Neuroradiologic Findings.....	295
Clinical Course (2)	255	Suspected Diagnosis	295
Follow-up Neurosonologic Findings (3 Months).....	256	Questions to Answer by Ultrasound Techniques.....	295
Final Diagnosis	256	Initial Neurosonologic Findings	295
Discussion	256	Clinical Course	295
		Final Diagnosis	297
Case 10 Thrombolysis of M1 Middle Cerebral Artery Occlusion	260	Discussion	297
Clinical Presentation	260		
Initial Neuroradiologic Findings.....	260	Case 15 Near-occlusion of the Right and High-grade Stenosis of the Left Extracranial Internal Carotid Artery	300
Suspected Diagnosis	260	Clinical Presentation	300
Clinical Course (1)	260	Initial Neuroradiologic Findings.....	300
Questions to Answer by Ultrasound Techniques.....	260	Suspected Diagnosis	300
Initial Neurosonologic Findings	260	Questions to Answer by Ultrasound Techniques.....	300
Clinical Course (2)	260	Initial Neurosonologic Findings	300
Follow-up Neurosonologic Findings (1 Hour).....	260	Conventional Angiography (Day 3)	301
Clinical Course (3)	261	Clinical Course (1)	301
Final Diagnosis	261	Follow-up Neurosonologic Findings (6 Weeks).....	301
Discussion	262	Clinical Course (2)	301
		Follow-up Neuroradiologic Findings (2 Months).....	301
Case 11 Secondary Occlusion in Left-sided Extracranial Internal Carotid Artery Dissection	269	Follow-up Neurosonologic Findings (3 Months).....	301
Clinical Presentation	269	Final Diagnosis	310
Initial Neuroradiologic Findings.....	269	Discussion	310
Suspected Diagnosis	269		
Questions to Answer by Ultrasound Techniques.....	269		
Initial Neurosonologic Findings (Day 1).....	269		
Clinical Course (1)	269		
Questions to Answer by Ultrasound Techniques.....	270		
Follow-up Neurosonologic Findings (Day 2).....	270		

Case 16 Giant Cell Arteritis with Bilateral Intracranial V4 Vertebral Artery Stenosis	313	Case 20 Right Internal Carotid Artery Dissection with Fast Recanalization	345
Clinical Presentation	313	Clinical Presentation	345
Initial Neuroradiologic Findings	313	Initial Neuroradiologic Findings	345
Suspected Diagnosis	313	Suspected Diagnosis	345
Questions to Answer by Ultrasound Techniques	313	Questions to Answer by Ultrasound Techniques	345
Initial Neurosonologic Findings (Day 1)	313	Initial Neurosonologic Findings (Day 1)	345
Clinical Course (1)	313	Evaluation of Collateral Function	345
Follow-up Neurosonologic Findings (6 Weeks)	314	Conventional Angiography	346
Clinical Course (2)	315	Clinical Course (1)	346
Final Diagnosis	315	Follow-up Neurosonologic Findings (Day 20)	347
Discussion	315	Clinical Course (2)	347
Case 17 Ascending Left Middle Cerebral Artery Occlusion in an HIV-positive Patient	320	Final Diagnosis	348
Clinical Presentation	320	Discussion	348
Initial Neuroradiologic Findings	320	Case 21 Mid-basilar Artery Occlusion Due to Intracranial Dissection	354
Suspected Diagnosis	320	Clinical Presentation	354
Questions to Answer by Ultrasound Techniques	320	Initial Neuroradiologic Findings	354
Initial Neurosonologic Findings (Day 1)	320	Suspected Diagnosis	354
Conventional Angiography (Day 3)	320	Clinical Course (1)	354
Clinical Course	321	Follow-up Neuroradiologic Findings (Day 3)	354
Final Diagnosis	322	Questions to Answer by Ultrasound Techniques	354
Discussion	322	Initial Neurosonologic Findings (Day 3)	354
Case 18 Traumatic Bilateral Internal Carotid and Vertebral Artery Dissection with Right-sided Embolic Middle Cerebral Artery Occlusion	327	Conventional Angiography (Day 4)	355
Clinical Presentation	327	Clinical Course (2)	355
Neuroradiologic Findings (Day 2)	327	Final Diagnosis	356
Suspected Diagnosis	327	Discussion	356
Conventional Angiography with Endovascular Thrombectomy (Day 2)	327	Case 22 Right Mid-part M1 Middle Cerebral Artery Occlusion with Prominent Early Temporal Branch and Patent Foramen Ovale	362
Clinical Course (1)	327	Clinical Presentation	362
Questions to Answer by Ultrasound Techniques	327	Initial Neuroradiologic Findings	362
Initial Neurosonologic Findings (Day 3)	328	Suspected Diagnosis	362
Clinical Course (2)	330	Questions to Answer by Ultrasound Techniques	362
Second Conventional Angiography (Day 4)	330	Initial Neurosonologic Findings (Day 1)	362
Clinical Course (3)	331	Clinical Course (1)	362
Follow-up Neurosonologic Findings (Day 21)	331	Questions to Answer by Ultrasound Techniques	363
Follow-up MRI and MR Angiography (8 Months)	332	Neurosonologic Findings (Day 10)	363
Follow-up Neurosonologic Findings (After 1 Year)	332	Neuroradiologic Findings (Day 11)	364
Clinical Course (4)	334	Clinical Course (2)	364
Final Diagnosis	334	Final Diagnosis	365
Discussion	334	Discussion	366
Case 19 Bilateral Extracranial Vertebral Artery Dissection with Distal Occlusion of the Right Vertebral Artery	339	Case 23 Takayasu's Arteritis with Right-sided Subclavian Steal	372
Clinical Presentation	339	Clinical Presentation	372
Initial Neuroradiologic Findings	339	Initial Neuroradiologic Findings	372
Suspected Diagnosis	339	Suspected Diagnosis	372
Questions to Answer by Ultrasound Techniques	339	Questions to Answer by Ultrasound Techniques	372
Initial Neurosonologic Findings	339	Initial Neurosonologic Findings	372
Conventional Angiography	339	Conventional Angiography	372
Clinical Course	340	Clinical Course (1)	373
Final Diagnosis	340	Question to Answer by Ultrasound Techniques (6 Months)	373
Discussion	340	Neurosonologic Findings (6 Months)	373
Case 20 Right Internal Carotid Artery Dissection with Fast Recanalization	345	Clinical Course (2)	374
Clinical Presentation	345	Questions to Answer by Ultrasound Techniques (8 Months)	376
Initial Neuroradiologic Findings	345		
Suspected Diagnosis	345		
Questions to Answer by Ultrasound Techniques	345		
Initial Neurosonologic Findings (Day 1)	345		
Evaluation of Collateral Function	345		
Conventional Angiography	346		
Clinical Course (1)	346		
Follow-up Neurosonologic Findings (Day 20)	347		
Clinical Course (2)	347		
Final Diagnosis	348		
Discussion	348		

Neurosonologic Findings (8 Months)	376	Conventional Angiography	403
Final Diagnosis	376	Clinical Course	403
Discussion	376	Final Diagnosis	403
		Discussion	406
Case 24 Dissection of the Right Extracranial Internal Carotid Artery and Left M1 Middle Cerebral Artery.....	380	Case 28 Subclavian Steal in Left Subclavian Artery and Right Internal Carotid Artery Occlusion Leading to Extracranial- Intracranial Bypass Surgery.....	409
Clinical Presentation	380	Clinical Presentation	409
Initial Neuroradiologic Findings.....	380	Initial Neuroradiologic Findings.....	409
Suspected Diagnosis	380	Suspected Diagnosis	409
Clinical Course (1)	380	Questions to Answer by Ultrasound Techniques	409
MRI and MR Angiography (10:00 Hours).....	380	Initial Neurosonologic Findings (Day 1).....	409
Questions to Answer by Ultrasound Techniques	380	Conventional Angiography (Day 2)	410
Neurosonologic Findings (12:00 Hours)	380	Clinical Course (1)	410
Conventional Angiography (16:00 Hours).....	381	Follow-up Neurosonologic Findings (4 Weeks)	410
Clinical Course (2)	382	Clinical Course (2)	410
Questions to Answer by Ultrasound Techniques	383	Final Diagnosis	410
Follow-up Neurosonologic Findings (6 Months).....	383	Discussion	415
Conventional Angiography	384		
Clinical Course (3)	384	Case 29 Cerebral Venous Thrombosis	420
Final Diagnosis	384	Clinical Presentation	420
Discussion	384	Initial Neuroradiologic Findings.....	420
		Suspected Diagnosis	420
Case 25 Progressive Right M1 Middle Cerebral Artery Occlusion Treated with Extracranial-Intracranial Bypass Surgery	388	Questions to Answer by Ultrasound Techniques	420
Clinical Presentation	388	Initial Neurosonologic Findings (Day 1).....	420
Initial Neuroradiologic Findings.....	388	CT Angiography (CTA) (Day 1).....	420
Suspected Diagnosis	388	Clinical Course (1)	420
Questions to Answer by Ultrasound Techniques	388	Question to Answer by Ultrasound Techniques	420
Initial Neurosonologic Findings (Day 2).....	388	Follow-up Neurosonologic Findings (Day 90).....	420
Conventional Angiography (Day 4)	388	Question to Answer by Ultrasound Techniques	421
Clinical Course (1)	389	Follow-up Neurosonologic Findings (Day 180)	421
Clinical Course (2) and Follow-up Neuroradiologic Findings.....	391	Clinical Course (2)	421
Follow-up Neurosonologic Findings (10 Months).....	391	Final Diagnosis	421
Clinical Course (3)	392	Discussion	424
Final Diagnosis	392		
Discussion	392	Case 30 Multilocular Extra- and Intracranial Stenoses and Occlusions	427
		Clinical Presentation	427
Case 26 Extracranial Left Vertebral Artery Dissecting Aneurysm Following Basilar Artery Stenting.....	396	Initial Neuroradiologic Findings (Day 1)	427
Clinical Presentation	396	Suspected Diagnosis	427
Initial Neuroradiologic Findings.....	396	Questions to Answer by Ultrasound Techniques	427
Suspected Diagnosis	396	Initial Neurosonologic Findings (Day 20).....	427
Conventional Angiography	396	Conventional Angiography (Day 22).....	428
Clinical Course (1)	396	Clinical Course (1)	428
Questions to Answer by Ultrasound Techniques	396	Questions to Answer by Ultrasound Techniques	428
Initial Neurosonologic Findings (Day 1).....	396	Follow-up Neurosonologic Findings (Day 29).....	428
Cranial CT and CT Angiography (Day 1).....	397	Clinical Course (2)	429
Clinical Course (2)	397	Follow-up Neurosonologic Findings (3 Months)	429
Final Diagnosis	397	Final Diagnosis	429
Discussion	399	Discussion	437
Case 27 Diffuse Cerebral Angiomas.....	402	Case 31 Dissection of the Left Internal Carotid Artery C6 Segment.....	440
Clinical Presentation	402	Clinical Presentation	440
Initial Neuroradiologic Findings.....	402	Initial Neuroradiologic Findings.....	440
Suspected Diagnosis	402	Suspected Diagnosis	440
Questions to Answer by Ultrasound Techniques	402	Questions to Answer by Ultrasound Techniques	440
Initial Neurosonologic Findings	402	Initial Neurosonologic Findings (Day 2).....	440
		Follow-up Neuroradiologic Findings (Day 2)	440

Clinical Course (1)	440	Final Diagnosis	474
Follow-up Neurosonologic Findings (Day 120)	440	Discussion	474
Follow-up Neuroradiologic Findings (Day 120)	442		
Clinical Course (2)	442	Case 36 Postpartum Angiopathy (Reversible Cerebral Vasoconstriction Syndrome)	476
Final Diagnosis	442	Clinical Presentation	476
Discussion	442	Initial Neuroradiologic Findings	476
		Conventional Angiography (Day 2)	476
Case 32 Right Temporal Hemorrhage in Pial Arteriovenous Malformation	444	Suspected Diagnosis	476
Clinical Presentation	444	Clinical Course (1)	476
Initial Neuroradiologic Findings	444	Questions to Answer by Ultrasound Techniques	476
Suspected Diagnosis	444	Initial Neurosonologic Findings (Day 5)	476
Questions to Answer by Ultrasound Techniques	444	Neuroradiologic Findings (Day 6)	478
Initial Neurosonologic Findings	444	Follow-up Neurosonologic Findings (Day 6)	478
MRI, MR Angiography, and Dynamic MR Angiography	444	Follow-up Neurosonologic Findings (Days 7–17)	478
Conventional Angiography	444	Clinical Course (2)	478
Clinical Course	446	Follow-up Neurosonologic Findings (6 Months)	479
Final Diagnosis	446	Final Diagnosis	479
Discussion	446	Discussion	479
Case 33 Subarachnoid Hemorrhage after Rupture of Left Supraorbital Internal Carotid Artery Aneurysm	448	Case 37 Left Anterior Choroidal Artery Infarction in Left Supraorbital Internal Carotid Artery Occlusion	483
Clinical Presentation	448	Clinical Presentation	483
Initial Neuroradiologic Findings	448	Initial Neuroradiologic Findings	483
Conventional Angiography	448	Suspected Diagnosis	483
Diagnosis	448	Questions to Answer by Ultrasound Techniques	483
Clinical Course (1)	448	Neurosonologic Findings (Day 3)	483
Questions to Answer by Ultrasound Techniques	448	Digital Subtraction Angiography (Day 5)	483
Initial Neurosonologic Findings (Day 2)	448	Clinical Course	487
Neurosonologic Findings (Day 3 to Day 5)	448	Final Diagnosis	487
Neurosonologic Findings (Day 6)	449	Discussion	487
CT (Day 6)	450		
Conventional Angiography (Day 9)	451	Case 38 Left-sided Amaurosis in Left Central Retinal Artery Occlusion	489
Neurosonologic Findings (Day 9)	451	Clinical Presentation	489
Neurosonologic Findings (Day 10 to Day 17)	452	Initial Neuroradiologic Findings	489
CT and CTA (Day 16)	452	Suspected Diagnosis	489
Neurosonologic Findings (Day 18 to Day 40)	454	Questions to Answer by Ultrasound Techniques	489
Clinical Course (2)	454	Initial Neurosonologic Findings	489
Discussion	454	Clinical Course (1)	489
		Follow-up Neuroradiologic Findings (Day 3)	489
		Clinical Course (2)	490
		Follow-up Neurosonologic Findings (3 Months)	490
		Final Diagnosis	490
		Discussion	490
Case 34 Right-sided Occipital Dural Arteriovenous Fistula	460		
Clinical Presentation	460	Case 39 Combined Chronic Right-sided Extracranial Internal Carotid Artery and Middle Cerebral Artery Occlusion	494
Initial Neuroradiologic Findings	460	Clinical Presentation	494
Suspected Diagnosis	460	Initial Neuroradiologic Findings	494
Questions to Answer by Ultrasound Techniques	460	Suspected Diagnosis	494
Initial Neurosonologic Findings	460	Questions to Answer by Ultrasound Techniques	494
Conventional Angiography	464	Neurosonologic Findings (Day 2)	494
Clinical Course (1)	464	Clinical Course	495
Clinical Course (2)	465	Final Diagnosis	496
Final Diagnosis	465	Discussion	496
Discussion	465		
		Case 40 Left Internal Carotid Artery Occlusion and Ipsilateral Arteriovenous Malformation in Inflammatory Bowel Disease	500
Case 35 Left Distal Vertebral Artery Occlusion and Right Vertebral Artery Hypoplasia with Retrograde Basilar Artery Flow	470	Clinical Presentation	500
Clinical Presentation	470	Initial Neuroradiologic Findings	500
Initial Neuroradiologic Findings	470		
Suspected Diagnosis	470		
Questions to Answer by Ultrasound Techniques	470		
Neurosonologic Findings (Day 3)	470		
Clinical Course	474		

Suspected Diagnosis	500	Follow-up Neurosonologic Findings over 4 Years	524
Questions to Answer by Ultrasound Techniques	500	Clinical Course	524
Initial Neurosonologic Findings	500	Neuroradiologic Findings.....	524
MRI, MR Angiography, and Dynamic MR Angiography	502	Neurosonologic Findings after Bone Marrow Transplantation.....	524
Clinical Course	502	Discussion	525
Follow-up Neurosonologic Findings (10 Months).....	502		
Final Diagnosis	506	Case 44 Transient Global Amnesia with Left Hippocampal Diffusion-weighted Lesion and Asymptomatic Right Middle Cerebral Artery Infarction in High-grade Right M1 Stenosis.	529
Discussion	506	Clinical Presentation	529
Case 41 Right Internal Carotid Artery as the Remaining Patent Brain-supplying Artery	509	Initial Neuroradiologic Findings.....	529
Clinical Presentation	509	Suspected Diagnosis	529
Initial Neuroradiologic Findings.....	509	Questions to Answer by Ultrasound Techniques	529
Suspected Diagnosis	509	Initial Neurosonologic Findings (Day 1).....	529
Questions to Answer by Ultrasound Techniques	509	Clinical Course	530
Neurosonologic Findings (Day 2).....	509	Final Diagnosis	530
Clinical Course	512	Discussion	530
Final Diagnosis	515		
Discussion	515	Case 45 Bilateral Proximal Vertebral Artery Stenosis and Bilateral Middle Cerebral Artery Aneurysm	535
Case 42 Left Internal Carotid Artery Aplasia as an Incidental Diagnosis in Optic Neuritis in Lupus Erythematosus	517	Clinical Presentation	535
Clinical Presentation	517	Initial Neuroradiologic Findings.....	535
Suspected Diagnosis	517	Suspected Diagnosis	535
Initial Neuroradiologic Findings.....	517	Questions to Answer by Ultrasound Techniques	535
Questions to Answer by Ultrasound Techniques	517	Initial Neurosonologic Findings (Day 1).....	535
Initial Neurosonologic Findings	517	Clinical Course (1)	535
Clinical Course	521	Follow-up Neurosonologic Findings	539
Final Diagnosis	521	MRI	539
Discussion	521	Clinical Course (2)	539
Case 43 Sickle Cell Disease	524	Conventional Angiography	539
Clinical Presentation	524	Follow-up Neurosonologic Findings.....	539
Questions to Answer by Ultrasound	524	Clinical Course (3)	539
Initial Neurosonologic Findings	524	Final Diagnosis	539
		Discussion	539
