

CONTENTS

Preface	3
---------	---

GENERAL AND PHYSICAL CHEMISTRY

1. Basic Principles	5
1.1. The Nature of Matter	5
1.2. Changes of State	5
1.3. The Structure of Matter	6
1.3.1. Atom	6
1.3.2. Proton Number and Nucleon Number	6
1.3.3. Elements and Compounds	7
1.3.4. Nuclides and Isotopes	7
1.3.5. Ions	8
2. Nomenclature	8
2.1. Symbols and Formulas	8
2.2. Oxidation Numbers	9
2.3. Greek and Latin Numerical Prefixes	9
2.4. Cations	10
2.4.1. Monoatomic Cations	10
2.4.2. Polyatomic Cations	10
2.5. Anions	10
2.5.1. Monoatomic Anions	10
2.5.2. Polyatomic Anions	10
2.5.2.1. Some Diatomic Anions Derived from Acids not Containing Oxygen	10
2.5.2.2. Oxoanions	11
2.5.2.3. Anions of Polyacids	11
2.6. Binary Compounds	12
2.6.1. Binary and Pseudobinary Compounds Consisting of electropositive and electronegative components	12
2.6.2. Binary Compounds of Hydrogen with Elements of Groups III-VI (Volatile Hydrides)	12
2.7. Acids	13
2.7.1. Binary and Pseudobinary Acids	13
2.7.2. Oxoacids	13
2.7.3. Polyacids	14
2.8. Salts	15
2.8.1. Simple Salts (Normal Salts)	15

2.8.2.	Acid Salts (Hydrogen Salts)	15
2.8.3.	Double Salts	16
2.8.4.	Oxide and Hydroxide Salts	16
2.8.5.	Mixed Salts	16
2.8.6.	Hydrated Salts (Salt Hydrates)	16
2.9.	Types of Formulas of Compounds	17
2.9.1.	Stoichiometric Formula (Empirical Formula)	17
2.9.2.	Molecular Formula	17
2.9.3.	Structural Formula (Constitutional Formula)	18
2.9.4.	Condensed Structural Formula	18
2.9.5.	Electron Structural Formula	18
2.9.6.	Geometrical Formula (Configurational Formula)	18
3.	The Periodic Table of Elements	19
3.1.	The Arrangement of the Periodic Table	19
3.2.	Periodicity of Properties	20
4.	The Arrangement of Electrons	23
4.1.	The Bohr Atomic Model	23
4.2.	The Wave-Mechanical Atomic Model	23
4.2.1.	Quantum Numbers	23
4.2.1.1.	The Principal Quantum Number (n)	23
4.2.1.2.	The Orbital Quantum Number (l)	24
4.2.1.3.	The Magnetic Quantum Number (m)	24
4.2.1.4.	Spin Quantum Number (s)	24
4.2.2.	Shapes of Atomic Orbitals	25
4.2.3.	Rules for the Occupation of Orbitals by Electrons	26
4.2.4.	Description and Depiction of the Orbitals and Electrons	26
4.2.5.	The Electronic Configuration of the Elements	28
4.2.5.1.	The Electronic Configurations within the Periodic Table	28
4.2.6.	The Excited State of the Atom	29
5.	The Chemical Bond	30
5.1.	The Covalent Bond	30
5.1.1.	The Molecular Orbital	31
5.1.2.	Bond Polarity	34
5.1.3.	Molecule Polarity	34
5.2.	The Coordinate Covalent Bond	35
5.3.	The Ionic Bond	36
5.4.	The Properties of Ionic and Covalent Compounds	36
5.5.	The Metallic Bond	37

5.6. Intermolecular Forces	38
5.6.1. Dipole-Dipole Interactions	38
5.6.2. van der Waals Forces	38
5.6.3. The Hydrogen Bond	39
6. The Shapes of Molecules	41
6.1. sp hybridisation	41
6.2. sp ² hybridisation	42
6.3. sp ³ hybridisation	43
6.4. Multiple Bonds	46
6.5. Survey of the Most Common Hybrid Orbitals	46
7. Basic Chemical Calculations	47
7.1. The Masses of Atoms and Molecules	47
7.1.1. Relative Atomic Mass (A_r)	47
7.1.2. Relative Molecular Mass (M_r)	47
7.2. The Amount of Substance	47
7.2.1. The Mole	47
7.2.2. The Molar Mass (M)	48
7.2.3. The Molar Volume (V_m)	48
7.3. Calculations Based on Chemical Formulas	49
7.3.1. Finding an Empirical Formula	49
7.3.2. Finding a Molecular Formula	50
7.3.3. Calculation of Percentage Composition	50
7.4. Calculations Based on Chemical Equations	51
8. The Mixtures	53
8.1. The Dispersed Systems (Dispersions)	53
8.1.1. Classification of Dispersions	54
8.2. Solutions	54
8.2.1. Solvents	55
8.2.2. Solubility	55
8.2.3. True Solutions	56
8.2.4. Colloid Solutions	56
8.2.5. Concentration of Solution	56
8.2.6. Changing the Composition of Solutions	60
8.2.6.1. Mixing two Solutions with Different Concentrations of the Solute	60
8.2.6.2. Diluting Solutions	61
8.2.6.3. Adding Pure Substance (Solute) to a Solution	61
8.3. Diffusion and Osmosis	62
8.3.1. Diffusion	62

8.3.2. Osmosis	62
8.3.3. Osmotic Pressure	63
8.3.4. Osmosis and Living Cells	63
9. Chemical Reactions	64
9.1. Classification of Chemical Reactions	64
9.1.1. According to the Changes in Multiplicity of Species	64
9.1.2. According to the Number of Phases in the Reaction Mixture	65
9.1.3. According to the Entities Transferred	65
10. Thermodynamics	66
10.1. Thermochemistry	66
10.1.1. Heat of Reaction (Q)	66
10.1.2. Thermochemical Laws	67
11. Reaction Kinetics	68
11.1. Simple and Complex Reactions	68
11.1.1. Simple Reactions	68
11.1.2. Complex Reactions	68
11.2. Reaction Rates	69
11.3. The Activation Energy (E_A)	69
11.4. Catalysis	70
12. Chemical Equilibrium	72
12.1. Factors Affecting the Chemical Equilibrium	73
12.2. Ionic Equilibria	75
12.2.1. Electrolytic Dissociation (Ionisation)	75
12.2.2. Acids and Bases (Protolytic Equilibria)	76
12.2.2.1. Definitions of Acids and Bases	76
12.2.2.2. Dissociation (Ionisation) of Acids and Bases	77
12.2.2.3. The Ionic Product of Water	79
12.2.2.4. pH and pOH	79
12.2.2.5. Calculation of pH of Strong Acids and Bases	80
12.2.2.6. Calculation of pH of Weak Acids and Bases	81
12.2.2.7. Indicators	82
12.2.2.8. Neutralisation and Acid-Base Titration	83
12.2.2.9. Hydrolysis of Salts	84
12.2.2.10. Buffer Solutions	85
12.2.3. Solubility Product Equilibria	86
13. Oxidation-Reduction (Redox) Reactions	87
13.1. Oxidation and Reduction	87
13.2. Redox Equations	88

13.2.1. The Oxidation Number Method	89
13.2.2. The Ion Electron Method	90
13.3. Electrolysis	91
13.4. The Electrochemical Series of Metals	91

INORGANIC CHEMISTRY

14. General Properties of Elements in Relation to the Periodic Table	95
14.1. Physical Properties	95
14.2. Chemical Properties	95
15. Hydrogen	96
15.1. Hydrides	97
15.2. Water	98
15.2.1. Hard water	100
15.2.2. Purification of Water	100
16. The s Elements: Group IA and IIA	101
16.1. Common Properties	101
16.2. Alkali Metal Compounds	102
16.3. Alkaline Earth Metal Compounds	104
17. Group IIIA	105
18. Group IVA	107
18.1. Carbon	107
18.1.1. Carbon Compounds	108
18.2. Silicon	110
18.2.1. Silicon Compounds	110
18.3. Tin	111
18.4. Lead	111
19. Group VA	112
19.1. Nitrogen	113
19.1.1. Nitrogen Compounds	113
19.1.1.1. Oxides of Nitrogen	114
19.1.1.2. Oxoacids of Nitrogen	114
19.2. Phosphorus	115
19.3. Arsenic	116
19.4. Antimony	116
20. Group VIA - Chalcogens	117
20.1. Oxygen	118
20.1.1. Hydrogen Peroxide	119

20.1.2. Oxides	119
20.2. Sulfur	121
21. Group VIIA - Halogens	123
21.1. Hydrogen Halides	124
21.2. Halides	125
21.3. Oxides and Oxoacids	125
22. Group VIIIA - Noble Gases	126
23. The d Elements - Transition Metals	127
23.1. Complex Compounds	127
23.1.1. Formulas and Nomenclature of Coordination Compounds	128
23.2. Group IB	129
23.3. Group IIB	130
23.4. Group VIB	131
23.5. Group VIIB	132
23.6. Group VIIIB	132
23.6.1. Iron Family	133
23.6.2. Platinum Metals	134
24. Solubility of Inorganic Compounds in Water	135
 Literature Used	 136
