

# CONTENTS

0.1 INTRODUCTION	7
0.2 HOW TO DIVIDE PHYSICS	7
0.3 INTERACTIONS	8
0.4 MODELS, THEORIES, LAWS, PRINCIPLES	8
1.0 PHYSICAL QUANTITIES	8
1.1 SYSTEM OF UNITS	8
1.2 MEASUREMENTS. ERRORS, UNCERTAINTY	9
1.3 SCALAR AND VECTOR PHYSICAL QUANTITIES	9
1.4 VECTORS	9
1.4.1 Rules for Calculation with Vector Quantities	9
2.0 KINEMATICS OF A PARTICLE MOTION	12
2.1 MOTION IN ONE DIMENSION	12
2.1.1 Uniform Straight-line Motion of a Particle	14
2.1.2 Uniformly Accelerated Straight-line Motion of a particle	14
2.1.3 Free Fall of a Particle	15
2.1.4 Vertical Throw of a Particle	16
2.2 MOTION IN A PLANE	16
2.2.1 Circular Motion of a Particle	16
2.2.2 Uniform Circular Motion of a Particle	18
3.0 REFERENCE FRAME. GALILEI TRANSFORMATION	18
4.0 DYNAMICS	19
4.1 NEWTON'S LAWS OF MOTION	20
4.2 EQUATION OF MOTION	21
4.3 FORCES IN A CIRCULAR MOTION	24
5.0 FRICTION	25
6.0 PERIODIC MOTION	26
6.1 Harmonic Motion (Simple Harmonic Motion)	26
7.0 WORK AND ENERGY	28
7.0.1 Potential Energy	29
7.1 WORK-ENERGY THEOREM	30
7.2 ELASTIC POTENTIAL ENERGY	30
7.3 CONSERVATIVE AND DISSIPATIVE FORCES	32
7.4 POWER	32
7.5 IMPULSE	33
8.0 SYSTEM OF PARTICLES	34
8.1 INTERNAL FORCES, EXTERNAL FORCES, ISOLATED SYTSEM	34
8.2 TORQUE	34
8.3 CENTER OF MASS	35
8.4 EQUATIONS OF MOTION FOR A SYSTEM OF PARTICLES	36
8.4.1 Translation	36
8.4.2 Collisions	37
8.4.3 Rotation of a System of Particles	39
9.0 RIGID BODY	39
9.1 TRANSLATION MOTION OF A RIGID BODY	39
9.2 ROTATION OF A RIGID BODY	39
9.2.1 Kinetic Energy of Rotation	40
9.2.2 Parallel Axis Theorem	40
9.2.3 Equation of Motion for Rotation of a Rigid body	41
9.2.4 The Simple Pendulum	41
9.2.5 The Physical Pendulum	42
9.2.6 Rotation about a Moving Axis	43
9.2.7 Moment of Inertia of Some Bodies	44
9.2.8 Analogy between Translation and Rotation	44
10.0 GRAVITATIONAL FIELD	

10.1 NEWTON'S LAW OF UNIVERSAL GRAVITATION	45
10.2 INTENSITY OF GRAVITATIONAL FIELD	46
10.2.1 Gravitational Field of a Uniform Sphere	47
10.3 EFFECTS OF THE EARTH'S ROTATION	48
10.4 WEIGHTNESS	49
10.5 MEASUREMENT OF THE GRAVITATIONAL CONSTANT	49
10.6 POTENTIAL OF THE GRAVITATIONAL FIELD	50
10.7 PLANETS, SATELLITE	51
10.7.1 Artificial Satellites	53
10.7.2 Black Holes	54
11.0 MECHANICAL PROPERTIES OF MATTER	54
11.1 DEFORMATION CAUSED BY A NORMAL FORCE	54
11.2 DEFORMATION CAUSED BY A TANGENT FORCE	57
11.2.1 Restoring Torque on a Thin Wire	57
11.3 ELASTICITY AND PLASTICITY	58
12.0 FLUID MECHANICS	59
12.1 HYDROSTATICS	59
12.1.1 Pressure in a Fluid in a Gravitational Field	60
12.2 Pascal's Law	62
12.1.3 Euler's Equation	62
12.1.4 Archimedes' Principle	63
12.5 Surface Tension	64
12.2 HYDRODYNAMICS	65
12.2.1 Continuity Equation	66
12.2.2 Bernoulli's Equation	66
12.3 REAL FLUID	68
13.0 THERMAL PROPERTIES OF MATTER	70
13.1 TEMPERATURE	70
13.2 THERMAL EXPANSION	71
13.2.1 Linear Expansion of Solids	71
13.2.2 Volume Expansion of Solids and Liquids	72
13.2.3 Volume Expansion of Gases	73
13.3 THERMAL STRESS	73
13.3.1 One-Dimensional Case	73
13.3.2 Three-Dimensional Case	73
13.4 HEAT	74
13.4.1 Heat and Temperature	74
13.5 KINETIC-MOLECULAR THEORY OF MATTER	75
13.5.1 Quantities We Use in KMTM	77
13.5.2 Statistical Laws	78
13.6 IDEAL GAS	79
13.7 MAXWELL-BOLTZMANN DISTRIBUTION OF MOLECULAR SPEEDS	80
13.8 IDEAL GAS EQUATION	81
13.8.1 Van der Waals Equation of State	82
13.9 THERMODYNAMICS	83
13.9.1 The Zeroth Law of Thermodynamics	84
13.9.2 The First Law of Thermodynamics	84
13.10 SPECIAL KINDS OF THERMODYNAMIC PROCESSES	85
13.11 EQUIPARTITION OF ENERGY, MOLAR HEAT CAPACITIES	88
13.12 HEAT ENGINES	90
13.12.1 The Stirling Engine	92
13.12.2 The Otto Cycle (engine)	93
13.12.3 The Diesel Engine (Cycle)	93
13.12.4 The Carnot Cycle	94
13.12.5 Refrigerators	94

13.13. THE SECOND LAW OF THERMODYNAMICS	95
13.13.1 Entropy. Mathematical Formulation of the Second Law of Thermodynamics	96
13.13.2 Change in Entropy in Some Special Thermodynamic Processes	97
13.13.3 Thermodynamic Processes in $T$ - $S$ diagrams	98
13.13.4 Natural Processes and Entropy	98
13.13.5 Entropy, Probability, Order, Disorder, Information	99
13.14 THE THIRD LAW OF THERMODYNAMICS	101
14.0 PERIODIC MOTION	101
14.1 SIMPLE HARMONIC MOTION	101
14.2 SUPERPOSITION OF TWO (OR MORE) SIMPLE HARMONIC MOTIONS	103
14.2.1 Superposition of SHMs in One Direction	103
14.2.2 Superposition of Two SHMs in Two Perpendicular Direction	105
14.3 DAMPED OSCILLATIONS	106
14.4 FORCED OSCILLATIONS	108
15.0 WAVES	110
15.1 MECHANICAL WAVES	110
15.2 POLARIZATION	111
15.3 HARMONIC WAVES	111
15.4 WAVE EQUATION	113
15.5 WAVE PROPAGATION IN A THIN ROD	113
15.5.1 Longitudinal Waves	113
15.5.2 Transverse Waves in a Thin Rod (string)	114
15.6 PROPAGATION OF LONGITUDINAL WAVES IN FLUID	115
15.7 PROPAGATION OF LONGITUDINAL WAVES IN GASES	115
16.0 VIBRATING BODIES	116
16.1 STANDING WAVES	116
16.1.1 Normal Modes of a String	116
17.0 ACOUSTIC	117
17.1 PRESSURE VARIATIONS	118
17.2 SOUND INTENSITY	119
17.3 THE DOPPLER EFFECT	120
18.0 ELECTRIC CHARGE	121
18.1 ELECTRIC FIELD	122
18.1.1 Coulomb's Law	122
18.1.2 Description of the Electric Field	123
18.2.1 Electric Dipole	126
18.1.4 Gauss' Law	126
18.1.5 Intensity of the Electric Field of a Positively Charged Sphere	127
18.1.6 Electric Field of an Infinite Sheet of Charge	128
18.1.7 Electric Field of a Uniformly Charged Cylinder	128
18.1.8 Electric Potential	129
18.1.9 Potential Difference	130
18.1.10 Electric Potential of a Charged Metallic Sphere	130
18.2 CAPACITORS, CAPACITANCE	131
18.2.1 Parallel-plate Capacitor	132
18.2.2 Cylindrical Capacitor	132
18.2.3 Capacitance of a Spherical Capacitor	133
