

# CONTENTS

	<b>THEORETICAL PRINCIPLES OF LABORATORY METHODS.....</b>	<b>15</b>
<b>1.</b>	<b>BASIC LABORATORY TECHNIQUES.....</b>	<b>17</b>
1.1	SAMPLING OF BIOLOGICAL MATERIAL.....	17
1.1.1	Blood sampling.....	17
1.1.2	Collecting a urine sample.....	18
1.1.3	Disposal of biological material.....	18
1.2	PROCESSING OF BIOLOGICAL MATERIAL.....	18
1.2.1	Homogenizing and milling.....	18
1.2.2	Extraction.....	20
1.2.3	Salting out.....	20
1.3	CENTRIFUGATION.....	20
1.4	WEIGHING.....	22
1.5	MEASURING LIQUIDS.....	23
1.5.1	Pipetting.....	27
1.6	PREPARING SOLUTIONS.....	30
1.7	STIRRING.....	30
1.8	HEATING.....	30
1.9	DRYING.....	31
1.10	EQUIPMENT OF CHEMICAL LABORATORY.....	32
1.10.1	Material and consumables.....	32
1.10.1.1	Glass ware.....	32
1.10.1.2	Porcelain ware.....	32
1.10.1.3	Rubber and plastic ware.....	32
1.10.1.4	Other material.....	32
1.10.2	Equipment.....	33
1.11	CHEMICALS.....	33
1.11.1	Chemical purity grades.....	33
1.11.2	Classification of chemicals according to physico-chemical properties ..	34
1.11.3	Use of commercial kits.....	34
<b>2.</b>	<b>FUNCTIONS OF ONE VARIABLE.....</b>	<b>36</b>
2.1	FUNCTION.....	36
2.2	LINEAR FUNCTION.....	36
2.3	HYPERBOLA.....	37
2.4	EXPONENTIAL AN LOGARITHMIC FUNCTIONS.....	38
2.4.1	Exponential function.....	38
2.4.2	Logarithmic function.....	39
2.4.2.1	Rules for calculations with logarithms.....	40

<b>3.</b>	<b>COMPOSITION OF MIXTURES</b> .....	41
3.1	MASS RATIO .....	41
3.2	VOLUME RATIO .....	42
3.3	MASS CONCENTRATION .....	42
3.4	AMOUNT CONCENTRATION .....	43
3.5	DILUTIONS .....	45
3.5.1	Mass ratio .....	45
3.5.2	Amount concentration .....	46
3.6	STANDARD CURVE AND CALCULATIONS IN SPECTROMETRY .....	47
<b>4.</b>	<b>CHEMICAL EQUILIBRIA</b> .....	51
4.1	MASS AND CHARGE STOICHIOMETRY .....	51
4.1.1	Mass stoichiometry .....	51
4.1.2	Charge stoichiometry .....	52
4.2	ACID-BASE EQUILIBRIA .....	53
4.2.1	Disociation constant .....	53
4.2.2	Ionic product constant and pH .....	54
4.2.3	General relations between components in solutions of acids and bases .....	55
4.2.4	Calculating pH of solutions of strong monoprotic acids and bases .....	56
4.2.5	Calculating pH of solutions of weak monoprotic acids and bases .....	57
4.2.6	Hydrolysis of salts .....	59
4.2.7	Buffering systems .....	61
4.2.8	Buffer capacity .....	63
4.2.9	Polyprotic systems .....	65
4.3	REDOX EQUILIBRIA .....	67
4.4	SOLUBILITY/PRECIPITATION EQUILIBRIA .....	68
4.5	COMPLEXATION EQUILIBRIA .....	70
<b>5.</b>	<b>ANALYTICAL TECHNIQUES</b> .....	72
5.1	OPTICAL ANALYTICAL TECHNIQUES .....	72
5.1.1	Ultraviolet and visible spectrometry (UV – VIS) .....	73
5.1.1.1	Methods and instrumentation .....	75
5.1.1.2	Analytical use .....	76
5.2	CHROMATOGRAPHY .....	76
5.2.1	Gas chromatography .....	78
5.2.2	Liquid chromatography and high-performance liquid chromatography (HPLC) .....	81
5.2.3	Thin-layer chromatography .....	82
5.3	VOLUMETRIC ANALYSIS .....	84
5.3.1	Performing titrations .....	84
5.3.2	Types of titration .....	84
5.3.3	Determination of equivalence point .....	85
5.3.4	Acid-base titrations .....	85

5.3.5	Chemical determination of equivalence point.....	85
5.3.5.1	Selection of an indicator.....	86
5.3.6	Determination of equivalence point using instrumental methods .....	87
5.3.7	Titration curves of acid-base titrations and titrations of polyprotic systems .....	87
5.3.8	Calculation of sample concentration during acid-base titrations .....	90
5.4	POTENTIOMETRY .....	91
5.4.1	Types of electrodes .....	91
5.4.1.1	Glass electrode.....	92
5.4.2	Analytical use of potentiometry.....	93
5.5	IMMUNOCHEMICAL METHODS .....	93
5.5.1	Qualitative immunoprecipitation curve.....	93
5.5.2	Immunoprecipitation methods.....	94
5.5.3	Immunoprecipitation reactions in gels .....	94
5.5.3.1	Simple radial immunodiffusion (Mancini method) .....	95
5.5.3.2	Electroimmunodiffusion .....	95
5.5.3.3	Double radial immunodiffusion (Ouchterlony technique) .....	96
5.5.3.4	Immuno-electrophoresis.....	96
5.5.4	Immunoprecipitation reaction in solution .....	97
5.5.5	Immunomethods using markers .....	98
5.5.5.1	Enzyme immunoassay .....	98
5.5.5.2	Radioimmunoassay .....	99
5.5.5.3	Fluorescence immunoassay .....	100
5.5.5.4	Luminescence techniques .....	100
5.5.6	Other immunochemical techniques .....	100
5.6	ELEKTROMIGRATION METHODS .....	101
5.6.1	Classification of electrophoretic techniques .....	101
5.6.1.1	According to mobility efficiency of separated substance.....	101
5.6.1.2	According to gel running setup .....	103
5.6.1.3	According to gel type.....	104
5.6.2	Analysis of electrophoresis.....	106
5.6.2.1	Detection .....	106
5.6.2.2	Drying and storing gels .....	107
5.6.2.3	Analysis using densitometer .....	107
5.6.3	Practical use of electrophoretic methods .....	107

	<b>PRACTICAL EXERCISES – PROTOCOLS</b> .....	109
<b>1.</b>	<b>THE ZOLLINGER-ELLISON SYNDROME</b> .....	110
1.1	ANALYSIS – WORKING INSTRUCTIONS .....	111
1.1.1	Standardization of a sodium hydroxide titrant solution using oxalic acid .....	111
1.1.1.1	Measurement of hydrochloric acid secretion .....	113
1.2	ANALYSIS OF RESULTS .....	115
1.2.1	Standardization of sodium hydroxide solution .....	115
1.2.2	BAO and MAO measurement .....	115
<b>2.</b>	<b>KINETICS OF LACTATE DEHYDROGENASE ACTIVITY IN BIOLOGICAL MATERIAL</b> .....	117
2.1	LACTATE DEHYDROGENASE: BIOCHEMISTRY AND CLINICAL MEDICINE ...	117
2.2	ISOLATION OF LACTATE DEHYDROGENASE FROM HEART MUSCLE .....	119
2.3	ASSESSMENT OF CATALYTIC ACTIVITY AND MICHAELIS CONSTANT OF LDH WITH LACTATE AS A SUBSTRATE .....	120
2.3.1	Preparation of sample for activity assessment and estimation of $K_M$ for LDH with lactate as a substrate .....	120
2.4	EXPERIMENTAL DATA PROCESSING .....	121
2.4.1	Determination of LDH activity .....	121
2.4.2	Estimation of Michaelis constant for lactate .....	121
<b>3.</b>	<b>ANALYSIS OF THE SELECTED PARAMETERS OF LIPID METABOLISM</b> ...	123
3.1	LIPID METABOLISM .....	123
3.2	SAMPLE PREPARATION .....	125
3.2.1	Total cholesterol determination .....	125
3.2.2	HDL cholesterol determination .....	126
3.2.1	Triglycerides determination .....	127
3.2.1	LDL cholesterol determination .....	128
3.3	LIPOPROTEIN ELECTROPHORESIS .....	128
3.3.1	Agarose gel – ready to use .....	128
3.3.2	Sample preparation and loading .....	128
3.3.3	Electrophoresis .....	128
3.3.4	Drying .....	129
3.3.5	Staining and destaining .....	129
3.3.6	Washing and drying .....	129
3.3.7	Scanning .....	129
3.4	ELECTROPHEROGAM ANALYSIS .....	129
3.4.1	Fredrickson’s classification .....	130
<b>4.</b>	<b>IDENTIFICATION AND DETERMINATION OF ISOELECTRIC POINT OF AMINO ACIDS</b> .....	132
4.1	CLINICAL AND PATHOBIOCHEMICAL ASPECTS OF METBOLISM OF AMINO ACIDS .....	132

4.2	ELECTROCHEMICAL CHARACTERISTICS OF AMINO ACIDS .....	132
4.2.1	Isoelectric point of amino acids .....	133
4.3	IDENTIFICATION OF UNKNOWN AMINO ACID BY TLC .....	133
4.4	POTENTIOMETRIC TITRATION OF UNKNOWN AMINO ACID .....	134
4.5	RESULTS .....	135
4.5.1	TLC.....	135
4.5.2	Potentiometric titration of unknown amino acid.....	135
<b>5.</b>	<b>IMMUNOCHEMICAL METHODS .....</b>	<b>138</b>
5.1	CROSS REACTIVITY BETWEEN DIFFERENT SPECIES.....	138
5.1.1	Agarose gel preparation.....	138
5.1.2	Serial dilutions of the sample .....	138
5.1.3	Two-dimensional double diffusion according to Ouchterlony .....	139
5.2	ANALYSIS OF THE RESULTS.....	140
5.3	BLOOD GROUP DETERMINATION.....	140
5.1	C-REACTIVE PROTEIN ANALYSIS .....	142
<b>6.</b>	<b>QUANTITATIVE ANALYSIS OF BLOOD PLASMA PROTEINS BY</b>	
	<b>ELECTROPHORESIS .....</b>	<b>144</b>
6.1	SAMPLE PREPARATION .....	144
6.1.1	PROTEIN ESTIMATION .....	144
6.1.1.1	Total protein – biuret reaction.....	145
6.1.1.2	Total protein - Lowry method .....	145
6.2	ELECTROPHORESIS OF SERUM PROTEINS .....	146
6.2.1	Agarose gel – ready to use.....	146
6.2.2	Sample preparation and loading .....	147
6.2.3	Electrophoresis.....	147
6.2.4	Finalization.....	147
6.2.5	Staining and destaining .....	147
6.2.6	Scanning .....	147
6.3	ELECTROPHEROGRAM INTERPRETATION .....	148
<b>7.</b>	<b>BIOCHEMICAL EXAMINATION OF LIVER FUNCTIONS .....</b>	<b>150</b>
7.1	LIVER AND ITS FUNCTION.....	150
7.1.1	Biochemical examination of the liver function .....	150
7.1.2	Testing permeability and integrity of hepatocyte membranes .....	151
7.1.3	Testing disorders of bile acids production and excretion.....	151
7.1.3.1	Alkaline phosphatase .....	151
7.1.3.2	γ-Glutamyl transferase .....	152
7.1.3.3	Bilirubin.....	152
7.1.4	Biochemical examination of nutritional state .....	152
7.1.4.1	Malnutrition .....	152
7.1.4.2	Obesity .....	153
7.1.4.3	Plasma proteins.....	153

7.2	ASSESSMENT OF CATALYTIC ACTIVITY OF LIVER ENZYMES.....	153
7.2.1	Alanine aminotransferase.....	153
7.2.2	Aspartate aminotransferase.....	155
7.2.3	$\gamma$ -Glutamyl transferase.....	156
7.2.4	Alkaline phosphatase.....	157
<b>8.</b>	<b>ANALYSIS OF URINE AND URINE SEDIMENT.....</b>	<b>160</b>
8.1	GLOMERULAR FILTRATION RATE MEASUREMENT AND CREATININE CLEARANCE RATE TEST.....	162
8.1.1	Glomerular filtration rate (GFR) and creatinine clearance.....	162
8.1.2	Measurement of creatinine using Jaffe method.....	163
8.1.3	Physical analysis of urine.....	164
8.1.4	Chemical analysis of urine.....	164
8.1.5	Urine sediment analysis.....	164
8.1.6	A correct technique for urine sample collection.....	164
8.2	EXPERIMENTAL PART: WORKING INSTRUCTIONS.....	165
8.2.1	Measurement of endogenous creatinine clearance using Jaffe method....	165
8.2.2	Physical analysis of urine.....	166
8.2.3	Chemical analysis of urine.....	166
8.2.3.1	Chemical examination using test strips.....	166
8.2.3.2	Chemical examination in solutions.....	166
8.2.4	Urine sediment analysis.....	169
8.2.5	Solubility of calcium and salts in acidic and alkaline environments....	169
<b>9.</b>	<b>BUFFERING CAPACITY AND EXAMINATION OF ACID-BASE BALANCE....</b>	<b>172</b>
9.1	DETERMINATION OF BUFFER CAPACITY OF PHOSPHATE BUFFER.....	172
9.1.1	Titration curve.....	172
9.1.2	Phosphate and bicarbonate buffer.....	173
9.1.3	Protein buffering systems.....	174
9.1.4	Buffering capacity of blood.....	175
9.2	WORK INSTRUCTIONS.....	175
9.3	ASSESSMENT OF ACID-BASE BALANCE ACCORDING TO ASTRUP.....	180
9.3.1	WORK INSTRUCTIONS.....	180
9.3.2	Experimental design.....	181
9.3.3	Capillary blood collection.....	181
9.3.4	Interpretation of ABR parameters:.....	181
9.3.4.1	pH.....	181
9.3.4.2	$p\text{CO}_2$ .....	181
9.3.4.3	Standard bicarbonate $\text{HCO}_3^-$ .....	181
9.3.4.4	Base excess, BE.....	182
9.3.4.5	Anion gap (AG).....	182
9.3.4.6	$p\text{O}_2$ .....	182

<b>10.</b>	<b>ORAL GLUCOSE TOLERANCE TEST (OGTT)</b> .....	183
10.1	PERFORMING OGTT .....	183
10.2	INTERPRETATION OF OGTT .....	184
10.3	DETERMINATION OF GLYCAEMIA.....	186
10.4	WORK INSTRUCTIONS FOR THE EXPERIMENTAL PART .....	187
10.4.1	OGTT.....	187
10.4.2	Photometric assay of glucose in serum .....	187
10.5	INTERPRETATION.....	189
<b>11.</b>	<b>TOXICOLOGIC EXAMINATIONS IN MEDICINE: METABOLIC ASPECTS OF ETHANOL INTAKE</b> .....	191
11.1	LIVER FUNCTIONS FROM BIOCHEMICAL POINT OF VIEW.....	191
11.1.1	Biotransformation and detoxification function .....	192
11.2	METABOLISM OF ETHANOL .....	193
11.2.1	Acute effect of ethanol .....	194
11.2.2	Alcohol Testers .....	194
11.3	PRACTICAL TRAINING.....	195
11.3.1	Analyse the presence of alcohol in breath.....	195
APPENDIX 1: DOUBLE RECIPROCAL PLOT .....		198
APPENDIX 2: TITRATION CURVE ANALYSIS: TANGENT METHOD .....		200
APPENDIX 3: SATURATION BY AMMONIUM SULPHATE .....		203
APPENDIX 4: REFERENCE INTERVALS FOR SELECTED ANALYTES.....		204
APPENDIX 5: LABORATORY EQUIPMENT - MATERIAL.....		206
APPENDIX 6: LABORATORY EQUIPMENT - INSTRUMENTS .....		208
APPENDIX 7: GUIDANCE FOR USE OF SPECTROPHOTOMETER SPEKOL 1300 .....		210
APPENDIX 8: LABORATORY SAFETY RULES .....		213
APPENDIX 9: FIRST AID INSTRUCTIONS .....		215
