**Cover art:** Induction of interleukin (IL)-15 by interferon (IFN)- $\alpha$  in B16 melanoma. B16 melanoma cultures were either untreated (*left panel*) or treated with 3000 units/mL of IFN- $\alpha$  (*right panel*) for 15 days and stained with an antibody specific for IL-15 (green). Nuclei are indicated by blue (DAPI). Slides were examined by confocal microscopy.
