Preface

Introduction	1
Opening speech	2
List of the presented contributions	4

Part I. Structure of the forest plant communities

Phytocoenological and environmental conditions of the cultural forests in South Bohemia - <i>K.Matějka</i>	8
Vegetation biomass development after clear cutting - <i>J.Viewegh, R.Janiček</i>	29
Woody species pattern after 7 years of the Norway spruce reforestation - <i>A.Giertlová, J.Viewegh</i>	35
Allometrical relationships of the pioneer woody species fractions on the clear-cut plot Rájec - <i>M.Sládek, F.Vašíček, J.Viewegh</i>	46
Development, structure and production in selected fir ecosystems in Slovakia - <i>M.Voško</i>	56
The tree layer production of litter in different conditions of fir-beech forest stand - <i>M.Kodrík</i>	65

Part II. The experimental oak ecosystem in South Bohemia

Several results of the study in oak forest in periphery of the South Bohemian basin - <i>K.Matějka</i>	74
Seasonal dynamics of phosphorus in an acidophilous oak forest soil - <i>F.Novák, J.Kalčík</i>	93
Transformation of nitrogen in an acidophilous oak forest soil - <i>F.Novák</i>	103

Part III. Water in forest ecosystem

Microclimate and water budget of an upland fir-beech ecosystem - <i>P.Kantor, S.Klíma</i>	116
The water regime of ameliorated habitats with various scale of affects to the forests in the Třeboň basin - <i>M.Bíba</i>	125
Drips in the ecosystem of the spruce stands of the Vizovické vrchy Mts. - <i>J.Gregor, J.Kontriš, O.Kontrišová</i>	130
Stemflow of spruce monocultures in region of Luhačovice - <i>J.Gregor, O.Kontrišová, J.Kontriš</i>	139

Part IV. Monitoring - forest damage - silviculture

Monitoring of the forest status in the Czech Republic, recent results and perspectives - <i>K.Matějka</i>	146
The accumulation of radioactive fallout in different compartments of forest ecosystems in South Bohemia region - <i>H.Uhlířová, J.Konečný</i>	155
Vitality of tree species of the submontane forests - micro-morphological and physiologico-biochemical symptoms - <i>J.Kmeť</i>	161
Decline of pine forests in the protected area Broumovsko and their nutrition status - <i>S.Vacek, V.Podrázský</i>	176
Development of air polluted spruce stands with respect to thinning regime (Results of long-term experiments) - <i>M.Slodičák</i>	184
Biological reclamation of soils in upland forests damaged by air pollution - <i>P.Kantor</i>	193
Liming of pine stands on sandy soils in the area of Týniště nad Orlicí (East Bohemia) - <i>V.Podrázský</i>	202
