Detailed Contents

Preface xviii

1 Visions of the Future 1

Introduction 1

The Self-Extinction Premise 1

Future Environmental Challenges 2

Climate Change 2

EXAMPLE 1.1 Historical Examples of Self-Extinction 3

Water Accessibility 4

Meeting the Challenges 4

How Will Societies Respond? 5

The Role of Economics 6

The Use of Models 6

DEBATE 1.1 Ecological Economics Versus Environmental Economics 7

EXAMPLE 1.2 Experimental Economics: Studying Human Behavior in a Laboratory 8

The Road Ahead 9

DEBATE 1.2 What Does the Future Hold? 9

The Issues 10

An Overview of the Book 11

Summary 12

Key Concepts 12 • Further Reading 12 •

Additional References 13 • Discussion Questions 13

2 Valuing the Environment: Concepts 15

Introduction 15

The Human Environment Relationship 15

The Environment as an Asset 15

The Economic Approach 17

Normative Criteria for Decision Making 18

Evaluating Predefined Options 18

DEBATE 2.1 Should Humans Place an Economic Value on the Environment? 19

EXAMPLE 2.1 Valuing Ecological Services from Preserved Tropical Forests 22

Incorporating the Timing of Benefits and Costs: The Present Value Criterion 23

Finding the Optimal Outcome 26

Static Efficiency 27

Dynamic Efficiency 29

Applying the Concepts 29

Pollution Control 29

EXAMPLE 2.2 Does Reducing Pollution Make Economic Sense? 30

Preservation Versus Development 31

EXAMPLE 2.3 Choosing Between Preservation and Development in Australia 31

Summary 32

Key Concepts 32 • Further Reading 32 • Discussion Question 33

3 Valuing the Environment: Methods 34

Introduction 34

Risk Assessment 34

Valuing Benefits for Risk Management 35

Types of Values 36

Classifying Valuation Methods 36

DEBATE 3.1 Willingness to Pay Versus Willingness to Accept: Why So Different? 39

EXAMPLE 3.1 Leave No Behavioral Trace: Using the Contingent Valuation Method to Measure Passive Use Values 40

EXAMPLE 3.2 Valuing Damage from Groundwater Contamination Using Averting Expenditures 44

Using Geographic Information Systems for Economic Valuation 45

Valuing Human Life 46

EXAMPLE 3.3 Using GIS to Inform Hedonic Property Values: Visualizing the Data 47

DEBATE 3.2 Is Valuing Human Life Immoral? 48

Issues in Benefit Estimation 50

Approaches to Cost Estimation 50

The Treatment of Risk 51

Choosing the Discount Rate 53

EXAMPLE 3.4 The Historical Importance of the Discount Rate 54

A Critical Appraisal 55

Cost-Effectiveness Analysis 56

Impact Analysis 57

EXAMPLE 3.5 NO₂ Control in Chicago: An Example of Cost-Effectiveness Analysis 58

Summary 59

Key Concepts 60 • Further Reading 60 •

Additional References 61 • Discussion Questions 63

4 Property Rights, Externalities, and Environmental Problems 64

Introduction 64

Property Rights 65

Property Rights and Efficient Market Allocations 65

Efficient Property Right Structures 65

EXAMPLE 4.1 Pollution in Transition Economies 66

Producer's Surplus, Scarcity Rent, and Long-Run Competitive Equilibrium 69

Externalities as a Source of Market Failure 70

The Concept Introduced 70

Types of Externalities 71

EXAMPLE 4.2 Shrimp Farming Externalities in Thailand 72

Improperly Designed Property Rights Systems 73

Other Property Rights Regimes 73

Public Goods 75

EXAMPLE 4.3 Public Goods Privately Provided: The Nature Conservancy 78

Imperfect Market Structures 78

Divergence of Social and Private Discount Rates 80

Government Failure 80

The Pursuit of Efficiency 82

Private Resolution through Negotiation 82

The Courts: Property Rules and Liability Rules 84

Legislative and Executive Regulation 86

An Efficient Role for Government 86

Summary 87

Key Concepts 87 ♦ Further Reading 88 ♦ Discussion Questions 88

5 Sustainable Development: Defining the Concept 90

Introduction 90

A Two-Period Model 91

Defining Intertemporal Fairness 95

Are Efficient Allocations Fair? 96

EXAMPLE 5.1 The Alaskan Permanent Fund 97

Applying the Sustainability Criterion 98

EXAMPLE 5.2 Nauru: Weak Sustainability in the Extreme 99

Implications for Environmental Policy 100

Summary 101

Key Concepts 102 ♦ Further Reading 102 ♦

Additional References 102 ♦ Discussion Questions 103

6 The Population Problem 104

Introduction 104

Historical Perspective 105

World Population Growth 105

Population Growth in the United States 105

Effects of Population Growth on Economic Development 108

The Population/Environment Connection 114

Effects of Economic Development on Population Growth 114

DEBATE 6.1 Does Population Growth Inevitably Degrade the Environment? 115

The Economic Approach to Population Control 118

EXAMPLE 6.1 Achieving Fertility Declines in Low-Income Countries:
The Case of Kerala 123

EXAMPLE 6.2 Income-Generating Activities as Fertility Control: Bangladesh 124

Urbanization 125

Using GIS to Map Population Data 125

Summary 126

Key Concepts 126 ♦ Further Reading 126 ♦ Discussion Questions 127

7 Natural Resource Economics: An Overview 128

Introduction 128

A Resource Taxonomy 129

Efficient Intertemporal Allocations 132

The Two-Period Model Revisited 132

Transition to a Renewable Substitute 133

Exploration and Technological Progress 134

EXAMPLE 7.1 Technological Progress in the Iron Ore Industry 135

Market Allocations 135

Appropriate Property-Right Structures 136

Environmental Costs 136

Summary 137

Key Concepts 138 ♦ Further Reading 138 ♦

Additional References 138 ♦ Discussion Questions 139

8 Energy 140

Introduction 140

EXAMPLE 8.1 Hubbert's Peak 141

Natural Gas: Price Controls 142

Oil: The Cartel Problem 145

Price Elasticity of Oil Demand 146

Income Elasticity of Oil Demand 146

Non-OPEC Suppliers 147

Compatibility of Member Interests 148

Fossil Fuels: National Security and Climate Considerations 149

The Climate Dimension 149

The National Security Dimension 150

DEBATE 8.1 How Should the United States Deal with the Vulnerability of Its Imported Oil? 152

EXAMPLE 8.2 Strategic Petroleum Reserve 153

The Other Depletable Sources: Unconventional Oil, Coal, and Nuclear 154

Unconventional Oil Sources 155

Coal 155

Uranium 155

Electricity 158

EXAMPLE 8.3 Electricity Deregulation in California: What Happened? 160

EXAMPLE 8.4 Renewable Energy Credits: The Texas Experience 162

Energy Efficiency 162

EXAMPLE 8.5 Feed-in Tariffs 163

Transitioning to Renewables 164

Hydroelectric Power 165

Wind 165

Photovoltaics 165

DEBATE 8.2 Dueling Externalities: Should the U.S. Promote Wind Power? 166

Active and Passive Solar Energy 167

Ocean Tidal Power 167

Biofuels 167

Geothermal Energy 168

Hydrogen 168

Summary 170

Key Concepts 171 ♦ Further Reading 171 ♦

Additional References 171 ♦ Discussion Questions 173

9 Water 174

Introduction 174

The Potential for Water Scarcity 175

The Efficient Allocation of Scarce Water 178

Surface Water 178

Groundwater 179

The Current Allocation System 180

Riparian and Prior-Appropriation Doctrines 180

Sources of Inefficiency 181

DEBATE 9.1 What Is the Value of Water? 185

Potential Remedies 186

EXAMPLE 9.1 Using Economic Principles to Conserve Water in California 187

EXAMPLE 9.2 Water Transfers in Colorado: What Makes a Market for Water Work? 188

EXAMPLE 9.3 Protecting Instream Uses Through Acquiring Water Rights 189

EXAMPLE 9.4 Water Pricing in Canada 194

DEBATE 9.2 Should Water Systems Be Privatized? 196

GIS and Water Resources 196

Summary 197

Key Concepts 198 ♦ Further Reading 198 ♦

Additional References 199 ♦ Discussion Questions 201

10 Land 202

Introduction 202

The Economics of Land Allocation 203

Land Use 203

Land Use Conversion 204

Sources of Inefficient Use and Conversion 205

Sprawl and Leapfrogging 205

Incompatible Land Uses 206

EXAMPLE 10.1 Using GIS to Analyze Sprawl 207

Undervaluing Environmental Amenities 208

DEBATE 10.1 Should Landowners Be Compensated for "Regulatory Takings"? 209

The Influence of Taxes on Land Use Conversion 210

Market Power 210

Special Problems in Developing Countries 212

DEBATE 10.2 What Is a "Public Purpose"? 212

Innovative Market-Based Policy Remedies 214

Establishing Property Rights 214

Transferable Development Rights 214

Wetlands Banking 215

EXAMPLE 10.2 Controlling Land Development with TDRs 215

Conservation Banking 216

Safe Harbor Agreements 216

EXAMPLE 10.3 Conservation Banking: The Gopher Tortoise Conservation Bank 217

Grazing Rights 218

Conservation Easements 218

Land Trusts 219

EXAMPLE 10.4 Using a Community Land Trust to Protect Farmland 220

Development Impact Fees 220

DEBATE 10.3 Does Ecotourism Provide a Pathway to Sustainability? 221

Property Tax Adjustments 221

EXAMPLE 10.5 Tax Strategies to Reduce Inefficient Land Conversion: Maine's Open Space Program 222

Summary 222

Key Concepts 223 ♦ Further Reading 223 ♦

Additional References 224 ♦ Discussion Questions 224

11 Agriculture 225

Introduction 225

Global Scarcity 226

Examining Global Scarcity 227

Outlook for the Future 229

EXAMPLE 11.1 Growing Corn for Fuel, Not Food: The Expansion of Ethanol 232

The Role of Agricultural Policies 236

EXAMPLE 11.2 Do Mandatory Labels Correct Externalities? 238

DEBATE 11.1 When Organic Goes Mainstream: Do You Get What You Pay For? 238

Summing Up 240

DEBATE 11.2 Should Genetically Modified Organisms Be Banned? 241

EXAMPLE 11.3 Are Consumers Willing to Pay a Premium for GMO-Free Foods? 242

Distribution of Food Resources 242

Defining the Problem 243

Domestic Production in LDCs 243

The Undervaluation Bias 245

Feeding the Poor 245

Feast and Famine Cycles 247

Summary 249

Key Concepts 249 ♦ Further Reading 250 ♦

Additional References 250 ♦ Discussion Questions 252

12 Forests 253

Introduction 253

Characterizing Forest Harvesting Decisions 254

Special Attributes of the Forest 254

The Biological Dimension 254

The Economics of Forest Harvesting 256

Sources of Inefficiency 257

Perverse Incentives for the Landowner 257

Perverse Incentives for Nations 260

Poverty and Debt 261

Sustainable Forestry 262

Public Policy 263

Changing Incentives 264

EXAMPLE 12.1 Producing Sustainable Forestry Through Certification 265

Debt-Nature Swaps 265

Extractive Reserves 266

The World Heritage Convention 266

Royalty Payments 267

EXAMPLE 12.2 Does Pharmaceutical Demand Offer Sufficient Protection to Biodiversity? 268

Summary 268

EXAMPLE 12.3 Trust Funds for Conservation 269

Key Concepts 270 • Further Reading 270 •

Additional References 271 • Discussion Questions 272

13 Common-Pool Resources: Fisheries and Other Commercially Valuable Species 273

Introduction 273

Efficient Harvests 274

The Biological Dimension 274

Efficient Sustained Yield 276

Appropriability and Market Solutions 277

EXAMPLE 13.1 Open-Access Harvesting of the Minke Whale 279

EXAMPLE 13.2 Historical Example: Harbor Gangs of Maine 280

Public Policy Toward Fisheries 281

Aquaculture 281

DEBATE 13.1 Aquaculture: Does Privatization Cause More Problems Than It Solves? 283

Raising the Real Cost of Fishing 285

Taxes 286

Individual Transferable Quotas (ITQs) 287

Subsidies and Buybacks 290

EXAMPLE 13.3 The Relative Effectiveness of Transferable Quotas and Traditional Size and Effort Restrictions in the Atlantic Sea Scallop Fishery 291

The 200-Mile Limit 293

The Economics of Enforcement 293

Preventing Poaching 295

EXAMPLE 13.4 Local Approaches to Wildlife Protection: Zimbabwe 296

Summary 297

Key Concepts 297 • Further Reading 298 •

Additional References 298 • Discussion Questions 300

14 Environmental Economics: An Overview 301

Introduction 301

A Pollutant Taxonomy 301

Defining the Efficient Allocation of Pollution 303

Fund Pollutants 303

Market Allocation of Pollution 305

Efficient Policy Responses 306

EXAMPLE 14.1 Environmental Taxation in China 307

Cost-Effective Policies for Emission Reduction 308

Defining a Cost-Effective Allocation 308

Cost-Effective Pollution Control Policies 309

Emission Standards 310

Emission Charges 310

Cap-and-Trade 313

Other Policy Dimensions 314

DEBATE 14.1 Should Developing Countries Rely on Market-Based Instruments to Control Pollution? 315

The Revenue Effect 315

EXAMPLE 14.2 The Swedish Nitrogen Charge 317

EXAMPLE 14.3 Maine's Energy and Carbon Savings Trust 318

Responses to Changes in the Regulatory Environment 318

Instrument Choice Under Uncertainty 319

Product Charges: Another Form of Environmental Taxation 320

Summary 320

EXAMPLE 14.4 The Irish Bag Levy 321

Key Concepts 322 ♦ Further Reading 323 ♦

Additional References 323 ♦ Discussion Questions 325

15 Stationary-Source Local and Regional Air Pollution 326

Introduction 326

Conventional Pollutants 326

The Command-and-Control Policy Framework 327

DEBATE 15.1 Does Sound Policy Require Targeting New Sources via the New Source Review? 329

The Efficiency of the Command-and-Control Approach 330

DEBATE 15.2 The Particulate and Smog Ambient Standards Controversy 331

Cost-Effectiveness of the Command-and-Control Approach 332

Air Quality 334

EXAMPLE 15.1 Controlling SO₂ Emissions by Command-and-Control in Germany 335

Innovative Approaches 337

Smog Trading (RECLAIM) 337

Emission Charges 338

Regional Pollutants 339

EXAMPLE 15.2 Technology Diffusion in the Chlorine Manufacturing Sector 339

Acid Rain 340

EXAMPLE 15.3 Adirondack Acidification 341

EXAMPLE 15.4 The Sulfur Allowance Program 344

EXAMPLE 15.5 Why and How Do Environmentalists Buy Pollution? 345

Summary 346

Key Concepts 347 ♦ Further Reading 347 ♦

Additional References 348 ♦ Discussion Questions 349

16 Climate Change 350

Introduction 350

The Science of Climate Change 350

Negotiations over Climate Change Policy 352

Characterizing the Broad Strategies 352

DEBATE 16.1 Should Carbon Sequestration in the Terrestrial Biosphere Be Credited? 353

The Precedent: Reducing Ozone Depleting Gases	354
The Policy Focus of the Climate Change Negotiations	355
EXAMPLE 16.1 Tradable Permits for Ozone-Depleting Chemicals	356
The Evolution of International Agreements on Climate Change	357
EXAMPLE 16.2 The European Emissions Trading Scheme (EU ETS)	358
Complementary Strategies	359
Controversies	359
Policy Timing	359
DEBATE 16.2 Is Global Greenhouse Gas Trading Immoral?	360
Creating Incentives for Participation in Climate Change Agreements	361

Summary 362

Key Concepts	363	◆	Further Reading	364	◆
Additional References	364	◆	Discussion Questions	365	

17 Transportation 366

Introduction 366

The Economics of Mobile-Source Pollution 368

Implicit Subsidies	368
Externalities	368
The Consequences	370

Policy Toward Mobile Sources 370

Some History	370
Structure of the U.S. Approach	371
EXAMPLE 17.1 Project XL—The Quest for Effective, Flexible Regulation	374
European Approaches	375
EXAMPLE 17.2 Car Sharing: Better Use of Automotive Capital?	376

An Economic and Political Assessment 377

Technology Forcing and Sanctions	378
Differentiated Regulation	378
Uniformity of Control	378
The Deterioration of New-Car Emission Rates	379
Lead Phaseout Program	380
EXAMPLE 17.3 Getting the Lead Out: The Lead Phaseout Program	381

Possible Reforms 381

Fuel Taxes	381
Congestion Pricing	382
DEBATE 17.1 CAFE Standards or Fuel Taxes?	383
Private Toll Roads	384
EXAMPLE 17.4 Innovative Mobile-Source Pollution Control Strategies: Singapore	385
Parking Cash Outs	385
Feebates	386
Pay-As-You-Drive (PAYD) Insurance	386
Accelerated Retirement Strategies	386
EXAMPLE 17.5 Modifying Car Insurance as an Environmental Strategy	387

Summary 388

EXAMPLE 17.6 Counterproductive Policy Design	388				
Key Concepts	390	◆	Further Reading	390	◆
Additional References	391	◆	Discussion Questions	392	

18

Water Pollution 393

Introduction 393

The Nature of Water Pollution Problems 394

Types of Waste-Receiving Water 394

Sources of Contamination 394

Types of Pollutants 396

DEBATE 18.1 Toxics in Fish Tissue: Do Fish Consumption Advisories Change Behavior? 398

Water Pollution Control Policy 400

Traditional Water Pollution Control Policy 400

Early Legislation 400

Subsequent Legislation 401

The TMDL Program 403

The Safe Drinking Water Act 403

Ocean Pollution 404

Private Enforcement 404

Efficiency and Cost-Effectiveness 405

Ambient Standards and the Zero Discharge Goal 405

National Effluent Standards 406

Municipal Waste Treatment Subsidies 409

EXAMPLE 18.1 Effluent Trading and the Cost of Reducing Waste Treatment Discharges into Long Island Sound 410

Pretreatment Standards 411

EXAMPLE 18.2 Cost-Effective Pretreatment Standards 412

Nonpoint Pollution 412

Atmospheric Deposition of Pollution 414

The European Experience 414

Developing Country Experience 415

EXAMPLE 18.3 Economic Incentives for Water Pollution Control: The Case of Colombia 416

Oil Spills 417

EXAMPLE 18.4 Anatomy of an Oil Spill Suit: The *Amoco Cadiz* 418

Citizen Suits 418

Water Quality, Watershed Based Trading, and GIS 419

Summary 419

Key Concepts 420 ♦ Further Reading 421 ♦

Additional References 421 ♦ Discussion Questions 423

19

Managing Waste 424

Introduction 424

Efficient Recycling 424

Extraction and Disposal Costs 424

EXAMPLE 19.1 Population Density and Recycling: The Japanese Experience 425

Recycling: A Closer Look 426

EXAMPLE 19.2 The Bet 427

EXAMPLE 19.3 Lead Recycling 428

Waste Disposal and Pollution Damage 428

Disposal Costs and Efficiency 429

The Disposal Decision 429

Disposal Costs and the Scrap Market 431

Subsidies on Raw Materials 431

Pollution Damage 431

Toxic and Hazardous Waste 432

Policies Targeted at Conventional Waste 433

EXAMPLE 19.4 Pricing Trash in Marietta, Georgia 434

DEBATE 19.1 "Bottle Bills." Economic Incentives at Work? 436

EXAMPLE 19.5 Implementing the Take-Back Principle 437

Special Policies Targeted at Hazardous Waste 439

EXAMPLE 19.6 Regulating Through Mandatory Disclosure: The Case of Lead 442

International Agreements 442

Summary 443

Key Concepts 444 ♦ Further Reading 444 ♦

Additional References 445 ♦ Discussion Questions 446

20 Development, Poverty, and the Environment 448

Introduction 448

The Growth Process 449

The Nature of the Process 449

Potential Sources of Reduced Growth 450

The Natural Resource Curse 452

Energy 452

EXAMPLE 20.1 The "Natural Resource Curse" Hypothesis 453

Environmental Policy 455

Outlook for the Near Future 455

DEBATE 20.1 Jobs Versus the Environment: Which Side Is Right? 456

Population Impacts 457

The Information Economy 457

The Growth-Development Relationship 458

Conventional Measures 458

Alternative Measures 460

Growth and Poverty: The Industrialized Nations 464

The Effects on Income Inequality 464

Poverty in the Developing Countries 464

The Appropriateness of the Traditional Model 466

Barriers to Development 467

EXAMPLE 20.2 Trading Water for Beehives and Barbed Wire in Bolivia 468

EXAMPLE 20.3 Debt-for-Nature Revisited: The Nature Conservancy, the Tropical Forest Conservation Act, and Costa Rica 471

Summary 472

Key Concepts 473 ♦ Further Reading 474 ♦

Additional References 474 ♦ Discussion Questions 476

21 The Quest for Sustainable Development 477

Introduction 477

Sustainability and Development 478

Market Allocations 480

Efficiency and Sustainability 480

EXAMPLE 21.1 Resource Depletion and Economic Sustainability: Malaysia 482

Trade and the Environment 484

EXAMPLE 21.2 Has NAFTA Improved the Environment in Mexico? 487

DEBATE 21.1 Should an Importing Country Be Able to Use Trade Restrictions to Influence Harmful Fishing Practices in an Exporting Nation? 489

A Menu of Opportunities 490

Agriculture 490

Energy 491

Waste Reduction 492

Managing the Transition 492

Prospects for International Cooperation 493

Opportunities for Cooperation 494

Restructuring Incentives 495

EXAMPLE 21.3 Disclosure Strategies for Pollution Control in Indonesia 501

Forced Transition 501

Defining the Target 501

Institutional Structure 502

Administration 503

Summary 504

Key Concepts 505 ♦ Further Reading 505 ♦

Additional References 506 ♦ Discussion Questions 508

22 Visions of the Future Revisited 509

Addressing the Issues 509

Conceptualizing the Problem 509

Institutional Responses 511

EXAMPLE 22.1 Private Incentives for Sustainable Development: Can Adopting Sustainable Practices Be Profitable? 512

Sustainable Development 514

EXAMPLE 22.2 Public/Private Partnerships: The Kalundborg Experience 516

A Concluding Comment 517

Key Concept 518 ♦ Discussion Questions 518

Index 519
