<i>List of contributors</i>	xi
<i>Preface</i>	xiii
<i>Acknowledgements</i>	xvi
<i>SI units and symbols</i>	xxi
<i>Note on equivalence and equivalent weight</i>	xxv
<b>1 Introduction</b>	<b>1</b>
V.B. Gupta and V.K. Kothari	
1.1 Definition and classification	1
1.2 Evolution of manufactured fibres	2
1.3 Fibre-forming processes	3
1.4 Fibre products and properties	4
1.5 Production trends	5
1.6 Application areas	8
1.7 Scope of this book	11
References	13
<b>2 Structural principles of polymeric fibres</b>	<b>14</b>
V.B. Gupta	
2.1 Introduction	14
2.2 Molecular size and interaction	15
2.3 Molecular orientation and crystallinity in fibres	17
2.4 Polymers as fibres, plastics and rubbers	18
2.5 Fibre morphology	23
2.6 Thermal transitions	25
References	30
<b>3 Basic principles of fluid flow during fibre spinning</b>	<b>31</b>
V.B. Gupta and Y.C. Bhuvanesh	
3.1 Introduction	31

---

3.2	Shear flow	34
3.3	Elongational flow	50
3.4	Molecular theories of fluid flow	55
3.5	Spinnability and flow instabilities	60
	References	65
<b>4</b>	<b>Melt-spinning processes</b>	<b>67</b>
	V.B. Gupta	
4.1	Introduction	67
4.2	The melt-spinning line	69
4.3	Melt-spinning variables and conditions for continuous spinning	78
4.4	Special features of high speed spinning	80
4.5	The role of some critical parameters and their variation along the spinline	83
4.6	Structure formation during spinning	90
4.7	Integrated spin-draw process	94
4.8	Other techniques to produce fibrous structures	96
	References	96
<b>5</b>	<b>Computer simulation of melt-spinning</b>	<b>98</b>
	V.M. Nadkarni	
	Notations	98
5.1	Introduction	99
5.2	Theoretical background	102
5.3	Spinline orientation	104
5.4	Sensitivity analysis	106
5.5	Process implications	108
5.6	Stress-orientation relationship for PET	112
5.7	Case study for process optimization	112
5.8	Case studies for product development	117
5.9	Conclusions	122
	References	123
<b>6</b>	<b>Solution-spinning processes</b>	<b>124</b>
	V.B. Gupta	
6.1	Introduction	124
6.2	The process variables for solution-spinning	126
6.3	Dry-spinning	126
6.4	Wet-spinning	133
6.5	Development of structure and morphology during solution-spinning	136
6.6	Some salient comparative features of the spinning processes	137
	References	137

---

<b>7 Spin finishes for manufactured fibres</b>	<b>139</b>
P. Bajaj	
7.1 Introduction	139
7.2 Properties of spin finishes	140
7.3 Role of spin finishes	140
7.4 Spin finish components	145
7.5 Spin finish application techniques	147
7.6 Spin finishes for staple fibre production and processing	151
7.7 Spin finishes for filament yarns	154
7.8 Influence of spin finish on dyeing of yarn/fabric	160
7.9 Analysis of spin finish formulations	160
7.10 Problems encountered in finish application	167
References	168
<b>8 Drawing of melt-spun fibres</b>	<b>170</b>
A.K. Sengupta	
8.1 Introduction	170
8.2 The drawing unit	171
8.3 The drawing behaviour of thermoplastic polymers	172
8.4 Influence of drawing on structure and properties of fibres	178
8.5 Orientation stretching for high strength	184
8.6 High speed spinning and the spin-draw process	185
8.7 Drawing of preoriented yarns and draw-warping	186
References	186
<b>9 Heat-setting of thermoplastic fibres</b>	<b>188</b>
A.K. Sengupta	
9.1 Introduction	188
9.2 Nature of set	190
9.3 Heat-setting behaviour of polyamide and polyester fibres	193
9.4 Heat-setting of cellulose triacetate fibres	199
9.5 Settability and the measurement of the degree of set	200
References	202
<b>10 Characterization of polymers and fibres</b>	<b>203</b>
A.K. Gupta	
10.1 Introduction	203
10.2 Characterization at the molecular level	204
10.3 Characterization of physical structure	219
10.4 Thermal characterization	238
10.5 Microscopic characterization	243
References	246

---

<b>11 Testing of manufactured fibres</b>	<b>248</b>
V.K. Kothari	
11.1 Introduction	248
11.2 Fineness	248
11.3 Fibre crimp	250
11.4 Tensile properties	251
11.5 Evenness testing	256
11.6 Frictional properties	263
11.7 Shrinkage behaviour	264
11.8 Entanglement testing	267
References	270
<b>12 Poly(ethylene terephthalate) fibres</b>	<b>271</b>
V.B. Gupta, A.K. Mukherjee and S.S. Cameotra	271
12.1 Introduction	
12.2 Polymer production	272
12.3 Fibre production	296
12.4 Structure and mechanical properties of fibres	311
12.5 Application areas	313
References	315
<b>13 Nylon 6 and nylon 66 fibres</b>	<b>318</b>
B.L. Deopura and A.K. Mukherjee	
13.1 Introduction	318
13.2 Nylon 6 polymer production	319
13.3 Nylon 66 polymer production	332
13.4 Degradation reactions	338
13.5 Additives	339
13.6 Fibre production	340
13.7 Post-spinning operations	349
13.8 Glass transition temperature and fibre structure	351
13.9 Mechanical behaviour	353
13.10 Applications	356
References	356
<b>14 Speciality polyamide and polyester yarns: an industrial approach to their production and rheology</b>	<b>360</b>
T. Manabe	
14.1 Introduction	360
14.2 Production of modified polymers for making yarns with different dyeability characteristics	361
14.3 Antistatic nylon and polyester yarns	374
14.4 Flame retardant yarns	380

---

14.5 Polyester yarns with microgrooves, microvoids and microcraters	382
14.6 Super microfilament yarns by conjugated bicomponent yarn spinning	384
14.7 Fibres with non-circular cross-section and hollow fibres	386
14.8 Melt rheology during spinning of speciality yarn	394
References	404
<b>15 Acrylic fibres</b>	<b>406</b>
P. Bajaj	
15.1 Introduction	406
15.2 Polymer manufacture	407
15.3 Influence of polymerization conditions on properties of acrylic polymer	415
15.4 Characterization of acrylonitrile polymers	420
15.5 Spinning processes	425
15.6 Tow processing	442
15.7 Mechanical properties of acrylic fibres	448
15.8 Speciality fibres	448
References	453
<b>16 Polypropylene fibres</b>	<b>457</b>
Kushal Sen	
16.1 Introduction	457
16.2 Polymerization	458
16.3 Stabilization against degradation	464
16.4 Fibre production	468
16.5 Structure development during solidification	473
16.6 Fibre properties	476
16.7 Application areas	478
References	478
<b>17 Rayon fibres</b>	<b>480</b>
A.K. Sengupta	
17.1 Introduction	480
17.2 The viscose process	481
17.3 Advances in viscose rayon technology	493
17.4 Viscose fibre variants	497
17.5 Alternatives to the viscose process	503
References	513
<b>18 Manufactured fibres for high performance, industrial and non-conventional applications</b>	<b>514</b>
Satish Kumar and V.B. Gupta	
18.1 Introduction	514

**x Contents**

---

18.2	Fibres for industrial applications	516
18.3	Fibres for high performance applications	518
18.4	Fibres for non-conventional applications	553
	References	557
<b>19</b>	<b>Spunbonding and melt-blowing processes</b>	<b>560</b>
	B.C. Goswami	
19.1	Introduction	560
19.2	Spunbonded fabrics	561
19.3	Melt-blown fabrics	577
	References	592
<b>20</b>	<b>Reuse of polymer and fibre waste</b>	<b>595</b>
	P. Bajaj and N.D. Sharma	
20.1	Introduction	595
20.2	Utilization of PET waste	598
20.3	Recovery from nylon 6 waste	615
20.4	Nylon 66 yarn waste	623
20.5	Polypropylene yarn waste	625
20.6	Acrylic waste	627
	References	629
	<b>Index</b>	<b>633</b>
